The Making Of Australia The Age Of Mammals:

The Beginning of the Age of Mammals Kenneth D. Rose, 2006-10-31 In the tradition of G G Simpson's classic work Kenneth D Rose's *The Beginning of the Age of Mammals* analyzes the events that occurred directly before and after the mysterious K T boundary which so quickly thrust mammals from obscurity to planetary dominance Rose surveys the evolution of mammals beginning with their origin from cynodont therapsids in the Mesozoic contemporary with dinosaurs through the early Cenozoic with emphasis on the Paleocene and Eocene adaptive radiations of therian mammals Focusing on the fossil record he presents the anatomical evidence used to interpret behavior and phylogenetic relationships The life's work of one of the most knowledgeable researchers in the field this richly illustrated magisterial book combines sound scientific principles and meticulous research and belongs on the shelf of every paleontologist and mammalogist *The Age of Mammals* Chris Manias, 2023-06-27 When people today hear paleontology they immediately think of dinosaurs But for much of the history of the discipline dramatic demonstrations of the history of life focused on the developmental history of mammals *The Age of Mammals* examines how nineteenth century scholars writers artists and public audiences understood the animals they regarded as being at the summit of life For them mammals were crucial for understanding the formation and possibly the future of the natural world Yet as Chris Manias reveals this combined with more troubling notions that seemingly promising creatures had been swept aside in the struggle for life or that modern biodiversity was impoverished compared to previous eras Why some prehistoric creatures such as the saber toothed cat and ground sloth had become extinct while others seemed to have been the ancestors of familiar animals like elephants and horses was a question loaded with cultural assumptions ambiguity and trepidation How humans related to deep developmental processes and whether the Age of Man was qualitatively different from the Age of Mammals led to reflections on humanity's place within the natural world With this book Manias considers the cultural resonance of mammal paleontology from an international perspective how reconstructions of the deep past of fossil mammals across the world conditioned new understandings of nature and the current environment **The ...
