Time and the French Revolution Matthew Shaw,2011 A history of the innovation and effects of the French Republican Calendar The French Republican Calendar was perhaps the boldest of all the reforms undertaken in Revolutionary France Introduced in 1793 and used until 1806 the Calendar not only reformed the weeks and months of the year but decimalised the hours of the day and dated the year from the beginning of the French Republic This book not only provides a history of the calendar but places it in the context of eighteenth century time consciousness arguing that the French were adept at working within several systems of time keeping whether that of the Church civil society or the rhythms of the seasons Developments in time keeping technology and changes in working patterns challenged early modern temporalities and the new calendar can also be viewed as a step on the path toward a more modern conception of time In this context the creation of the calendar is viewed not just as an aspect of the broader republican programme of social political and cultural reform but as a reflection of a broader interest in time and the culmination of several generations concern with how society should be policed Matthew Shaw is a curator at the British Library London

Cox, 2000-09-30 The importance of records in modern society is explored by re-examining some of the historical antecedents for critical functions in the modern records professions The motivation for writing this book comes from a conviction of the importance of records and records professionals in organizations and society as well as the need to possess a stronger sense of the events trends people debates and controversies producing the modern records professions Archivists and records managers have tended to discount the importance of their historical antecedents ignoring the fact that many of the current debates and issues before the profession are not new but embedded in the historical evolution of the records professions Re-examining some of the historical origins helps records professionals to re-examine their mission to manage records for the benefit of organizations and of all of society Such re-evaluation also helps to remind records professionals and others that the concerns generated by new electronic recordkeeping technologies are not new at all but built deep within the fabric of traditional records creation and administration **Time, Domesticity and Print Culture in Nineteenth-Century Britain**

Chronometres Krista Lysack, 2019-09-20 What does it mean to feel time to sense its passing along the sinews and nerves of the body as much as the synapses of the mind And how do books as material arrangements of print and paper mediate such temporal experiences Chronometres Devotional Literature Duration and Victorian Reading Culture is a study of the time inflected reading practices of religious literature the single largest market for print in Victorian Britain It examines poetic cycles by John Keble Alfred Tennyson Christina Rossetti and Frances Ridley Havergal family prayer manuals Sunday reading books and periodicals and devotional gift books and daily textbooks Designed for diurnal and weekly reading chronometrical literature tuned its readers attentions to the idea of eternity and the everlasting peace of spiritual transcendence but only in so far as it parcelled out reading into discrete increments that resembled the new industrial time scales of factories and railway schedules Chronometres thus takes up print culture affect theory and the religious turn in literary studies in order to explore the intersections between devotional practice and the condition of modernity It argues that what defines Victorian devotional literature is the experience of its time signatures those structures of feeling associated with its reading durations For many Victorians reading devotionally increasingly meant reading in regular portions and often according to the calendar and work day in contrast to the liturgical year Keeping pace with the temporal measures of modernity devotion became a routinized practice a way of synchronizing the interior life of spirit with the exigencies of clock time Chronometres considers how the deliverances afforded through time scaled reading are persistently materialised in the body both that of the book and of the reader Recognizing that literature and devotion are not timeless abstractions it asks how the materiality of books conceived as horological relationships through reading might bring about the felt experience of time Even as Victorian devotion invites us to tarry over the page it also prompts the question what if it is eternity that keeps time with the clock

Feeling Time Amit S. Yahav, 2018-05-08 Literary historians have tended to associate the eighteenth century with the rise of the tyranny of the clock the notion of time as ruled by mechanical chronometry The transition to standardized scheduling and time discipline the often told story goes inevitably results in modernity's time keeper societies and the characterization of modern experience as qualitatively diminished In *Feeling Time* Amit Yahav challenges this narrative of the triumph of chronometry and the consequent impoverishment of individual experience She explores the fascination eighteenth century writers had with the mental and affective processes through which human beings come not only to know that time has passed but also to feel the durations they inhabit Yahav begins by elucidating discussions by Locke and Hume that examine how humans come to know time noting how these philosophers often consider not only knowledge but also experience She then turns to novels by

Richardson Sterne and Radcliffe attending to the material dimensions of literary language to show how novelists shape the temporal experience of readers through their formal choices Along the way she considers a wide range of eighteenth century aesthetic and moral treatises finding that these identify the subjective experience of duration as the crux of pleasure and judgment described more as patterned durational activity than as static state Feeling Time highlights the temporal underpinnings of the eighteenth century s culture of sensibility arguing that novelists have often drawn on the logic of musical composition to make their writing an especially effective tool for exploring time and for shaping durational experience

Defoe's Major Fiction Elizabeth R. Napier,2016-01-28 This book focuses on the pervasive concern with narrativity and self construction that marks Defoe s first person fictional narratives Defoe s fictions focus obsessively and elaborately on the act of storytelling not only in his creation of idiosyncratic voices preoccupied with the telling and often the concealing of their own life stories but also in his narrators repeated aversion to other untold stories that compete for attention with their own Defoe s narratives raise profound questions about selfhood and agency as well as demonstrate competing attitudes about narration in his fictive worlds His canon exhibits a broad range of first person fictional accounts from pseudo memoir A Journal of the Plague Year Memoirs of a Cavalier to criminal autobiography Moll Flanders to confession Roxana and the narrators of these accounts secretive compulsive fractive exhibit an array of resistances to the telling of their life stories Such experiments with narration evince Defoe s deep involvement in projects of self description and delineation as he interrogates the boundaries of the self and dramatizes the arduousness of self accounting Defoe s fictions are emphatically consciousness centered and the significance of such a focus to the development of the novel is patently as great as is his realistic style Defoe s narrative project in fact challenges current views on the moment at which inwardness and interiority begin as Luk cs argued to comprise the subject matter of the novel implicitly attributing to identity and consciousness a place of signal and complex importance in the new genre
