The African Democracy Muange aa Munguti, 2015-05-21 While Africa accepted to receive democracy African leaders closed their eyes against the weaknesses of the system The weakness of the African democracy was the strength of the leaders and those who were prepared to exploit the continent These prepared the big population to toil for the benefit of a few African democracy has eaten away the African culture morals lifestyle and languages African democracy ate the African form of governance justice unity peace medicine man music and dance and labeled them primitive Among the continents on earth only the African ancestry and languages have been lost and disposed

In African democracies the promise of prosperity is pegged on foreign languages It is only in African democracies where every African child must put more than twenty five years to learn a foreign language to have a future Only in Africa where 75 percent of the population is insecure in all areas of life and live below the poverty line It is only in African democracies where among a billion people none can make a spoon or a simple toothpick Only African democracies depend on imports foreign investors or naturalized citizens from Asia Europe or America and not the African citizens in industrial development The world should stand up and save Africa to educate her own children in her languages Africa has the right to choose from reality away from mockery Africa is the only continent that thrives to do away with her languages in pursuit for foreign languages Africa has the only culture that is demonstrated as archaic and antihuman Everything that is African is below par compared to that of the rest of the world Why Africa is unique the Africans are a distinct people and the continent which is the most wealthy with minerals is surprisingly with the poorest people on earth There is a technology gap in Africa The African democracy is the worst form of governance ever founded by humanity

Measurement for the Social Sciences John R. Rossiter,2010-11-25 This book proposes a revolutionary new theory of construct measurement called C OAR SE for the social sciences The acronym is derived from the following key elements construct definition object representation attribute classification rater entity identification selection of item type enumeration and scoring The new theory is applicable

to the design of measures of constructs in Management Marketing Information Systems Organizational Behavior Psychology Sociology C OAR SE is a rationally rather than empirically based theory and procedure It can be used for designing measures of the most complex and also the most basic constructs that we use in social science research C OAR SE is a radical alternative to the traditional empirically based psychometric approach and a considerable amount of the book s content is devoted to demonstrating why the psychometric approach does not produce valid measures The book argues that the psychometric approach has resulted in many misleading findings in the social sciences and has led to erroneous acceptance or rejection of many of our main theories and hypotheses and that the C OAR SE approach to measurement would correct this massive problem The main purpose of this book is to introduce and explain C OAR SE construct measurement theory in a way that will be understood by all social science researchers and that can be applied to designing new more valid measures Featuring numerous examples practical applications end of chapter questions and appendices the book will serve as an essential resource for students and professional researcher alike
