Saladin,2005 The Fabric of the Body K. B. Roberts, J. D. W. Tomlinson, 1992 This is the first book on this subject to be published in the English language for more than fifty years It is a survey and anthology of the major developments styles and trends in anatomical illustration through more than 700 years Anatomy was a preoccupation of renaissance scholars and artists in the universities and academies of Europe By the mid 1500s sophisticated anatomy books were widely distributed It was primarily the illustrations rather than the text that spread information on this descriptive science This bookshows how anatomists and their collaborating artists presented the important aspects of their subjects to doctors medical students and others coincidentally revealing their attitude to the living and the dead human body A narrative history of the context in which these illustrations were produced is supplemented by a precise consideration of the anatomy shown in each plate reproduced The book will appeal to anyone with an academic interest in anatomy illustrative art or figure drawing It is a record of an important aspect of the development of modern medicine and surgery It is lavishly illustrated and will be a

handsome production with a slip case thus it should have amarket amongst collectors of fine art and members of the medical profession. New Atlas of Human Anatomy Thomas McCracken, 2000 There's never been anything like this before the very first anatomically exact and complete three dimensional computer generated reconstruction of actual human anatomy. These amazing color images come to life thanks to the National Library of Medicine's Visible Human ProjectTM For every structure the database generates a incredibly detailed wire frame image which then underwent contour mapping for a more realistic picture First the systemic anatomy appears the skeletal muscular nervous endocrine circulatory respiratory digestive urinary and reproductive systems. Then the focus is on the regional anatomy including the head and neck with brain eye and ear thorax with lungs and heart abdomen stomach liver gallbladder spleen intestines kidney pelvis upper limb arm elbow forearm hand and lower limb thigh knee legs and foot It's the most fascinating mirror on our own construction ever produced and will enthrall students doctors scientists and anyone interested in the miracle that is the human body
