The Laws Delay:

The Law's Delay C. H. van Rhee, 2004 Papers from a conference organised by Maastricht University Faculty of Law on 24 April 2003 *Court Delay and Law Enforcement in China* Qing-Yun Jiang, 2008-05-15 Foreword Qing Yun Jiang was born in Fujian China He studied International Business Administration at the Shanghai Institute of Foreign Trade in Shanghai where he graduated with a Bachelor of Economics In 1997 he started studying at the University of Hamburg After his Master study and his successful completion of the necessary law examinations he was admitted as a doctoral student in the law faculty in 2001 In addition to his study of German civil criminal and administrative laws Jiang demonstrated an increasing interest in law and economics especially in the relationship between law and economic development It is now a well established fact that the rule of law the protection of property rights and a swift and timely resolution to conflicts are corner stones of economic development and long term economic growth In many developing countries court delays are a major shortcoming of the legal system This is true for countries in Latin America and in many Asian countries Empirical findings show a 15 year length of civil procedure from the first filing of the case to the Supreme Court decision This leads to court crises in the sense that private disputes are not brought to the court Private parties attempt to circumvent the official legal system all together When making contracts they resort to self enforcing contracts to self help and if available to private alternative dispute settlement In his thesis Jiang presents an empirical study of court delays in China **The Law's Delay** Sara Woods, 1977 **Study Guide to John E. Commentary Upon Littleton Edward Coke,Francis Hargrave,1817 **The Laws of Maryland: 1785-1799** Maryland,William Kilty,1800 *The Law and Regulation of Airspace Liberalisation in Brazil* Delphine Defossez,2022-05-30 The book starts from the premise that the current aviation framework in Brazil cannot sustain a full liberalisation in the long run While the competition rules in place offer a strong framework which only requires small modifications these rules are not enough to foster a healthy liberalisation In fact until recently Brazilian airlines were operating in a homogenous market where competition was artificial This artificial competition obtained through the imposition of a legal obligation to provide water and a snack and grant a 23kg bag allowance has resulted in a highly concentrated domestic market with very few players Compared to other same size markets such as China or India Brazil is far behind in terms of airlines operating at national level Consequently the opening of the domestic market must be closely regulated to avoid national carriers suffocating under external pressure For this reason state intervention during the liberalisation process is crucial State intervention is also with regard to the protection of passengers The other major problem is the protection framework for passengers which is much too uncertain and burdensome In a sense it is detrimental to the domestic market and passengers Indeed there is no harmonisation of passenger compensation leading to contradictory judgments and possible high moral damages which hinders legal certainty for airlines Compared to the situation in the EU in Brazil airlines have a limited range of defences which are often dismissed by courts This book therefore critically analyses the policies and regulations in place by mainly comparing the Brazilian framework to the European one This choice has been motivated by the fact that European

liberalisation is considered the best so far and as Brazil is starting this process much later it could benefit from the European experience This book will be of particular interest to scholars and practitioners interested in the Brazilian system
