

**MATERNAL & CHILD HEALTH NURSING; CARE OF
THE CHILDBEARING & CHILDREARING FAMILY
8TH EDITION TEST BANK/INSTANT TESTBANK FOR
MATERNAL & CHILD HEALTH NURSING ; CARE OF
THE CHILDBEARING & CHILDREARING FAMILY
8TH EDITION**

1. For which reasons would a nurse review infant mortality statistics in the United States?
(Select all that apply.)

- A) Measures the quality of pregnancy care
 - B) Reviews information on overall nutrition
 - C) Compares health with those of other states
 - D) Determines infant health and available care
 - E) Provides an index of the country's general health
- Ans: A, B, D, E

Feedback:

Infant mortality statistics provide an index of a country's general health, measures the quality of pregnancy care, provides information on overall nutrition, and determines infant health and available care. Infant mortality statistics compares the health with those of other countries and not with those of other states.

2. The nurse is providing care in an organization that supports the maternal and child care continuum. Which type of patient care area is an example of this approach?

- A) Primary care
- B) Team nursing
- C) Case management
- D) Family-centered care

Ans: D

Feedback:

Keeping the family at the center of care is important because the level of a family's functioning is important to the health status of its members. A healthy family establishes an environment conducive to growth and health-promoting behaviors to sustain family members during crises. A family-centered approach enables nurses to better understand individuals and their effect on others and, in turn, to provide more holistic care. Primary nursing, team nursing, and case management do not necessarily take into consideration the maternal and child care continuum.
