Midlarsky, 2014-06-03 First published in 1992 this edited collection argues that conflicts have a growing tendency both to intensify and to lengthen thus increasing the likelihood of external actors being drawn into the on going violence Here leading experts in comparative and international politics examine this tendency of communal conflicts to spill over into the international arena They also look at the conditions under which these processes do not occur and are mediated successfully The authors combine theoretical perspectives with case studies covering examples from the origins of the First World War to state building in Iraq and whether it was a precursor of the Iran Iraq War and the Gulf Crisis They present both a global overview and a focus on the state as the single most important intermediary in the internationalization process A comprehensive and relevant reissue this volume will appeal to students and scholars of International Relations Comparative Politics and Strategic Studies **The Political Economy of Development** Berch Berberoglu, 1992-01-01 This book focuses on the role of the state in economic development in a variety of Third World settings through an in depth analysis of the past several decades Berberoglu examines three major alternative development theories developmentalism dependency and neo Marxist He then critically analyzes these theories and their variants to set the stage for a detailed examination of various development paths Two paths of capitalist development are contrasted the export oriented neo colonial model and the import substituting state capitalist model The role of the state in each of these alternatives is discussed in the context of the balance of class forces Berberoglu also provides case studies of Turkey Tanzania Peru and India countries in which the state played a significant role in the development process In each case he demonstrates that the process of state capitalist development inevitably leads to neo colonialism This export oriented path ties Third World countries to centers of world capitalism with all the consequent contradictions that such a linkage entails The book outlines the class nature of these contradictions on a global scale and maps out the balance of class forces and struggles the role of the state and the resultant revolutionary developments that are part of the process of social change and transformation now under way in many Third World countries Also included is an appendix highlighting the need for a class centered approach in development studies The Political Ecology of the State Antonio Augusto Rossotto Ioris, 2014-03-26 The contemporary state is not only the main force behind environmental change but the reactions to environmental problems have played a crucial role in the modernisation of the state apparatus especially because of its mediatory role The Political Ecology of the State is the first book to critically assess the philosophical basis of environmental statehood and regulation addressing the emergence and evolution of environmental regulation from the early twentieth century to the more recent phase of ecological modernisation and the neoliberalisation of nature The state is understood as the result of permanent socionatural interactions and multiple forms of contestation from a critical politico ecological approach This book examines the tension between pro and anti commons tendencies that have permeated the organisation and failures of the environmental responses
