Terms In Context Studies In Corpus Linguistics:

Terms in Context Jennifer Pearson,1998-05-15 Terms in Context applies the methodology that has been developed over the last two decades in corpus linguistics to the relatively new and still little developed field of corpus based terminography While corpora are already being used by some terminologists for the identification of terms and retrieval of contextual fragments this book describes the first attempt to use corpora for terminography in much the same way as large general reference corpora are already being used for general language lexicography The author goes beyond the standard problem of identifying terms as opposed to non terminological lexical items in text and focuses on identifying metalanguage patterns which point to the presence in text of parts of reusable definitions of terms The author examines these patterns and shows how the information which they contain can be retrieved and used as input for terminological entries Terms in Context should be of interest to traditional terminologists who have not previously considered adopting a corpus based approach to their work or at least not on the scale proposed here to modern terminologists who use text primarily for the identification of terms and the retrieval of contextual examples to those in the corpus linguistic community who have hitherto used general language corpora for the purposes of lexicography and have not previously considered using special purpose corpora for more specific lexicography studies and to academics in the ESP LSP community who are interested in showing students how to use text as a means of ascertaining the meaning of terms *Corpus Linguistics Beyond the Word* ,2015-07-14 This volume will be of particular interest to readers interested in expanding the applications of corpus linguistics techniques through new tools and approaches The text includes selected papers from the Fifth North American Symposium hosted by the Linguistics Department at Montclair State University in Montclair New Jersey in May 2004 The symposium papers represented several areas of corpus studies including language development syntactic analysis pragmatics and discourse language change register variation corpus creation and annotation and practical applications of corpus work primarily in language teaching but also in medical training and machine translation A common thread through most of the papers was the use of corpora to study domains longer than the word Not surprisingly fully half of the papers deal with the computational tools and linguistic strategies needed to search for and analyze these longer spans of language while most of the remaining papers examine particular syntactic and rhetorical properties of one or more corpora *Corpus Linguistics in Chinese Contexts* Simon Smith,2015-07-27 Rapid advances in computing have enabled the integration of corpora into language teaching and learning yet in China corpus methods have not yet been widely adopted Corpus Linguistics in Chinese Contexts aims to advance the state of the art in the use of corpora in applied linguistics and contribute to the expertise in corpus use in China Terminology Translation in Chinese Contexts Saihong Li,William Hope,2021-02-22 Terminology Translation in Chinese Contexts Theory and Practice investigates the theory and practice of terminology translation terminology management and scholarship within the distinctive milieu of Chinese and explores the complex relationship between

terminology translation micro level and terminology management macro level This book outlines the contemporary challenges of terminology translation and terminology management within Chinese contexts in specialized fields including law the arts religion Chinese medicine and food products The volume also examines how the development and application of new technologies such as big data cloud computing and artificial intelligence have brought about major changes in the language service industry Technology such as machine translation and computer assisted translation has spawned new challenges in terminology management practices and has facilitated their evolution in contexts of ever greater internationalization and globalization This book recontextualizes terminology translation and terminology management with a special focus on English Chinese translation It is hoped that the volume will enable and enhance dialogue between Chinese and Western scholars and professionals in the field All chapters have been written by specialists in the different subfields and have been peer reviewed by the editors   **Handbook of Terminology** Hendrik J. Kockaert,Frieda Steurs,2015-03-13 Terminology has started to explore unbeaten paths since W ster and has nowadays grown into a multi facetted science which seems to have reached adulthood thanks to integrating multiple contributions not only from different linguistic schools including computer corpus variational socio cognitive and socio communicative linguistics and frame based semantics but also from engineering and formal language developers In this ever changing and diverse context Terminology offers a wide range of opportunities ranging from standardized and prescriptive to prototype and user based approaches At this point of its road map Terminology can nowadays claim to offer user based and user oriented hence user friendly approaches to terminological phenomenona when searching extracting and analysing relevant terminology in online corpora when building term bases that contribute to efficient communication among domain experts in languages for special purposes or even when proposing terms and definitions formed on the basis of a generally agreed consensus in international standard bodies Terminology is now ready to advance further thanks to the integration of meaning description taking into account dynamic natural language phenomena and of consensus based terminology management in order to help experts communicate in their domain specific languages In this Handbook of Terminology HoT the symbiosis of Terminology with Linguistics allows a mature and multi dimensional reflection on terminological phenomena which will eventually generate future applications which have not been tested yet in natural language The HoT aims at disseminating knowledge about terminology management and at providing easy access to a large range of topics traditions best practices and methods to a broad audience students researchers professionals and lecturers in Terminology scholars and experts from other disciplines among which linguistics life sciences metrology chemistry law studies machine engineering and actually any expert domain In addition the HoT addresses any of those with a professional or personal interest in multilingual terminology translation interpreting localization editing etc such as communication specialists translators scientists editors public servants brand managers engineers intercultural organization specialists and experts in any field Moreover the HoT offers added value in
