Scott,2016-12-29 An Examination of Conscience of the Understanding Empirical Proof of the Existence of God by Richard L Scott Seeking his own utmost depth of comprehensive understanding the author sets out to prove empirically that God exists The seed of proof is the Birth Paradox its florescence a faith grounded in his spirituality disposed soul As empirically real as his conscious self as mathematically certain as the probability laws of genetic science as

necessary as that the universe requires a creator for its rational possibility as immanently intuitive as the Divine Allegory he mirrors The Birth Paradox is the contingency of personal conscious existence on the body Is there any scientific or commonsense belief as certain of itself And yet as a practical proposition it is an utterly impossible conjunction Personal consciousness is necessary specific to its own experience a subtly profound tautology How is it then that one s necessary being can be dependent on a chance body
