Introduction to Mathematical Philosophy Bertrand Russell,2013-01-21 Originally published in 1919 this work on the philosophy of mathematics is both expensive and hard to find in its first edition It contains Bertrand Russell s ideas on number definition cardinal numbers propositional functions and much more This is a fascinating work and thoroughly recommended for anyone interested in the philosophy of mathematics Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce We are republishing these classic works in affordable high quality modern editions using the original text and artwork **Just-in-Time Logistics** Dr Kee-hung Lai,Professor T C E Cheng,2012-09-28 The enduring repercussions of the Asian financial crisis in 1997 the worsening global economy following the burst of the dotcom bubbles in 2001 the financial tsunami in 2008 and the incessant rise in customer demand for better services have all contributed to shrinking profit margins for businesses around the world To cope with these challenges firms

are discovering logistics as a competitive weapon when looking for ways to strengthen and preserve their market positions One successful solution has been the adoption of Just in Time manufacturing systems which involve many functional areas of a firm such as manufacturing engineering marketing and purchasing among others Just in Time Logistics extends the JIT concept in manufacturing to business logistics an area that has been observed to account for more than 30 per cent of sales revenue for some firms It gives you an overview and an introduction of JIT logistics and provides managerial insights on how to achieve improved logistics performance in terms of cost and service enhancements A discussion of the quality implementation and performance measurement issues related to the application of JIT in business logistics is also presented

North Carolina Reports North Carolina. Supreme Court,1918 Cases argued and determined in the Supreme Court of North Carolina *Computer Aided Assessment of Mathematics* Chris Sangwin,2013-05-02 Assessment is a key driver in mathematics education This book examines computer aided assessment CAA of mathematics in which computer algebra systems CAS are used to establish the mathematical properties of expressions provided by students in response to questions In order to automate such assessment the relevant criteria must be encoded and in articulating precisely the desired criteria the teacher needs to think very carefully about the goals of the task Hence CAA acts as a vehicle to examine assessment and mathematics education in detail and from a fresh perspective One example is how it is natural for busy teachers to set only those questions that can be marked by hand in a straightforward way even though the constraints of paper based formats restrict what they do and why There are other kinds of questions such as those with non unique correct answers or where assessing the properties requires the marker themselves to undertake a significant computation It is simply not sensible for a person to set these to large groups of students when marking by hand However such questions have their place and value in provoking thought and learning This book aimed at teachers in both schools and universities explores how in certain cases different question types can be automatically assessed Case studies of existing systems have been included to illustrate this in a concrete and practical way **The Law Reports** ,1886 **New York Supreme Court** , *Bulletin of the United*

increasingly talk to each other over the Web there is a fast growing desire to use XML as the standard exchange format. As a result many relational database systems can export data as XML documents and import data from XML documents and provide query and update capabilities for XML data. In addition so called native XML database and integration systems are appearing on the database market whose claim is to be especially tailored to storing maintaining and easily accessing XML documents. After the huge success of the first XML Database Symposium XSym 2003 last year in Berlin already then in conjunction with VLDB it was decided to establish this symposium as an annual event that is supposed to take place as an integral part of VLDB. The goal of this symposium is to provide a high quality platform for the presentation and discussion of new research results and system developments.
