**Territorial Changes and International Conflict** Paul Diehl, Gary Goertz, 2002-01-22 This book charts the incidence of territorial changes and military conflicts from 1816 to 1980 Using statistical and descriptive analysis the authors attempt to answer three related sets of questions When does military conflict accompany the process of national independence When do states fight over territorial changes and when are such transactions completed peacefully How do territorial changes affect future military conflict between the states involved in the exchange

*War and Peace in International Rivalry* Paul Diehl, Gary Goertz, 2010-06-02 This book provides the first detailed analysis of international rivalries the long standing and often violent confrontations between the same pairs of states The book addresses conceptual components of rivalries and explores the origins dynamics and termination of the most dangerous form of rivalry enduring rivalry since 1816 Paul Diehl and Gary Goertz identify 1166 rivalries since 1816 They label sixty three of those as enduring rivalries These include the competitions between the United States and Soviet Union India and Pakistan and Israel and her Arab neighbors The authors explain how rivalries form evolve and end The first part of the book deals with how to conceptualize and measure rivalries and presents empirical patterns among rivalries in the period 1816 1992 The concepts derived from the study of rivalries are then used to reexamine two central pieces of international relations research namely deterrence and democratic peace studies The second half of the

book builds an explanation of enduring rivalries based on a theory adapted from evolutionary biology punctuated equilibrium. The study of international rivalries has become one of the centerpieces of behavioral research on international conflict. This book by two of the scholars who pioneered such studies is the first comprehensive treatment of the subject. It will become the standard reference for all future studies of rivalries. Paul F. Diehl is Professor of Political Science and University Distinguished Teacher Scholar, University of Illinois. He is the coeditor of *Reconstructing Realpolitik* and coauthor of *Measuring the Correlates of War*. Gary Goertz is Assistant Professor of Political Science, University of Arizona, and is the coauthor with Paul Diehl of *Territorial Change and International Conflict*. *Island Disputes and Maritime Regime Building in East Asia* Min Gyo Koo, 2010-05-06. Islands have emotional content far beyond any material significance because giving way on the island issue to Japan would be considered as once again compromising the sovereignty over the whole Korean peninsula. For Japan the Dokdo issue may lack the same degree of strategic and economic values and emotional appeal as the other two territorial disputes that Japan has had with Russia and the two Chinas, namely the Northern Territories, Southern Kurile Islands, and the Senkaku Islands, respectively. Nevertheless, fishing resources and the maritime boundary issues became highly salient with the introduction of UNCLOS. Also, the legal, political, and economic issues surrounding Dokdo are all intertwined with Japan's other territorial disputes to the extent that concessions of sovereignty on any of these island disputes could jeopardize claims or negotiations concerning the rest. South Korea and Japan have forged a deeper diplomatic and economic partnership over the past decade. A new spirit of partnership after the landmark joint declaration of 1998 culminated in the successful cohosting of the World Cup 2002. At the end of 2003, the two neighbors began to negotiate an FTA to further strengthen their already close economic ties. South Korea's decades-long embargo on Japanese cultural products has now been lifted, while a number of South Korean pop stars are currently sweeping across Japan, creating the so-called Korean Wave fever. A pragmatic calculation of national interests would thus suggest cooperative behavior. *Encyclopedia of Violence, Peace, and Conflict*, 2008-09-05. The 2nd edition of *Encyclopedia of Violence, Peace, and Conflict* provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life. Building on the highly regarded 1st edition (1999) and publishing at a time of seemingly inexorably increasing conflict and violent behaviour, the world over, the *Encyclopedia* is an essential reference for students and scholars working in the field of peace and conflict resolution studies and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change. Covering topics as diverse as Arms Control, Peace Movements, Child Abuse, Folklore, Terrorism, and Political Assassinations, the *Encyclopedia* comprehensively addresses an extensive information area in 225 multi-disciplinary, cross-referenced and authoritatively authored articles. In his Preface to the 1st edition, Editor in Chief Lester Kurtz wrote: "The problem of violence poses such a monumental challenge at the end of the 20th century that it is surprising we have addressed it so inadequately. We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our

conflicts more peacefully Instead we have increased the lethality of our combat through revolutions in weapons technology and military training The Encyclopedia of Violence Peace and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena Ten years on the need for an authoritative and cross disciplinary approach to the great issues of violence and peace seems greater than ever More than 200 authoritative multidisciplinary articles in a 3 volume set Many brand new articles alongside revised and updated content from the First Edition Article outline and glossary of key terms at the beginning of each article Entries arranged alphabetically for easy access Articles written by more than 200 eminent contributors from around the world

*Territory, War, and Peace* John A. Vasquez, Marie T. Henahan, 2023-04-14 This book presents a collection of new and updated essays on what has come to be known as the territorial explanation of war The book argues that a key both to peace and to war lies in understanding the role territory plays as a source of conflict and inter group violence Of all the issues that spark conflict territorial disputes have the highest probability of escalating to war War however is hardly inevitable much depends on how territorial issues are handled More importantly settling territorial disputes and establishing mutually recognized boundaries can produce long periods of peace between neighbors even if other salient issues arise While territory is not the only cause of war and wars arise from other issues territory is one of the main causes of war and learning how to manage it can in principle eliminate an entire class of wars This book will be of great interest to all students of war and conflict studies causes of war and peace international security and strategic studies John A Vasquez is Thomas B Mackie Scholar in International Relations at the University of Illinois Urbana Champaign He is author of *The Steps to War* 2008 with Paul Senese and *The War Puzzle Revisited* 2009 He has been president of the Peace Science Society International and the International Studies Association Marie T Henahan is Director of Internships and Lecturer Department of Political Science at the University of Illinois Urbana Champaign She is author of *Foreign Policy and Congress An International Relations Perspective* and co editor of *The Scientific Study of Peace and War*

**Armed Coexistence** Stephen P. Westcott, 2022-02-04 This book is the first to comprehensively explore the origins and reasons behind the Sino Indian border dispute s intractability Utilising an array of accurate maps tables archival and scholarly research this book shows how an ambiguous frontier became a contested border and how it has become relatively pacified yet remaining unresolved Unlike previous examinations however this book also provides a theoretically based explanation as to why it is so difficult for an interstate border dispute to be resolved By examining a wide range of salient actors from state leaders to the individual governing organisations to the State itself it is

shown that it is usually in their interest to maintain the status quo rather than seek some form of resolution thereby ensuring that the border dispute remains intractable With both China and India shaping up to be major powers throughout the twenty first century a detailed examination of the major issue of contention between them is more pertinent now than ever

Resolving conflicts and making peace is no longer an option; it is an intellectual and practical skill that we must all possess. If you are part of that, we intellectually or professionally, you will find this book a superb companion. Thomas C. Schelling, Professor Emeritus, Harvard University and University of Maryland.

Conflict resolution is one of the fastest growing academic fields in the world today. Although it is a relatively young discipline having emerged as a specialized field in the 1950s, it has rapidly grown into a self-contained vibrant interdisciplinary field. The SAGE Handbook of Conflict Resolution brings together all the conceptual, methodological, and substantive elements of conflict resolution into one volume of over 35 specially commissioned chapters. The Handbook is designed to reflect where the field is today by drawing on the contributions of experts from different fields, presenting in a systematic way the most recent research and practice. Jacob Bercovitch is Professor of International Relations and Fellow of the Royal Society at the University of Canterbury in Christchurch, New Zealand. Victor Kremeneyuk is deputy director of the Institute for USA and Canada Studies, Russian Academy of Sciences, Moscow. He is also a research associate at IIASA. William Zartman is Jacob Blaustein Professor of Conflict Resolution and International Organization at the Nitze School of Advanced International Studies of Johns Hopkins University.

**The Dynamics of Enduring Rivalries** Paul Francis Diehl, 1998. It's hard to think of Israel without also remembering the country's long-standing problems with its Arab neighbors. Similarly, India and Pakistan have long been less than cordial to each other. The concept of enduring rivalries and conflicts tantamount to militarized competition between two states is rapidly emerging as a subject of research in international relations. The nine contributors to *The Dynamics of Enduring Rivalries* place the concept in its empirical and theoretical context, exploring how such rivalries arise, what influences their development, and when and how they may escalate to war.

**Territoriality, Citizenship and Peacebuilding** Kelechi A. Kalu, 2013-06-29. Civil conflicts in Africa range from few interstate wars to several intrastate conflicts characterized by secessionist movements, irredentism, coups and counter coups, genocide, wars of liberation, to resource-based wars. The varied causes of conflicts in the continent's diverse and complex social formations are seen in ethnic terms and include struggles for economic, environmental resources, poor institutions of governance, and issues of identity such as religion, language, and racial differences. The core issue addressed in this volume is how to understand and explain the structural and analytical reasons for persistent civil conflicts in Africa. The core assumption is that most civil conflicts in Africa erupt largely because of the nature of state formation in the continent. Other significant variables that are explored as explanations for the persistent instances of civil conflicts in sub-Saharan Africa and the slow efforts at nation building across the continent include issues of territoriality, climate change, ethnicity, ideological incongruities, institutional problems, the nature of postcolonial state, unreformed governance, and economic structures and corruption. This book also examines some sources of unresolved issues of territoriality and explains their connections to political violence and socio

political and cultural tensions across sub Saharan Africa It offers suggestions on how scholarly research and policies could help mediate if not mitigate future territorially based conflicts in Africa      Networks of Domination Paul

MacDonald,2014-05-15 In the nineteenth century European states conquered vast stretches of territory across the periphery of the international system Much of Asia and Africa fell to the armies of the European great powers and by World War I those armies controlled 40 percent of the world s territory and 30 percent of its population Conventional wisdom states that these conquests were the product of European military dominance or technological superiority but the reality was far more complex In Networks of Domination Paul MacDonald argues that an ability to exploit the internal political situation within a targeted territory not mere military might was a crucial element of conquest European states enjoyed greatest success when they were able to recruit local collaborators from within the society and exploit divisions among elites Different configurations of social ties connecting potential conquerors with elites were central to both the patterns of imperial conquest and the strategies conquerors employed MacDonald compares episodes of British colonial expansion in India South Africa and Nigeria during the nineteenth century and also examines the contemporary applicability of the theory through an examination of the United States occupation of Iraq The scramble for empire fundamentally shaped and continues to shape the international system we inhabit today Featuring a powerful theory of the role of social networks in shaping the international system Networks of Domination bridges past and present to highlight the lessons of conquest      What Do We

Know about War? Sara McLaughlin Mitchell,John A. this collection seek to determine the extent to which states and boundaries have in fact disappeared or are simply changing their functions as we move from an era of fixed territories into a post Westphalian territorial system A group of international political geographers and political scientists examine the changing nature of the state pointing to significant changes on the one hand but equally noting the continued importance of territory and boundaries in determining the political ordering of the post modern world      *The China-India Rivalry in the Globalization Era* T.V. Paul,2018-09-03 As the aspirations of the two

rising Asian powers collide the China India rivalry is likely to shape twenty first century international politics in the region and far beyond This volume by T V Paul and an international group of leading scholars examines whether the rivalry between

the two countries that began in the 1950s will intensify or dissipate in the twenty first century The China India relationship is important to analyze because past experience has shown that when two rising great powers share a border the relationship is volatile and potentially dangerous India and China s relationship faces a number of challenges including multiple border disputes that periodically flare up division over the status of Tibet and the Dalai Lama the strategic challenge to India posed by China s close relationship with Pakistan the Chinese navy s greater presence in the Indian Ocean and the two states competition for natural resources Despite these irritants however both countries agree on issues such as global financial reforms and climate change and have much to gain from increasing trade and investment so there are reasons for optimism as well as pessimism The contributors to this volume answer the following questions What explains the peculiar contours of this rivalry What influence does accelerated globalization especially increased trade and investment have on this rivalry What impact do US China competition and China s expanding navy have on this rivalry Under what conditions will it escalate or end The China India Rivalry in the Globalization Era will be of great interest to students scholars and policymakers concerned with Indian and Chinese foreign policy and Asian security

**Geopolitics at the End of the Twentieth Century** Nurit Kliot, David Newman, 2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics and boundaries This is an invaluable addition to our understanding of contemporary world affairs
