**Eclipsing Binary Stars** Josef Kallrath, Eugene F. Milone, 2013-11-11 Have you ever stopped at a construction project on the way to your office and the day's astrophysics Remember the other onlookers folks just enjoying the spectacle as we all do in following developments away from our areas of active work We are excited and thrilled when the Hubble Space Telescope discovers an Einstein Cross when the marvelous pulsars enter our lives and when computer scientists put a little box on our desk that outperforms yesterday's giant machines We are free to make use of such achievements and we respect the imagination and discipline needed to bring them about just as onlookers respect the abilities and planning needed to create a building they may later use After all each of us contributes in our own areas as best we can In addition to the serious onlookers there will be passers by who take only a casual look at the site They may use the building later but have little or no interest in its construction and give no thought to the resources needed to bring it to completion Upon arriving at work those persons write astronomy and astrophysics books at various levels in which they must say something about close binary stars Usually a page or two will do and the emphasis is on the MLR mass luminosity radius data obtained only from binaries

Spider Star Mike Brotherton, 2008-03-04 The Spider Star is no star and the Spider Star is no planet but it is a place anyway and its golden heart is the source of all good and evil But mostly evil For that which comes last colors all that has come before Since the information is a hundred thousand years out of date the only hope for Argo is to send a ship and crew into the unknown to find the Spider Star and try to negotiate for a way to shut down the weapon BOOK JACKET *Brain Informatics and Health* Giorgio A. **Happiness** Randy Alcorn, 2024-06 Christians are supposed to be happy In fact we are supposed to radiate joy peace and contentment that is so unmistakable and so attractive that others are naturally drawn to us because they want what we have And yet in today's culture the vast majority of Christians are perceived as angry judgmental people who don't seem to derive any joy from life whatsoever So why aren't we happy Unfortunately many Christians are taught early on that God doesn't want us to be happy he wants us to be holy In fact many Christians are laboring under the false notion that God himself is not happy But nothing could be further from the truth God does want us to be happy The Bible is filled with verses that prove that ours is a happy joy filled God who not only loves celebrations but also desperately wants his children to be happy Why else would He go to the lengths He did to ensure our eternal happiness in His presence We know that we will experience unimaginable joy and happiness in Heaven but that doesn't mean we can't also experience joy and happiness here on earth In *Happiness* noted theologian Randy Alcorn dispels centuries of misconceptions about happiness and provides indisputable proof that God not only wants us to be happy He commands it The most definitive study on the subject of happiness to date this book is a paradigm shifting wake up call for the church and Christians everywhere

*A History of Astronomy* David Leverington, 2012-12-06 The history of astronomy is like most history a multidimensional story and when writing about a specific period the author has to decide how to handle all the developments of earlier times in order to set the scene I have done this by starting most chapters of the book with a summary of astronomical knowledge at the beginning of our chosen period together with a brief review of how such knowledge had been gained This story is not only interesting in itself but it will also assist those readers that would appreciate a brief reminder of some of the basic elements of astronomy It is also necessary to decide when to start our history Should it be the year 1900 or 1890 or should it be linked to some key development or investigation e.g. the discovery of the electron by J.J. Thomson in 1897 or the discovery of spectroscopic binary stars by Pickering and Vogel independently in 1889 or maybe the year 1890 in which Thomas Edison tried

unsuccessfully to detect radio waves from the Sun and Johannes Rydberg published his formula for atomic spectra I have in fact decided to start this history at about 1890 as it was the year of publication of the Draper Memorial Catalogue of stellar spectra which together with its updates provided essential data for the understanding of stellar spectra until well into the twentieth century This date also gives a clear hundred years up to the present **The Star Gate Archives** Edwin C.

May, Sonali Bhatt Marwaha, 2019-04-24 Star Gate is the largest funded program in the history of psi research receiving about 19 933 million in funding from 1972 to 1995 Researchers from SRI International and later at Science Applications International Corporation in association with various U S intelligence agencies participated in this program Using the remote viewing method research focused on understanding the applicability and nature of psi in general but mostly upon informational psi Volume 1 Remote Viewing 1972 1984 and Volume 2 Remote Viewing 1985 1995 include all aspects of RV including laboratory trials and several operational results Volume 3 Psychokinesis focuses on laboratory investigations Volume 4 Operational Remote Viewing Government Memorandums and Reports includes an analysis of the applied remote viewing program and a selection of documents that provide a narrative on the behind the scenes activities of Star Gate In a total of 504 separate missions from 1972 to 1995 remote viewing produced actionable intelligence prompting 89 percent of the customers to return with additional missions The Star Gate data indicate that informational psi is a valid phenomenon These data have led to the development of a physics and neuroscience based testable model for the underlying mechanism which considers informational psi as a normal albeit atypical phenomenon The Star Gate data found insufficient evidence to support the causal psi psychokinesis hypothesis **The Following of the Star** Florence Louisa Barclay, 1911

Lively, 2020-03-19 In 1995 Star Trek

Voyager brought a new dynamic to Star Trek's familiar starship oriented show. Lost 70 000 light years in space Voyager and its crew faced an uncertain and changeable future echoing anxieties felt in the United States at the time. These fifteen essays explore the context, characters and themes of Star Trek Voyager as they relate to the culture and zeitgeist of the 1990s. Essays on gender show how the series both challenges and reinforces typical SF stereotypes through the characters of Captain Janeway, Kes and Seven of Nine, while essays on identity examine the show's intersections with disability studies, race and multiracial identities, family dynamics and emerging AI and humanity. Using the epic journey of Homer's Odyssey as a starting point for the series and ending with an examination of the impacts of inception at the birth of the internet age, this book shows the many ways in which Voyager negotiated different perspectives for what the future of the galaxy and the USA could be.

**Descriptive Complexity of Formal Systems** Galina Jirásková, Giovanni Pighizzini, 2020-11-07 This book constitutes the proceedings of the 22nd International Conference on Descriptive Complexity of Formal Systems DCFS 2020 which was supposed to take place in Vienna, Austria, in August 2020 but the conference was canceled due to the COVID-19 crisis. **Hydrogen Deficient Stars and Related Objects** K. Hunger, Detlef Schönberner, N.K. Rao, 2012-12-06 The first helium star was discovered in 1942, the first scientific meeting on the subject, however, took place in 1985. The meeting was hence long overdue, for in the meantime a substantial amount of material had been accumulated by a rather small but active scientific community. Hence it appeared necessary to review the field in order to define the subject, assess its present status and discuss future developments. Hydrogen deficiency is a widespread phenomenon occurring in a large variety of stellar and nonstellar objects. It can be readily detected in B stars as these exhibit both hydrogen and helium lines if the elements are present in appreciable amounts. It becomes less manifest in cool stars where the temperature is too low to excite helium and where one has to devise indirect methods for proving hydrogen deficiency. Clearly it was not possible to discuss the whole complex of hydrogen deficiency, i.e. in both stars and diffuse matter, but rather to concentrate on the issue of helium stars.
