Terry Winters Paintings Drawings Prints 1994 2004:

Terry Winters Terry Winters, Richard Schiff, Rachel Teagle, 2004-01-01 Terry Winters's work of the past decade weaves disparate strains of idea, object and physical operations into the primary logic of his art. His art contains an astonishing array of forms and demonstrates the equally surprising breadth of his artistic language. This retrospective volume continues where the mid-career survey 1992 at the Whitney Museum concluded, presenting the past decade of Winters's innovative work in paintings, prints, drawings and artists' books. Terry Winters presents the ways in which the artist creates sets and subsets of distinctive works that interact with bodies of previous and current work. Also included are images by the artist that have not previously been exhibited or published. Winters's work is frequently included in conversations and studies relating to the interplay of art and science, and his recent paintings, drawings and prints reflect his engagement with scientific and computational systems of thought and presentations of information. For Winters, abstract art has become a vehicle not for reproducing and inventing form but for harnessing forces. By utilizing expressive means, data becomes pictorial and spatial. This superbly illustrated volume displays the full range of Winters's newest works and the complex relationships that link them to one another. **Terry Winters** Terry Winters, 2003 **Terry Winters, Drawings** Terry Winters, 1990 **Terry Winters**, 1986 *Terry Winters* Terry Winters, 1985 **Doubt** Richard Schiff, 2012-04-23 In an age where art history's questions are now expected to receive answers, Richard Schiff presents a challenging alternative embracing doubt as a critical tool and asking how particular histories of art have come to be. *Terry Winters*, 1998 **Fine Art and Perceptual Neuroscience** Paul Hackett, 2014-01-10 Over the past decade, the integration of psychology and fine art has sparked growing academic interest among researchers of these disciplines. The author, both a psychologist and artist, offers up a unique merger and perspective of these fields. Through the production of fine art which is directly informed by neuroscientific and optical processes, this volume aims to fill a gap in the literature and understanding of the creation and perception of the grid image created as a work of art. The grid image is employed for reasons discussed in the text to illustrate more general processes associated with the integration of vision, visual distortion and painting. Existing at the intersection of perceptual neuroscience, psychology, fine art and art history, this volume concerns the act of painting and the process of looking. More specifically, the book examines vision and the effects of visual impairment and how these can be interpreted through painting within a theoretical framework of visual neuroscience. *The Grove Encyclopedia of American Art* Joan M. Marter, 2011 Arranged in alphabetical order, these 5 volumes encompass the history of the cultural development of America with over 2300 entries.

Imagery Bob Nugent, 2007-10-01 In 1985 winemaker Joe Benziger and Sonoma artist Bob Nugent struck on the idea of putting original art on special releases of Imagery Estate wines. The goal was straightforward: commission the world's modern art luminaries to create works for reproduction onto wine labels. Two decades and 160 labels later, they have assembled a staggering collection of contemporary art from the likes of Sol Lewitt, Terry Winters, Nancy Graves, John
