The Making of a Navy SEAL Brandon Webb, 2025-08-22 BEFORE HE COULD FORGE A BAND OF ELITE WARRIORS HE HAD TO BECOME ONE HIMSELF Brandon Webb s experiences in the world s most elite sniper corps are the stuff of legend From his grueling years of training in Naval Special Operations to his combat tours in the Persian Gulf and Afghanistan *The Making of a Navy SEAL* provides a rare and riveting look at the inner workings of the U S military through the eyes of a covert operations specialist Yet it is Webb s distinguished second career as a lead instructor for the shadowy sniper cell and Course Manager of the Navy SEAL Sniper Program that trained some of

America's finest and deadliest warriors including Marcus Luttrell and Chris Kyle that makes his story so compelling. Luttrell credits Webb's training with his own survival during the ill-fated 2005 Operation Redwing in Afghanistan. Kyle went on to become the U.S. military's top marksman with more than 150 confirmed kills. From a candid chronicle of his student days going through the sniper course himself to his hair-raising close calls with Taliban and al Qaeda forces in the northern Afghanistan wilderness to his vivid account of designing new sniper standards and training some of the most accomplished snipers of the twenty-first century, Webb provides a rare look at the making of the Special Operations warriors who are at the forefront of today's military. Explosive, revealing, and intelligent, *The Making of a Navy SEAL* provides a uniquely personal glimpse into one of the most challenging and secretive military training courses in the world. *Legitimate Targets?* Janina Dill, 2014-11-13 Based on an innovative theory of international law, Janina Dill's book investigates the effectiveness of international humanitarian law (IHL) in regulating the conduct of warfare. Through a comprehensive examination of the IHL defining a legitimate target of attack, Dill reveals a controversy among legal and military professionals about the logic according to which belligerents ought to balance humanitarian and military imperatives: the logics of sufficiency or efficiency. Law prescribes the former, but increased recourse to international law in U.S. air warfare has led to targeting in accordance with the logic of efficiency. The logic of sufficiency is morally less problematic, yet neither logic satisfies contemporary expectations of effective IHL or legitimate warfare. Those expectations demand that hostilities follow a logic of liability, which proves impracticable. This book proposes changes to international law but concludes that, according to widely shared normative beliefs on the twenty-first century battlefield, there are no truly legitimate targets.
