The Making Of Cities:

Timeless Cities David Mayernik, 2009-03-25 For Italian city builders more than a thousand years ago the urban realm was the great theater where their best aspirations were played out the place where society said the most substantial things about who they were and what they longed for In this masterful blend of art and cultural history architect David Mayernik reveals how the very different cities of Venice Rome Florence Siena and Pienza were all literally designed to be both models of the mind and images of heaven Mayernik takes the reader on a journey into the past in Timeless Cities but he also explains why these city building ideas remain relevant today For those travelling on vacation or appreciating the art and architecture of Italy from home Mayernik helps bring the wonder and beauty of the Renaissance mind a little closer Making Cities Global

A. K. Sandoval-Strausz, Nancy H. Making Cities Work brings together leading writers and scholars on urban America to offer critical perspectives on how to sustain prosperous livable cities in today's fast evolving economy Successful cities provide jobs quality schools safe and clean neighborhoods effective transportation and welcoming spaces for all residents But cities must be managed well if they are to remain attractive places to work relax and raise a family otherwise residents firms and workers will leave and the social and economic advantages of city living will be lost Drawing on cutting edge research in the social sciences the contributors explore optimal ways to manage the modern city and propose solutions to today's most pressing urban problems Topics include the urban economy
