Leyes, William A. Fleming, 1999 This landmark joint publication between the National Air and Space Museum and the American Institute of Aeronautics and Astronautics chronicles the evolution of the small gas turbine engine through its comprehensive study of a major aerospace industry Drawing on in depth interviews with pioneers current project engineers and company managers engineering papers published by the manufacturers and the tremendous document and artifact collections at the National Air and Space Museum the book captures and memorializes small engine development from its earliest stage Leyes and Fleming leap back nearly 50 years for a first look at small gas turbine engine development and the seven major corporations that

dared to produce market and distribute the products that contributed to major improvements and uses of a wide spectrum of aircraft. In non technical language the book illustrates the broad reaching influence of small turbines from commercial and executive aircraft to helicopters and missiles deployed in recent military engagements. Detailed corporate histories and photographs paint a clear historical picture of turbine development up to the present. See for yourself why *The History of North American Small Gas Turbine Aircraft Engines* is the most definitive reference book in its field. The publication of *The History of North American Small Gas Turbine Aircraft Engines* represents an important milestone for the National Air and Space Museum, NASM and the American Institute of Aeronautics and Astronautics, AIAA. For the first time there is an authoritative study of small gas turbine engines, arguably one of the most significant spheres of aeronautical technology in the second half of the 20th century.

Interagency Assessment of Oxygenated Fuels John H. Gibbons, 1999-10. Presents a current understanding of critical scientific issues related to the winter oxygenated gasoline program. This program mandated under the Clean Air Act Amendments of 1990 is implemented in areas that fail to meet the National Ambient Air Quality standard for carbon monoxide. The assessment was done in response to a request from the EPA for a comprehensive interagency review of this program for potential health impacts, fuel economy and performance issues as well as its benefits. It provides an authoritative evaluation of existing information. Charts and tables.
