The Market-Planned Economy of Yugoslavia Svetozar Pejovich,1966 **The Market-planned Economy of Yugoslavia** Svetozar Pejovich,1966 **The Market-Planned Economy of Yugoslavia** Svetozar Pejović,1966 **The Philosophy and Economics of Market Socialism** N. Scott Arnold,1994-08-18 N Scott Arnold argues that the most defensible version of a market socialist economic system would be unable to realize widely held socialist ideals and values In particular it would be responsible for widespread and systematic exploitation The charge of exploitation which is really a charge of injustice has typically been made against capitalist systems by socialists This book argues that it is market socialism the only remaining viable form of socialism that is systematically exploitative *Economic Developments in Countries of Eastern Europe* United States. Congress. Joint Economic Committee. Subcommittee on Foreign Economic Policy,1970 **Communist Planning versus Rationality** János Mátyás Kovács,2022-04-14 This volume examines concepts of central planning a cornerstone of political economy in Soviet type societies It revolves around the theory of optimal planning which promised a profound modernization of Stalinist style verbal planning Encouraged by cybernetic dreams in the 1950s and supporting the strategic goals of communist leaders in the Cold War optimal planners offered the ruling elites a panacea for the recurrent crises of the planned economy Simultaneously their planning projects conveyed the pride of rational management and scientific superiority over the West The authors trace the rise and fall of the research program in the communist era in eight countries of Eastern Europe including the Soviet Union and China describing why the mission of optimization was doomed to fail and why the failure was nevertheless very slow The theorists of optimal planning contributed to the rehabilitation of mathematical culture in economic research in the communist countries and thus to a neoclassical turn in economics all over the ex communist world However because they have not rejected optimal planning as computopia there is a large space left behind for future generations to experiment with Big Optimal Plans anew based at this time on artificial intelligence and machine learning *Problems of Communism* ,1967 **Employment Policies and Programmes in Central and Eastern Europe** Martin Godfrey,Peter J. Richards,1997 This volume contains country studies on Bulgaria the Czech Republic Hungary Poland Romania Slovakia Slovenia and the Ukraine and examines government responsibilities in relation to employment ways of improving the labor market and the financing of employment services and unemployment benefits *Privatizing Eastern Europe* J.M. Van Brabant,2012-12-06 This volume is meant to be a modest contribution to the ongoing debate about the transitions away from the administrative planning environment typical of the former communist regimes The central subject matter is a fairly special one namely the privatization of these economies together with the restoration and effective monitoring of property rights These are paramount tasks of the ongoing transformations once progress toward political democracy is secured Though I would not allot divestment of existing state owned assets the kind of pivotal importance that some observers reserve for it changing rules on the utilization of these assets is evidently at the

core of what the transition toward market based economic systems should be all about Rather than examining the entire range of issues that surround the controversy on privatization this volume is primarily concerned with the economics of taking the state out of the decision making about existing assets Among the several aspects of this discussion three stand out One is the establishment of clear property rights This is fundamental to minimize trans action costs in an environment where decisions will increasingly be taken by independent economic agents acting on their own account Second I look only incidentally at the various angles of creating capital markets particularly for existing assets in these economies
