Tobacco in Global Perspective, 1780-1960 Alexander van Wickeren, Jean Stubbs, William Gervase Clarence-Smith, 2024-12-24 This edited collection provides an in depth analysis of the imperial colonial and postcolonial history of tobacco from 1780 to 1960 which was one of the major periods of change in the global tobacco economy It brings together case studies from known and lesser known tobacco regions of the world to interrogate tobacco s second globalisation a concept little employed by historians thus far but one which encapsulates tobacco s central role in Europe s imperial expansion beyond the Atlantic and the social political and cultural transformations of global capitalism taking place during the period The collection fills a gap in the study of commodities of empire which has examined tobacco primarily for the early modern Atlantic world or for single empires during the later period It invites comparison across borders encompassing political economic and sociocultural history and with a particular emphasis on trade knowledge and labour juxtaposes micro histories with a macro historical perspective Together the studies in the volume testify to the importance of tobacco in new places and among new players challenging the confines of national and imperial historiographical frameworks They demonstrate the rising dominance of new powerful forces including transnational corporations but also a wide range of actors in conflict and negotiation within territorial and imperial confines By systematically taking into account the agency in Europe s apparent peripheries and the Global South they critique a simple assumption of the dominance of the West Chapter 11 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Marshall, 2016-07-25 Public Opinion Public Policy and Smoking tracks Americans changing attitudes about cigarette smoking over the last century With data from more than five thousand public and privately conducted polls this book carefully examines how Americans came to understand the health risks of smoking how the tobacco industry sought to reframe smoking and how public opinion support for tobacco control affected lawsuits elections and public policies This book tests several well known linkage models that connect public opinion with public policy It shows that conventional wisdom about public opinion and tobacco control policy is often mistaken This book offers the first in depth look at American public opinion and cigarette smoking during the last century The Smoke of the Gods Eric Burns, 2007 From the author of *The Spirits of America* an energetic history of tobacco use **Cash Crop to Cash Cow: The History of Tobacco and Smoking in America** Mary Meinking, 2014-10-21 There s no doubt about it Tobacco has played an important role in the history of the United States It supported early colonies and helped create a nation Reading Smell in Eighteenth-Century Fiction Emily C. Friedman, 2016-06-27 Scent is both an essential and seemingly impossible to recover aspect of material culture Scent is one of our strongest ties to memory yet to remember a smell without external stimuli is almost impossible for most people Moreover human beings specifically Western humans ability to smell has been diminished through a process of increased emphasis on odor removal hygienic practices that emphasize de odorization rather than the covering of one odor by another While other intangibles of the human experience have been placed into the context of the eighteenth century novel scent has so far remained largely sidelined in favor of discussions of the visual the aural touch and taste The past decade has seen a great expansion of our understanding of how smell works physiologically psychologically and culturally and there is no better moment than now to attempt to recover the traces of olfactory perceptions descriptions and assumptions Reading Smell provides models for how to incorporate olfactory knowledge into new readings of the literary form central to our understanding of the eighteenth century and modernity in general the novel The multiplication and development of the novel overlaps strikingly with changes in personal and private hygienic practices that would alter the culture s relationship to smell This book examines how far the novel can be understood through a reintroduction of olfactory

information After decades of reading for all kinds of racial cultural gendered and other sorts of absences back into the novel this book takes one step further to consider how the recovery of forgotten or overlooked olfactory assumptions might reshape our understanding of these texts Reading Smell includes wide scale research and focused case studies of some of the most striking or prevalent uses of olfactory language in eighteenth century British prose fiction Highlighting scents with shifting meanings across the period bodies tobacco smelling bottles and sulfur Reading Smell not only provides new insights into canonical works by authors like Swift Smollett Richardson Burney Austen and Lewis but also sheds new light on the history of the British novel as a whole

All or Nothing Jessica Warner, 2010-01-26 A completely original exploration of the abstinence movement in America from alcohol to sex to meat America's long love affair with abstinence goes back to the early nineteenth century when thousands of men and women suddenly stopped drinking hard liquor Consistency then demanded that they give up all their other vices beer and cider tobacco coffee meat pickles pies masturbation and more Two centuries later the ideal of abstinence has lost none of its power to influence how Americans live and how they want you to live With her trademark wit and irony acclaimed author Jessica Warner tells the story of one of America's most enduring and powerful ideals There are many surprises along the way starting with the abolitionists feminists and other do gooders who were the first and most thoroughgoing of America's abstainers And always there are the colourful people who brought the idea to life the visionaries preachers college professors feminists and cranks who practiced what they preached
