Industry, the State, and Public Policy in Mexico Dale Story, 2014-10-01 The industrialization process in Mexico began before that of any other nation in Latin America except Argentina with the most rapid expansion of new industrial firms occurring in the 1930s and 1940s and import substitution in capital goods evident as early as the late 1930s Though Mexico's trade relations have always been dependent on the United States successive Mexican presidents in the postwar period attempted to control the penetration of foreign capital into Mexican markets In *Industry the State and Public Policy in Mexico* Dale Story recognizing the significance of the Mexican industrial sector analyzes the political and economic role of industrial entrepreneurs in postwar Mexico He uses two original data sets industrial production data for 1929-1983 and a survey of the political attitudes of leaders of the two most important industrial organizations in Mexico to address two major theoretical arguments relating to Latin American development the meaning of late and dependent development and the nature of the authoritarian state Story accepts the general relevance of these themes to Mexico but asserts that the country is an important variant of both With regard to the authoritarian thesis the Mexican authoritarian state has demonstrated some crucial distinctions especially between popular and elite sectors The incorporation of the popular sector groups has closely fit the characteristics of authoritarianism but the elite sectors have operated fairly independently of state controls and the government has employed incentives or inducements to try to win their cooperation In short industrialists have performed important functions not only in accumulating capital and organizing economic enterprises but also by bringing together the forces of social change Industrial entrepreneurs have emerged as a major force influencing the politics of growth and the public policy arena has become a primary focus of attention for industrialists since the end of World War II

Revolution and State in Modern Mexico Adam David Morton, 2013-10-04 Now in an updated edition this groundbreaking study develops a new approach to understanding the formation of the postrevolutionary state in Mexico In a shift away from dominant interpretations Adam David Morton considers the construction of the revolution and the modern Mexican state through a fresh analysis of the Mexican Revolution the era of import substitution industrialization and neoliberalism Throughout the author makes interdisciplinary links among geography political economy postcolonialism and

Latin American studies in order to provide a new framework for analyzing the development of state power in Mexico He also explores key processes in the contestation of the modern state specifically through studies of the role of intellectuals democratization and democratic transition and spaces of resistance As Morton argues all these themes can only be fully understood through the lens of uneven development in Latin America Centrally the book shows how the history of modern state formation and uneven development in Mexico is best understood as a form of passive revolution referring to the ongoing class strategies that have shaped relations between state and civil society As such Morton makes an important interdisciplinary contribution to debates on state formation relevant to Mexican studies postcolonial and development studies historical sociology and international political economy by revitalizing the debate on the uneven and combined character of development in Mexico and throughout Latin America In so doing he convincingly contends that uneven development can once again become a tool for radical political economy analysis in and beyond the region A substantive new epilogue engages the main theoretical debates that have emerged since the book was first published while also exploring the dominant geographies of power and resistance that are shaping state space in Mexico in the twenty first century And now a Spanish edition *Revoluci n y Estado en M xico moderno M xico D F Siglo XXI* 2017 is available as well Click here to see the book trailer

The Mexican Revolution in Chicago John H Flores, 2018-03-21 Few realize that long before the political activism of the 1960s there existed a broad social movement in the United States spearheaded by a generation of Mexican immigrants inspired by the revolution in their homeland Many revolutionaries eschewed U S citizenship and have thus far been lost to history though they have much to teach us about the increasingly international world of today John H Flores follows this revolutionary generation of Mexican immigrants and the transnational movements they created in the United States Through a careful detailed study of Chicagoland the area in and around Chicago Flores examines how competing immigrant organizations raised funds joined labor unions and churches engaged the Spanish language media and appealed in their own ways to the dignity and unity of other Mexicans Painting portraits of liberals and radicals who drew support from the Mexican government and conservatives who found a homegrown American ally in the Roman Catholic Church Flores recovers a complex and little known political world shaped by events south of the U S border

Maximino Avila Camacho and the One-Party State Alejandro Quintana, 2010-03-15 Maximino Avila Camacho and the One Party State The Taming of Caudillismo and Caciquismo in Post Revolutionary Mexico is a political biography of General Maximino Avila Camacho 1891 1945 one of the most powerful regional politicians in Mexico from 1935 to 1945 He was a member of an officially sponsored party known today as the Institutional Revolutionary Party PRI which claimed to represent the goals of the Mexican Revolution 1910 1921 and which managed to win most federal and regional elections from 1929 until its first presidential defeat in 2000 Maximino as he is commonly known became a powerful politician at the time when the official party effectively transformed the Mexican political system from one based on the personal power of regional strongmen and political bosses relying on clientelistic networks popularly known as caudillos and caciques to a modern one based on a centralized civilian administration supported by institutions The story of Maximino the powerful cacique of the state of Puebla demonstrates that the emergence of the one party dominated Mexican state did not destroy caudillos and caciques but simply controlled them Specifically it shows how the official party incorporated these leaders and their authoritarian practices into the state s political machinery The result was 71 years of one party political domination based on a political culture that emphasized patronage favoritism corruption coercion and co optation By tracing Maximino s career from revolutionary soldier to powerful political leader we learn how and why the goals that had originally inspired the party of the revolution primarily democracy and social justice were sacrificed in order to empower it
