Skilled Workers Solidarity:

Skilled Workers' Solidarity Antoine Joseph, 2013-08-21 A comparative historical analysis of capitalist democracy focusing on development in the United States and offering comparisons with other Western nations Forging Political Identity Keith Mann, 2010-04-01 Escaping the traditional focus on Paris the author examines the divergent political identities of two occupational groups in Lyon metal and silk workers who despite having lived and worked in the same city developed different patterns of political practices and bore distinct political identities This book also examines in detail the way that gender relations influenced industrial change skill and political identity Combining empirical data collected in French archives with social science theory and methods this study argues that political identities were shaped by the intersection of the prevailing political climate with the social relations surrounding work in specific industrial settings Organizing Workers in the Shadow of Slavery Rudi Batzell, 2025-04-23 An original analysis of the relationship between slavery and the labor movement in the late nineteenth and early twentieth centuries During the rise of the labor movement in the late nineteenth century why were American workers unable to organize inclusive trade unions like those formed by their counterparts in the United Kingdom Comparing American and British capitalism in the port cities of Baltimore and Liverpool and the steel cities of Pittsburgh and Sheffield Rudi Batzell reveals that the answer lies in the legacies of slavery and entrenched structures of racial inequality Strikebreaking succeeded more often in the United States because landless Black Americans were out of economic desperation more likely to become scabs and fracture the class solidarity of any union movement Batzell shows in short how racism was and is deeply connected to class migration and capitalism in a global economy marked by slavery and empire In emphasizing the geography of economic inequality this book offers new clarity on the late nineteenth century successes and failures of working class formation More broadly Organizing Workers in the Shadow of Slavery makes it clear that the pursuit of justice today will require sustained economic reparations for slavery and colonialism **Social Democracy in the 21st Century** Nik Brandal, Øivind Bratberg, Dag Einar Thorsen, 2021-01-29 Social democracy is in a process of change as a number of developments challenge its organizational ideational and electoral basis This book elaborates on how social democracy should be understood under these changing circumstances how social democratic parties have responded and what future trajectories await *In Gold We Trust* Dario Gaggio, 2018-06-05 *In Gold We Trust* is a historical and sociological account of how by the late 1960s three small Italian towns had come to lead the world in the production of gold jewelry even though they had virtually no jewelry industry less than a century before and even though Italy had western Europe's most restrictive gold laws It is a distinctive but paradigmatic story of how northern Italy performed its post World War II economic miracle by creating localized but globally connected informal economies in which smuggling tax evasion and the violation of labor standards coexisted with ongoing deliberation over institutional change and the benefits of political participation The Italian gold jewelry industry thrived Dario Gaggio argues because the

citizens of these towns Valenza Po in Piedmont Vicenza in the Veneto and Arezzo in Tuscany uneasily mixed familial affection political loyalties and the instrumental calculation of the market blurring the distinction between private interests and public good But through a comparison with the jewelry district of Providence Rhode Island Gaggio also shows that these Italian towns weren't unique in the ways they navigated the challenges posed by the embeddedness of economic action in the fabric of social life By drawing from a variety of disciplinary backgrounds ranging from economic sociology to political theory Gaggio recasts the meanings of trust embeddedness and social capital and challenges simple dichotomies between northern and southern Italy

Technology, Industrial Conflict and the Development of Technical Education in 19th-Century England Bernard P. Cronin, 2024-11-01

This title was first published in 2001 Nineteenth century employers played a crucial role in the training and education of young workers in England This multi disciplinary study traces the connection between problems of technical education development and the increasingly antagonistic relations with skilled workers culminating in the Great Strike and Lockout of 1897 Cronin demonstrates that employers dominated by economic short termism extended their hegemony beyond the boundaries of the factory gates Their reluctance to endorse and sponsor technical education radically influenced the perception of technical education held by government and local authorities

Rethinking Labour-Management Relations Christopher J. Bruce, Jo Carby-Hall, 2021-03-04 First published in 1991 *Rethinking Labour Management Relations* explores how the contemporary system of industrial relations developed and outlines proposals for a better alternative The book examines the positives and negatives of three systems of industrial relations a freely operating market for labour where workers bargain individually with employers a strike based system of collective bargaining and a compulsory arbitration system It discusses how the strike replaced

individual bargaining highlighting the deficiencies in these respective systems and presenting arbitration as the more efficient and effective way of settling disputes In doing so the book emphasises the role of the parties involved in finding solutions and considers how government intervention could be kept to a minimum Exploring a wealth of literature relating to compulsory arbitration systems around the world and formulating a set of criteria for establishing the best possible form of arbitration Rethinking Labour Management Relations will appeal to those with an interest in the history of trade union theory public policy and labour law

The Social Foundations of Industrial Power Marc Maurice, François Sellier, Jean-Jacques Silvestre, 1986 Social research comparison inherent differences in educational system occupational structure wage structure and labour relations in France and Germany Federal Republic refuting economic theories that societies develop similar industrial structures as they modernise contrasts training systems occupational qualifications and labour mobility of manual workers and nonmanual workers examines work organization career patterns skills management wage determination workers representation trade unions labour disputes References statistical tables

Transnational Labour History Marcel van der Linden, 2017-07-05 There has been a growing recognition amongst scholars that labour historians need to look beyond national borders in order to place the history of the working classes into a much broader context than has hitherto been the case Whilst studies focused on individual countries are essential it is only by comparing and contrasting the experiences across time and space that a true understanding of the subject can be attempted Professor Marcel van der Linden has contributed much to the debate on cross border processes and comparisons This volume makes available in English a collection of twelve of his most important essays on the theme of transnational labour history Previously published in a range of journals and volumes with two original contributions Transnational Labour History brings them together in a single convenient collection together with a new introduction This work will undoubtedly provide an invaluable resource for all students of European labour history

The Ashgate Companion to the History of Textile Workers, 1650-2000 Dr Elise van Nederveen Meerkerk, Mr Els Hiemstra-Kuperus, Prof Dr Lex Heerma van Voss, 2013-06-28 This impressive collection offers the first systematic global and comparative history of textile workers over the course of 350 years This period covers the major changes in wool and cotton production and the global picture from pre industrial times through to the twentieth century After an introduction the first part of the book is divided into twenty national studies on textile production over the period 1650 2000 To make them useful tools for international comparisons each national overview is based on a consistent framework that defines the topics and issues to be treated in each chapter The countries described have been selected to include the major historic producers of woollen and cotton fabrics and the diversity of global experience and include not only European nations but also Argentina Brazil China Egypt India Japan Mexico Turkey Uruguay and the USA The second part of the book consists of ten comparative papers on topics including globalization and trade organization of production space identity workplace institutions production relations gender ethnicity and the textile firm These are based on the

national overviews and additional literature and will help apply current interdisciplinary and cultural concerns to a subject traditionally viewed largely through a social and economic history lens Whilst offering a unique reference source for anyone interested in the history of a particular country's textile industry the true strength of this project lies in its capacity of international comparison By providing global comparative studies of key textile industries and workers both geographically and thematically this book provides a comprehensive and contemporary analysis of a major element of the world's economy This allows historians to challenge many of the received ideas about globalization for instance highlighting how global competition for lower production costs is by no means a uniquely modern issue and has been a feature of textile production for much of the last 350 years As such this collection will be welcomed by all scholars engaged in the history of the textile industry and international trade

Zuege, 2003-11-30 Value and the World Economy Today brings together a diverse group of globally renowned scholars of international political economy and critical economics to examine the relevance of value theory for understanding the world economy today The book is unique in the way that it connects literatures that have for the most part developed in isolation from each other and therefore brings questions of theory to bear directly upon the problems of analyzing current global trends and formulating responses to them *Giant in the Sun* James Ohwofasa

Akpeninor, 2012-08-28 A new vocabulary is increasingly gaining prominence in Nigeria's political lexicon It is the nine letter word REVOLUTION Hardly can any political event hold in the country today without the word revolution sneaking into direct discourse Expectedly discussants always disagree on this vexatious political jargon that while some segments of outlook would fall for it and actually want it bloody others prefer a moderated approach just as others caution against it in entirety whether bloody or mild The reality is that one does not need a soothsayer or contemporary political psychotherapist to recognize that God indeed has blessed Nigeria to be a great nation with almost everything on earth What then could be the malady militating against the structured development of this Great Nation with Great People Under a sane ambiance the membership of Nigeria in some major International organizations like the premier United Nations UN and her organs The World Bank International Monetary Fund IMF et cetera The ECOWAS sub region the Africa Union and the Commonwealth of nations to mention but a few is that Nigeria is very well positioned to be a primus inter pares in world affairs Unfortunately the state of affairs has not pointed in this direction Domestically the country is stagnate decayed and trapped in corruption and at present utterly different from the Nigeria we used to know as productive thriving nation with robust infrastructure that was well organized with a vibrant economy The Giant of Africa that a short while ago celebrated her fiftieth year independence as a matter of fact is a society now completely the reverse of the one symbolized by former patriotic heroes and nationalist leaders the likes of the Great Zik of Africa of blessed memory with his compatriots who deftly wrestled independence from British colonialism *Giant in the Sun* Echoes of Looming Revolution evokes the m l e of a people as portrayed by a multitalented Author encapsulating his qualms for a Great Country that may never be as Revolution looms in Nigeria Do not touch her Please do not ruin her Nigeria our beloved country **The Politics of the Precariat: From**

Populism to Lulista Hegemony Ruy Braga, 2018-06-26 Making use of the theoretical tools of Marxist critical sociology Ruy Braga proposes an innovative reading of the social history of Brazil from Fordist populism to the Lulista hegemony using the politics of the precariat as an analytical vector Braga's analysis seeks to explain both economic and structural processes peripheral Fordism its crisis the transition to financialised post Fordism and the subjective dimension of the proletariat

How Institutions Evolve Kathleen Thelen, 2004-09-06 The institutional arrangements governing skill formation are widely seen as a key element in the institutional constellations defining varieties of capitalism across the developed democracies This book explores the origins and evolution of such institutions in four countries Germany Britain the United States and Japan It traces cross national differences in contemporary training regimes back to the nineteenth century and specifically to the character of the political settlement achieved among employers in skill intensive industries artisans and early trade unions The book also tracks evolution and change in training institutions over a century of development uncovering important continuities through putative break points in history Crucially it also provides insights into modes of institutional change that are incremental but cumulatively transformative The study underscores the limits of the most prominent approaches to institutional change and identifies the political processes through which the form and functions of institutions can be radically reconfigured over time
