*Conference Proceedings - Emotions in Language Learning and Use* Cornelia Herbert, Michał Daszkiewicz, 2023-06-12. Emotions are powerful so is language. Emotions guide perception, attention, memory, and decisions making. They challenge or promote health and well-being. Evolutionary emotions have a physical origin and in line with this, a significant proportion of emotional signals are communicated non-verbally, e.g. by the face, gestures, or voice. Nevertheless, in humans, specifically, language is taking over a pivotal role in conveying emotions by mentally representing emotions and feelings in terms of abstract concepts, the latter being theoretically assumed to be grounded in perception, action, and bodily experiences. Scientifically, an emotion without language or a language without emotion perspective has been questioned recently by significant empirical evidence in support of a mutual dependence of emotions and language. However, core questions regarding this functional interdependence remain open. Questions pertain to the role of emotions in language learning and its use, which is the key topic of this year's ERL conference 2023 at Ulm University. This year, the ERL conference is aimed at crossing borders between disciplines, research methods, and interests in the field of basic and applied emotion and language research in an attempt to foster understanding of emotion and language and their interaction by providing answers to the questions outlined above. The conference proceedings that contain all individual contributions to the ERL VI conference, including the talks of our keynote speakers, contribute to this joint interdisciplinary endeavor.
