Noted financial writer and economist Mark Skousen has revised and updated this popular work to provide more material on Adam Smith and Karl Marx and expanded coverage of Joseph Stiglitz imperfect markets and behavioral economics. This comprehensive yet accessible introduction to the major economic philosophers of the past 225 years begins with Adam Smith and continues through the present day. The text examines the contributions made by each individual to our understanding of the role of the economist the science of economics and economic theory. To make the work more engaging boxes in each chapter highlight little known and often amusing facts about the economists' personal lives that affected their work. *William Stanley Jevons and the Making of Modern Economics* Harro Maas, 2005-04-04 This book examines William Stanley Jevons's role in revolutionizing nineteenth century economics. **The Structure of Production**

Mark Skousen, 2017-12-12 In 2014 the U.S. government adopted a new quarterly statistic called gross output GO the most significant advance in national income accounting since gross domestic product GDP was developed in the 1940s. The announcement came as a triumph for Mark Skousen who advocated GO nearly 25 years ago as an essential macroeconomic tool and a better way to measure the economy and the business cycle. Now it has become an official statistic issued quarterly by the Bureau of Economic Analysis at the U.S. Department of Commerce. In this new revised edition of *Structure of*

Production Skousen shows why GO is a more accurate and comprehensive measure of the economy because it includes business to business transactions that move the supply chain along to final use GDP measures the value of finished goods and services only and omits B to B activity GO is an attempt to measure spending at all stages of production Using GO Skousen demonstrates that the supply side of the business spending is far more important than consumer spending is more consistent with economic growth theory and a better measure of the business cycle **Mechanical Reasoning** Harro Maas,2001
