CHESTER, 2008-07-16 Over the past few years devastating tsunamis off the coast of the Indian Ocean have killed hundreds of thousands of people Even more alarmingly scientists predict that these tsunamis as well as a series of earthquakes and volcanic eruptions may eventually threaten Hawaii California and Oregon The cause of this trinity of natural disasters is plate tectonics Perhaps the greatest advance made in the field of earth science the plate tectonics theory argues that the surface of the Earth is broken into large plates which change in size and position over time The edges of these plates rub against each other causing earthquakes volcanoes and tsunamis that continue to inflict such intense destruction to the surface of our planet In *Furnace of Creation Cradle of Destruction* renowned scientist Roy Chester reveals the fascinating history of this discovery and tells the enigmatic story of one of the great mysteries of our time how the surface of our planet was created and how it has evolved From the early discoveries of Sir Francis Bacon to the beginnings of geology and the controversy surrounding the theory of continental drift this impeccably researched book reveals the evolution of a vital scientific theory Lucid and compelling this book offers a long awaited explanation of the underlying forces that shape our world **Canadian Slavonic**

**Papers**, 1974 *Abolishing Death* Irene Masing-Delic, 1992-11-01 The idea of abolishing death was one of the most influential myth-making concepts expressed in Russian literature from 1900 to 1930 especially in the works of writers who attributed a life modeling function to art To them art was to create a life so aesthetically organized and perfect that

immortality would be an inevitable consequence This idea was mirrored in the thought of some who believed that the political revolution of 1917 would bring about a revolution in basic existential facts specifically the belief that communism and the accompanying advance of science would ultimately be able to bestow physical immortality and to resurrect the dead According to one variant for example the dead were to be resurrected by extrapolation from the traces of their labor left in the material world The author finds the seeds of this extraordinary concept in the erosion of traditional religion in late nineteenth century Russia Influenced by the new power of scientific inquiry humankind appropriated various divine attributes one after the other including omnipotence and omniscience but eventually even aiming toward the realization of individual physical immortality and thus aspiring to equality with God Writers as different as the decadent Fyodor Sologub the political Maxim Gorky and the gothic Nikolai Ogniov created works for making mortals into gods transforming the raw materials of current reality into legend The book first outlines the ideological context of the immortalization project notably the impact of the philosophers Fyodorov and Solovyov The remainder of the book consists of close readings of texts by Sologub Gorky Blok Ogniov and Zabolotsky Taken together the works yield the salvation program that tells people how to abolish death and live forever in an eternal self created cosmos gods of a legend that was made possible by creative artists imaginative scientists and inspired laborers *Books in Print* ,1981 **Arts & Humanities Citation Index** ,1980 A multidisciplinary index covering the journal literature of the arts and humanities It fully covers 1 144 of the world s leading arts and humanities journals and it indexes individually selected relevant items from over 6 800 major science and social science journals The Australian Journal ,1867 BattleTech Legends: The Hunters Thomas S.
