contribuir en la formación de psicólogos en esta área tan importante e indispensable como es la evaluación psicológica ya que independientemente de cuál sea el área laboral en la que se desenvuelva el psicólogo tanto el clínico el educativo el organizacional el de la salud entre otros siempre se podrá realizar una mejor intervención en la medida en que se haya llevado a cabo una atinada y correcta evaluación. En esta obra se describen los aspectos históricos más relevantes que ayudaron al establecimiento y fortalecimiento de la evaluación psicológica como la conocemos hoy en día desde la Antigüedad pasando por científicos como Weber Fechner Wundt Darwin Galton Cattell hasta nuestros días con la primera prueba psicométrica elaborada por Binet y los acontecimientos más relevantes de la época actual. Se desglosan también algunos conceptos fundamentales para entender el proceso de evaluación tales como medicina pruebas psicológicas psicodiagnóstico y evaluación psicológica. Para poder interpretar pruebas psicométricas es fundamental conocer la teoría psicométrica de donde surge cuál es el modelo teórico en que se sustenta las garantías científicas de confiabilidad y validez que poseen las pruebas y sobre todo los tipos de puntuaciones que dichas pruebas proporcionan ya que en función de estas y su comprensión es como el psicólogo va a poder interpretar los resultados obtenidos por las personas evaluadas a la luz de la teoría en la que la prueba descansa se explican los modelos matemáticos que subyacen a las puntuaciones estándares normalizadas los deciles los eneatipos las puntuaciones T los percentiles y las edades escalares. Se anexa también en esta obra una revisión de las normas ticas a tomar en consideración cuando se realiza una evaluación psicológica así como la forma de integrar la información obtenida en dicho proceso para elaborar el reporte de evaluación correspondiente. Finalmente el lector encontrar algunas sugerencias y recomendaciones para seleccionar una batería de evaluación psicológica de acuerdo a diferentes tipos de problemas psicológicos planteados utilizando pruebas que en la actualidad se pueden encontrar en nuestro país.

Psychological Interventions from Six Continents Barbara L. Mercer, Heather Macdonald, Caroline Purves, 2022-07-01 This book presents psychological assessment and intervention in a cultural and relational context. A diverse range of contributors representing six continents and eleven countries write about their therapeutic interventions all of which break the traditional assessor as expert oriented framework and offer a creative adaptation in service delivery. A Collaborative Therapeutic Assessment model including work with immigrant communities and Indigenous modalities underscore individual and collective case illustrations highlighting equality in the roles of the provider and the receiver of services. The universality and uniqueness of culture are explored as a construct and through case material. Some chapters describe a partnership with a Eurocentric scientific model while others adopt a purely community method preserved with Indigenous language and subjective methodology. This volume brings together diverse therapeutic collaborative ideas and recognizes relational community and cultural psychologies as integral to mainstream assessment and intervention literature. This book is essential for psychologists and clinicians internationally and graduate students.

Nuevos temas en evaluación psicológica Renata Frank de Verthelyi, Vera Campo, 1999 **Manual para la evaluación clínica de los trastornos psicológicos** Vicente E. Caballo

Manrique,2014-09-18 La evaluación de los problemas psicológicos es un requisito básico para su tratamiento y no hay posibilidad de intervención con éxito si esta no ha sido la adecuada. Aunque en los últimos tiempos se ha insistido en la eficacia de las técnicas de intervención psicológica es posible que esté llegando la hora de prestar más atención al tema de la evaluación clínica. La obra que tiene el lector en sus manos pone al día la evaluación clínica de una serie de trastornos psicológicos insistiendo en los aspectos prácticos de la misma. El contenido se ha estructurado en tres partes. En la parte primera se abordan muchos de los trastornos psicológicos de la edad adulta incluidos en el DSM IV TR excepto los trastornos de ansiedad que se tratan en la obra Manual para la evaluación clínica de los trastornos psicológicos. Estrategias de evaluación de problemas infantiles y trastornos de ansiedad publicada en esta misma editorial. En la parte segunda se plantea la evaluación de otros problemas psicológicos que no se encuentran recogidos en el anterior sistema de clasificación tales como problemas de habilidades sociales, agresividad, etc. En la parte tercera se explica la elaboración de los informes psicológicos algo de gran importancia para muchos psicólogos dedicados a la psicología clínica y/o a la psicología forense. El libro va acompañado de un CD Rom que incluye instrumentos de evaluación completos para que el clínico o el investigador los apliquen en sus respectivos campos de trabajo.

Pero la obra también ofrece a los profesionales del derecho abogados o jueces criterios para valorar la calidad técnica de estos dictámenes y así puedan ajustar sus expectativas respecto a los mismos y su capacidad predictiva. Con un enfoque crítico y práctico el libro trata sobre cómo trasladar la evidencia científica a la casística.
