Snapshots of the Soul Molly Thomasy Blasing, 2021-07-15 Snapshots of the Soul considers how photography has shaped Russian poetry from the early twentieth century to the present day Drawing on theories of the lyric and the elegy the social history of technology and little known archival materials Molly Thomasy Blasing offers close readings of poems by Boris Pasternak Marina Tsvetaeva Joseph Brodsky and Bella Akhmadulina as well as by the late and post Soviet poets Andrei Sen Senkov Arkadii Dragomoshchenko and Kirill Medvedev to understand their fascination with the visual language representational power and metaphorical possibilities offered by the camera and the photographic image Within the context of long standing anxieties about the threat that visual media pose to literary culture Blasing finds that these poets were attracted to the affinities and tensions that exist between the lyric or elegy and the snapshot Snapshots of the Soul reveals

that at the core of each poet's approach to writing the photograph is the urge to demonstrate the superior ability of poetic language to capture and convey human experience Open Access edition funded by the National Endowment for the Humanities **Exhibitors Daily Review**, 1923 *Photographica*, 1977 The Invisible Middle Term in Proust's A la Recherche Du Temps Perdu Roxanne Hanney, 1990 This volume seeks to offer a new way of reading A la Recherche du Temps Perdu using a fluid manner of interpretation which suggests process rather than product This study contends that everything in Proust's work is threefold The middle term is the common ground shared by the two terms of comparison that constitute a metaphor **Practices of Projection** Gabriel Menotti, Virginia Crisp, 2020-02-05 To many the technological aspects of projection often go unnoticed only brought to attention during moments of crisis or malfunction For example when a movie theater projector falters the audience suddenly looks toward the back of the theater to see a sign of mechanical failure The history of cinema similarly shows that the attention to projection has been most focused when the whole medium is hanging in suspension During Hollywood's economic consolidation in the 30s projection defined the ways that sync sound technologies could be deployed within the medium Most recently the digitization of cinema repeated this process as technology was reworked to facilitate mobility These examples show how projection continually speaks to the rearrangement of media technology Projection therefore needs to be examined as a pivotal element in the future of visual media's technological transition In Practices of Projection Histories and Technologies volume editors Gabriel Menotti and Virginia Crisp address the cultural and technological significance of projection Throughout the volume chapters reiterate that projection cannot and must not be reduced to its cinematic functions alone Borrowing media theorist Siegfried Zielinski's definition Menotti and Crisp refer to projection as the heterogeneous array of artefacts technical systems and particularly visual praxes of experimentation and of culture From this readers can understand the performative character of the moving image and the labor of the different actors involved in the utterance of the film text Projection is not the same everywhere nor equal all the time Its systems are in permanent interaction with environmental circumstances neighboring structures local cultures and social economies Thus the idea of projection as a universal fully autonomous operation cannot hold Each occurrence of projection adds nuance to a wider understanding of film screening technologies **Visual Sense** Elizabeth Edwards, Kaushik Bhaumik, 2024-11-01 Vision is more than looking or seeing It is integral to all human action Visual Sense presents a series of readings which offer a range of alternatives to conventional psychological and social scientific approaches to the study of the ocular The book highlights the multitude of ways in which vision is linked to the other senses by virtue of being embedded in complex cultural processes Visual Sense introduces students to the analysis of a wide range of ways of experiencing sight across time and across cultures from Renaissance Italy Aztec Mexico and early Christian Europe to Tibet West Africa Aboriginal Australia and South America amongst others It is arranged around broad themes of visual experience ranging from navigating the sacred and ordering knowledge about the world to thinking creatively socially

and beyond vision into cyberspace and daydream This unique approach allows cross cultural and thematic connections to be made A Guide to Further Reading allows students to expand their learning independently and section introductions place the readings in context Visual Sense expands the field of visual studies and explores the place of vision in the sensory world
