The Making of a Profession Adrian Michal McMahon, 1984 **The Oxford Companion to United States History** Paul S. Boyer, 2001-07-04 Here is a volume that is as big and as varied as the nation it portrays With over 1 400 entries written by some 900 historians and other scholars it illuminates not only America s political diplomatic and military history but also social cultural and intellectual trends science technology and medicine the arts and religion Here are the familiar political heroes from George Washington and Benjamin Franklin to Abraham Lincoln Woodrow Wilson and Franklin D Roosevelt But here too are scientists writers radicals sports figures and religious leaders with incisive portraits of such varied individuals as Thomas Edison and Eli Whitney Babe Ruth and Muhammed Ali Black Elk and Crazy Horse Margaret Fuller Emma Goldman and Marian Anderson even Al Capone and Jesse James The Companion illuminates events that have shaped the nation the Great Awakening Bunker Hill Wounded Knee the Vietnam War major Supreme Court decisions Marbury v Madison Roe v Wade landmark legislation the Fugitive Slave Law the Pure Food and Drug Act social movements Suffrage Civil Rights influential books The Jungle Uncle Tom s Cabin ideologies conservatism liberalism Social Darwinism even natural disasters and iconic sites the Chicago Fire the Johnstown Flood Niagara Falls the Lincoln Memorial Here too is the nation s social and cultural history from Films Football and the 4 H Club to Immigration Courtship and Dating Marriage and Divorce and Death and Dying Extensive multi part entries cover such key topics as the Civil War Indian History and Culture Slavery and the Federal Government A new volume for a new century The Oxford Companion to United States History covers everything from Jamestown and the Puritans to the Human Genome Project and the Internet from Columbus to Clinton Written in clear graceful prose for researchers browsers and general readers alike this is the volume that addresses the totality of the American experience its triumphs and heroes as well as its tragedies and darker moments **Constructing a Bridge** Eda Kranakis, 1997 A historical look at styles of technological research and design If it is true as Tocqueville suggested that social and class systems shape technology research and knowledge then the effects should be visible both at the individual level and at the level of technical institutions and local environments That is the central issue addressed in *Constructing a Bridge* a tale of two cultures that investigates how national traditions shape technological communities and their institutions and become embedded in everyday engineering practice Eda Kranakis first examines these issues in the work of two suspension bridge designers of the early nineteenth century the American inventor James Finley and the French engineer Claude Louis Marie Henri Navier Finley who was oriented toward the needs of rural frontier communities designed a bridge that could be easily reproduced and constructed by carpenters and blacksmiths Navier whose professional training and career reflected a tradition of monumental architecture and had linked him closely to the Parisian scientific community designed an elegant costly and technically sophisticated structure to be built in an elite district of Paris Charting the careers of these two technologists and tracing the stories of their bridges Kranakis reveals how local environments can shape design goals

research practices and design to construction processes Kranakis then offers a broader look at the technological communities and institutions of nineteenth century France and America and at their ties to technological practice She shows how conditions that led to Finley s and Navier s distinct designs also fostered different systems of technical education as well as distinct ideologies and traditions of engineering research The result of this two tiered comparative approach is a reorientation of a historiographic tradition initiated by Tocqueville and explored more recently by Eugene Ferguson John Kasson and others toward a finer grained analysis of institutional and local environments as mediators between national traditions and individual styles of technological research and design *Power Struggles* Michael B. Schiffer,2008 Laying the foundation for Thomas Edison the first electric generators were built in the 1830s the earliest commercial lighting systems before 1860 and the first commercial application of generator powered light in the early 1860s This book examines some of these early applications of electricity *Stay Tuned* Christopher H. Sterling,John Michael Kittross,2001-11-01 Since its initial publication in 1978 Stay Tuned has been recognized as the most comprehensive and useful single volume history of American broadcasting and electronic media available This third edition has been thoroughly revised and updated to bring the story of American broadcasting forward to the 21st century affording readers not only the history of the most important and pervasive institution affecting our society but also providing a contextual transition to the Internet and other modern media The enthusiasm of authors Christopher H Sterling and John Michael Kittross is apparent as they lead readers through the development of American electronic mass media from the first electrical communication telegraph and telephone through radio and television to the present convergence of media business entities programming and delivery systems including the Internet Their presentation is engaging as well as informative promoting an interest in history and making the connections between the developments of yesterday and the industry of today Features of this third edition include chronological and topical tables of contents new material reflecting modern research in the field a new chapter describing historical developments from 1988 through to the current day an expanded bibliography including Web site and museum listings an updated and expanded glossary and chronology and extensive statistical data of the development of television and radio stations networks advertising programming audiences and other aspects of broadcasting Designed for use in undergraduate and graduate courses on the history of American mass media broadcasting and electronic media Stay Tuned also fits well into mass communication survey courses as an introduction to electronic media topics As a chronicle of American broadcasting this volume is also engaging reading for anyone interested in old radio early television and the origins and development of American broadcasting [History of Science in United States](#) Marc Rothenberg,2012-10-12 This Encyclopedia examines all aspects of the history of science in the United States with a special emphasis placed on the historiography of science in America It can be used by students general readers scientists or anyone interested in the facts relating to the development of science in the United States Special emphasis is placed in the history of medicine and technology and on the relationship

between science and technology and science and medicine Black Inventors in the Age of Segregation Rayvon Fouché,2005-09-09 This pathbreaking study examines the life and work of three African American inventors Granville Woods Lewis Latimer and Shelby Davidson Describing the struggles of each man to balance racial identity with a desire to be judged solely on the merit of his work Rayvon Fouche provides a nuanced view of African American contributors to technology during a period of rapid industrialization back cover Oliver Heaviside Paul J. Nahin,2002-11-13 Acclaimed biography of the pioneer of modern electrical theory featuring a new preface by author He was a man who often was incapable of conducting himself properly in the most elementary social interactions His only continuing contacts with women were limited to his mother nieces and housekeepers He was a man who knew the power of money and desired it but refused to work for it preferring to live off the sweat of his family and long suffering friends whom he often insulted even as they paid his bills Excerpt from the book This then was Oliver Heaviside a pioneer of modern electrical theory Born into a low social class of Victorian England Heaviside made advances in mathematics by introducing the operational calculus in physics where he formulated the modern day expressions of Maxwell s Laws of electromagnetism and in electrical engineering through his duplex equations With a new preface by the author this acclaimed biography will appeal to historians of technology and science as well as to scientists and engineers who wish to learn more about this remarkable man Reader's Guide to the History of Science Arne Hessenbruch,2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

Technology and Transformation in the American Electric Utility Industry Richard F. Hirsh,2003-11-20 This book illuminates the role of technological stagnation in the decline of the American electric utility industry in the late 1960s and 1970s Unlike other interpreters of the industry s woes Professor Hirsh argues that a long and successful history of managing a conventional technology set the stage for the industry s deterioration After improving steadily for decades the technology that brought unequalled productivity growth to the industry appeared to stall in the late 1960s making it impossible to mitigate the economic and regulatory assaults of the 1970s Unfortunately most managers did not recognize or did not want to believe the severity of the technological problems they faced and they chose to focus instead on issues usually financial or public relations that appeared more manageable Partly as a result of this lack of attention to technological issues the industry found itself in the 1980s challenged by the prospects of deregulation and restructuring
