history from the early silent era to the new century The alternative aesthetics are closely linked to the indigenous Chinese ontology of cinema namely shadowplay yingxi The author presents an alternative account through a close examination of four distinct visual narrative and stylistic devices or themes that recur in different periods of Chinese film history the dream representation the doubling of characters the device of self reflexivity and the allegorical construction of space By considering specific films and scenes as problematic sites where history politics and aesthetics collide this book also seeks to elucidate the relationship between cinema and the multifaceted experiences of Chinese modernity with respect to subjectivity ideology identity and nationality This book will be of interest to scholars and students of Chinese cinemas realism and modernism Hysterical!
