The Lighthouse Stevensons:

The Lighthouse Stevensons Bella Bathurst, 2010-01-07 Bella Bathurst's epic story of Robert Louis Stevenson's ancestors and the building of the Scottish coastal lighthouses against impossible odds [Lighthouse Stevensons](#) Bella Bathurst, 2000 *The Lighthouse Stevensons* Bella Bathurst, 2011-06-28 The flamboyant and elegantly written saga of the legendary author's family and their lifesaving nautical advances across eighteenth century Scotland Publishers Weekly For centuries the seas around Scotland were notorious for shipwrecks. Mariners had nothing to aid their navigation but a single coal fire light on the east coast which was usually extinguished by rain. In 1786 the Northern Lighthouse Trust was established with Robert Stevenson appointed as chief engineer a few years later. In this engrossing book Bella Bathurst reveals that the Stevensons not only supervised the construction of the lighthouses under often desperate conditions but also perfected a design of precisely chiseled interlocking granite blocks that would withstand the enormous waves that batter these stone pillars. The same Stevensons also developed the lamps and lenses of the lights themselves which sent a gleam across the wave and prevented countless ships from being lost at sea. While it is the writing of Robert Louis Stevenson that brought fame to the family name, this mesmerizing account shows how his extraordinary ancestors changed the shape of the Scotland coast against incredible odds and with remarkable technical ingenuity **Robert Louis Stevenson in the Pacific** Roslyn Jolly, 2016-12-05 Robert Louis Stevenson's departure from Europe in 1887 coincided with a vocational crisis prompted by his father's death. Impatient with his established identity as a writer, Stevenson was eager to explore different ways of writing at the same time that living in the Pacific stimulated a range of latent intellectual and political interests. Roslyn Jolly examines the crucial period from 1887 to 1894 focusing on the self-transformation wrought in Stevenson's Pacific travel writing and political texts. Jolly shows how Stevenson's desire to understand unfamiliar Polynesian and Micronesian cultures and to record and intervene in the politics of Samoa gave him opportunities to use his legal education, pursue his interest in historiography and experiment with anthropology and journalism. Thus as his geographical and cultural horizons expanded, Stevenson's professional sphere enlarged as well, stretching the category of authorship in which his successes as a novelist had placed him. Rather than enhancing his stature as a popular writer, however, Stevenson's experiments with new styles and genres and the Pacific subject matter of his later works were resisted by his readers. Jolly's analysis of contemporary responses to Stevenson's writing, gleaned from an extensive collection of reviews many of which are not readily available, provides fascinating insights into the interests, obsessions and resistances of Victorian readers. As Stevenson sought to escape the vocational straightjacket that confined him, his readers just as strenuously expressed their loyalty to outmoded images of Stevenson the author and their distrust of the new guises in which he presented himself **Creaky Traveler in the North West Highlands of Scotland** Warren Rovetch, 2002-10-01 The author has found a good combination of travelogue, guidebook and charm to capture readers' attention. Aimed at more mature outdoor enthusiasts, *The Scots Magazine* On a

Twenty-First-Century Perspectives on British Travel Writing Samia Ounoughi, Emmanuelle Peraldo, Anne-Florence Quaireau, 2025-03-11 Twenty First Century Perspectives on British Travel Writing evidences the evolution of travel writing studies over the last two decades and points to innovative ways to study this heterogeneous genre This volume seeks to build bridges between the study of travel writing and disciplines of sciences and human sciences so that the analyses of travel texts images and objects lead to interdisciplinary enrichment This volume revisits the complicated relationship between fact and fiction science and literature and the world and the word through transdisciplinary approaches Through case studies of British travel writing from the eighteenth to the twenty first centuries the contributors provide illustrations of the fruitful intersection of travel writing studies with other methodologies such as literary studies gender studies postcolonial studies visual studies areal studies engineering studies food studies animal studies ecocriticism posthumanism and geocriticism

Fantasy, Art and Life William Gray, 2011-05-25 In part a sequel to his earlier *Death and Fantasy* William Gray s *Fantasy Art and Life* Essays on George MacDonald Robert Louis Stevenson and Other Fantasy Writers examines the ways in which Life in its various senses is affirmed explored and enhanced through the work of the

creative imagination especially in fantasy literature The discussion includes a range of fantasy writers but focuses chiefly on two writers of the Victorian period George MacDonald and Robert Louis Stevenson whose Scottish and particularly Calvinist backgrounds deeply affected their engagement with what MacDonald called The Fantastic Imagination *Using and Abusing Science* Cyril Besson, Véronique Molinari, 2016-05-11 Over the last two centuries as politics has evolved from the status of amateurship to that of profession political discourse together with its practices and their validity has been increasingly subject to questioning Politicians as illustrated by the low turnouts that have recently characterised general elections and a general lack of interest in politics throughout Western countries enjoy less than ever the trust of the electorate and their discourse is now often criticised for being both hollow and untrustworthy Conversely by evolving from the status of enlightened amateur to that of expert the figure of the scientist has over recent centuries gained credibility with the general public Even though the traditional view of science as the expression of reality has regularly been challenged science continues to be held in high regard and is believed to provide a reliable form of knowledge Summoning science has thus often been a way in everyday life advertising and the popular media to lend authority to a discourse and imply that one's claims are beyond dispute That politicians should have occasionally been tempted to do the same and make up for the deficit of legitimacy of their discourse through the instrumentalisation of scientific arguments or participation in contemporaneous debates on scientific issues is therefore not surprising The issue at stake in this volume is to examine how and to what extent this process may have been taking place in the past three centuries In order to accomplish this the contributions cover various fields of expertise ranging from the hard sciences to more controversial types of science investigating the intricate relations of science and political discourse
