Slaughter In Singapore:

Muslims in Singapore Kamaludeen Mohamed Nasir,Alexius Pereira,Bryan S. Turner,2009-09-10 This book examines Muslims in Singapore analysing their habits practices and dispositions towards everyday life and also their role within the broader framework of the secularist Singapore state and the cultural dominance of its Chinese elite who are predominantly Buddhist and Christian Singapore has a highly unusual approach to issues of religious diversity and multiculturalism adopting a policy of deliberately managing religions including Islam in an attempt to achieve orderly and harmonious relations between different racial and religious groups This has encompassed implicit and explicit policies of containment and enclavement of Muslims and also the more positive policy of upgrading Muslims through paternalist strategies of education training and improvement including the modernisation of madrassah education in both content and orientation This book examines how this system has operated in practice and evaluates its successes and failures In particular it explores the attitudes and reactions of Muslims themselves across all spheres of everyday life including dining and maintaining halal vigilance education and dress code and practices of courtship sex and marriage It also considers the impact of wider international developments including 9 11 fear of terrorism and the associated stigmatization of Muslims and developments within Southeast Asia such as the Jemaah Islamiah terrorist attacks and the Islamization of Malaysia and Indonesia This study has more general implications for political strategies and public policies in multicultural societies that are deeply divided along ethno religious lines

The Evolution of Strategic Foresight Tuomo Kuosa,2016-03-16 Embracing the theory and practice of strategic foresight and illuminating how different schools of thought regard its role in policy making Tuomo Kuosa describes how something not traditionally considered an independent discipline is steadily becoming one In The Evolution of Strategic Foresight he explains how the practice of strategic foresight has long been closely associated with the military and politics Linking strategic thinking more broadly to futurology however it is quite new Since strategic foresight refers to the practice of generating analyses of alternative futures and strategies based on available intelligence and foreknowledge the practice can and should be applied to companies business sectors national and trans national agencies of all descriptions and to all aspects of public policy making The author explains its practice in terms of structure process and knowledge domains and examines its methodologies and systems along with how strategic foresight can be used to produce better knowledge and be more effectively linked to policy making Using examples from 30 different countries and with access to interviews and workshops involving key experts The Evolution of Strategic Foresight will be valuable to scholars educators students engaged in strategy and future studies long range public policy and urban planners analysts risk assessment experts and consultants managers and decision makers in many organisations public and private World Poultry Situation ,1991 AgExporter

L. E,2022-11-30 E explores using textual words and visual image data from the corporate newsletters of two prominent Asian universities how particular discourses and their associated discursive representations of neoliberal logic and subjectivity occur in higher education In particular she looks at the expression of both institutional priorities and state imperatives that lend themselves to a complementarity built upon two contradictory perspectives individualism and communitarianism She argues that the ever increasing demand for and utility of higher education in neoliberal society means that it no longer functions merely to provide knowledge and skills but has implications for society the individual and the state with regard to their ways of thinking doing and being Contributing to a growing corpus of literature on how higher education around the world is being shaped by neoliberal policies E s research is based on work done in the city state of Singapore a less well represented context in current literature While both higher education institutions possess significantly different institutional identities and backgrounds the alignment of their varied representations of neoliberal logic and subjectivity with state sanctioned imperatives that indirectly impose demands and constraints shows how neoliberalism as ideology adapts to the socio political socio cultural and socio economic dimensions that make up the Singapore context The discursive representations of context dependent neoliberal logics and subjectivity are discussed in terms of their ideological implications focusing primarily on the complementarity between seemingly contradictory ideological positions E s work uses an innovative framework that integrates aspects of Discourse Theory with Critical Discourse Analysis and demonstrates the use of this framework through empirical linguistic and image analysis Appealing to academics and graduate students in

humans and create preparedness strategies while in others public health officials worked toward preventing pandemics by killing thousands of birds In *Avian Reservoirs* Frédéric Keck offers a comparative analysis of these responses tracing how the anticipation of bird flu pandemics has changed relations between birds and humans in China Drawing on anthropological theory and ethnographic fieldwork Keck demonstrates that varied strategies dealing with the threat of pandemics stockpiling vaccines and samples in Taiwan simulating pandemics in Singapore and monitoring viruses and disease vectors in Hong Kong reflect local geopolitical relations to mainland China In outlining how interactions among pathogens birds and humans shape the way people imagine future pandemics Keck illuminates how interspecies relations are crucial for protecting against such threats
