Scott, 2018-05-17 This book addresses the various ways in which modern approaches to the protection of national security have impacted upon the constitutional order of the United Kingdom It outlines and assesses the constitutional significance of the three primary elements of the United Kingdom's response to the possibility of terrorism and other phenomena that threaten the security of the state the body of counter terrorism legislation that has grown up in the last decade and a half the evolving law of investigatory powers and to the extent relevant to the domestic constitution the law and practice governing international military action and co operation Following on from this the author demonstrates that considerations of national security as a good to be protected and promoted in contemporary Britain are reflected not merely in the existence of discrete bodies of law by which it is protected at home and abroad but simultaneously and increasingly leaked into other areas of public law Elements of the constitution which are not directly and inherently linked to national security nevertheless become by both accident and design implicated in the state's national security endeavours with significant and at times far reaching consequences for the constitutional order generally A renewed and strengthened concern for national security since September 2001 has it is argued dragged into its orbit a variety of constitutional phenomena and altered them in its image giving rise to what we might call a national security constitution **Constitutional Issues in Federal Management of Domestic Terrorism Incidents** James F. *Terrorism and the Limitation of Rights* Stefan Sottiaux, 2008-02-29 Taking as a starting point the widely accepted view that states confronted with terrorism must find a proper equilibrium between their respective obligations of preserving fundamental rights and fighting terrorism effectively this book seeks to demonstrate how the design and enforcement of a human rights instrument may influence the result of that exercise An attempt is made to answer the question how a legal order s approach to the limitation of rights may shape decision making trade offs between the demands of liberty and the need to guarantee individual and collective security In doing so special attention is given to the difference between the adjudicative methods of balancing and categorisation The book challenges the conventional wisdom that individual rights in times of crisis are better served by the application of categorical rather than flexible models of limitation In addition the work considers the impact of a variety of other factors including the discrepancies in enforcing an international convention as opposed to a national constitution and the use of

emergency provisions permitting derogations from human rights obligations in time of war or a public emergency The research questions are addressed through a comparative study of the terrorism related restrictions on five fundamental rights protected under the European Convention on Human Rights and the United States Constitution the right to freedom of expression the right to freedom of association the right to personal liberty the right to privacy and the right to a fair trial The book offers both a theoretical account of the paradoxical relationship between terrorism and human rights and a comprehensive comparative survey of the major decisions of the highest courts on both sides of the Atlantic

*A War on Terror?* Marianne Wade,Almir Maljevic,2009-11-05 Marianne Wade and Almir Maljevi

Although the worries about terrorism paled in comparison to the economic crisis as a topic during the last US election one can find plenty of grounds to assume that they remain issue number one in the minds of politicians in Europe As the German houses of Parliament prepare to call in the mediation committee in the discussion of legislation which would provide the Federal Police thus far mandated purely with the post facto investigation of crime with powers to act to prevent acts of terrorism Spain s struggle with ETA and the British Government licks its wounds after a resounding defeat of its latest anti terrorist proposals by the House of Lords one cannot but wonder whether post 9 11 the Europeans are not even more concerned with terrorism than their US counterparts A look at media reports legislative and judicial activities in either Britain or Germany clearly underlines that those two countries are deeply embroiled in anti terrorist activity Can it be that Europe is embroiled in the War on Terror constantly providing for new arms in this conflict Or is it a refusal to participate in the War on Terror that fuels a constant need for Parliaments to grapple with the subject begrudgingly conceding one increasingly draconian measure after the other The question as to where Europe stands in the War on Terror is a fascinating one but one which is difficult to answer
