Estate Landscapes : Design, Improvement and Power in the Post-medieval Landscape Jonathan Finch, Katherine Giles, 2007 An exciting study of the social and landscape phenomena of the Estate Landscape In recent years the post medieval landscape has attracted new interest from archaeologists historians and geographers concerned to understand the development of the historic environment One of the key structuring elements within these landscapes from the sixteenth century until the aftermath of the Second World War was undoubtedly the landed estate However it was not until the late nineteenth century that any systematic attempt to quantify the presence of these estates was undertaken prompted by the move to democratic reform and the persistent link

between political power and landed wealth Yet the importance of the landed estate in structuring power social relationships and both agricultural and industrial production was not limited to the UK From the eighteenth century the link between the UK estates and patterns of landholding and exploitation in the colonies became increasingly complex and recursive This volume explores the relationships between the form and structure of British and Colonial estate landscapes their agricultural management and the political structures and social relationships they reproduced The articles address themes as diverse as the creation and development of the agrarian landscape improvement ornamental landscapes and gardens and estate architecture Overall it highlights the wealth and diversity of existing scholarship and suggests new directions for post medieval archaeology in this dynamic area of research

Gothic Antiquity Dale Townshend, 2019 The first closely historicized study of the relationship between Gothic architecture and Gothic and Romantic literature

The Nation's First Monument and the Origins of the American Memorial Tradition Sally Webster, 2017-07-05 The commemorative tradition in early American art is given sustained consideration for the first time in Sally Webster's study of public monuments and the construction of an American patronymic tradition Until now no attempt has been made to create a coherent early history of the carved symbolic language of American liberty and independence Establishing as the basis of her discussion the fledgling nation's first monument Jean Jacques Caffri's Monument to General Richard Montgomery commissioned in January of 1776 Webster builds on the themes of commemoration and national patrimony ultimately positing that like its instruments of government America drew from the Enlightenment and its reverence for the classical past Webster's study is grounded in the political and social worlds of New York City moving chronologically from the 1760s to the 1790s with a concluding chapter considering the monument which lies just east of Ground Zero against the backdrop of 9/11 It is an original contribution to historical scholarship in fields ranging from early American art sculpture New York history and the Revolutionary era A chapter is devoted to the exceptional role of Benjamin Franklin in the commissioning and design of the monument Webster's study provides a new focus on New York City as the 18th century city in which the European tradition of public commemoration was reconstituted as monuments to liberty's heroes

"Turquerie and the Politics of Representation, 1728-1876" Nebahat Avcioglu, 2017-07-05 In this first full length study devoted explicitly to the examination of Ottoman Turkish inspired architecture in Western Europe during the eighteenth and nineteenth centuries Nebahat Avcioglu rethinks the question of cultural frontiers not as separations but as a rapport of heterogeneities Reclaiming turquerie as cross cultural art from the confines of the inconsequential exoticism it is often reduced to Avcioglu analyses hitherto neglected images designs and constructions and links Western interest in the Ottoman Empire to notions of self representation and national politics In investigating why and to what effect Europeans turned to the Turk for inspiration Avcioglu provides a far reaching cultural reinterpretation of art and architecture in this period Presented as a series of case studies focusing on three specific building types kiosks mosques and baths chosen on the basis that each represents the first full fledged manifestations of their

respective genres to be constructed in Western Europe the study delves into the cultural politics of architectural forms and styles The author argues that the appropriation of those building types was neither accidental nor did it merely reflect European domination of another culture The process was essentially dialectical and contributed to transculturation in both the West and the East 'Turquerie' and the Politics of Representation, 1728-1876 Nebahat Avcioglu,2011 Devoted explicitly to the examination of Ottoman Turkish inspired architecture in Western Europe during the eighteenth and nineteenth centuries in this study Nebahat Avcioglu rethinks the question of cultural frontiers not as separations but as a rapport of heterogeneities Reclaiming turquerie as cross cultural art from the confines of the inconsequential exoticism it is often reduced to Avcioglu analyses hitherto neglected constructions and links them to notions of self representation and politics A History of British Art Andrew Graham-Dixon,1999 Andrew Graham Dixon unveils the long kept secret of Britain's rich and vital visual culture **Sacred Architecture of London** Nigel Pennick,2012-05-31 London has a unique series of churches built after the Great Fire of 1666 when most of the City of London was destroyed Among these iconic churches are St Paul's St Mary le Bow St Bride's St Clement Danes St Martin in the Fields St Mary le Strand St George Bloomsbury and Christ Church Spitalfields They remain today as outstanding landmarks that define their local cityscapes Designed by Sir Christopher Wren and his followers Hawksmoor Gibbs Archer and James these beautiful churches embody spiritual principles expressed through the conventions of Classical architecture Underlying their outward visible forms is sacred geometry an ancient art that explores the invisible inner structure of the Cosmos and gives expression to it in physical form In this book Nigel Pennick explains the sacred geometry spiritual symbols and emblems that make these churches among the most notable buildings of London Immaterial Architecture Jonathan Hill,2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates This issue drives Hill's explorative look at the immaterial aspects of architecture The book discusses the pressures on architecture and the architectural profession to be respectively solid matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter command of drawing and design of spaces and surfaces Focusing on immaterial architecture as the perceived absence of matter Hill devises new means to explore the creativity of both the user and the architect advocating an architecture that fuses the immaterial and the material and considers its consequences challenging preconceptions about architecture its practice purpose matter and use This is a useful and innovative read that encourages architects and students to think beyond established theory and practice The Quest for the Gesamtkunstwerk and Richard Wagner Hilda Meldrum Brown,2016 The Gesamtkunstwerk total work of art once a key concept in Wagner studies has become problematic This book sheds light on this conundrum by first tracing the development of the concept in the 19th century through selected examples some of which include combinations of different art forms It then focuses on the

culmination of the Gesamtkunstwerk in Wagner's theories and in the practice of his late music dramas of which *Der Ring des Nibelungen* is the most complete representation. Finally the book contrasts the view of the Ring as a fusion of dramatic text and music with the 20th century trend towards Deconstruction in Wagnerian productions and the importance of Ring. Against this trend a case is made here for a fresh critical approach and a reconsideration of the nature and basis for the fundamental unity which has hitherto been widely perceived in Wagner's Ring. Approaches through Leitmotiv alone are no longer acceptable. However in conjunction with another principle Moment which Wagner insisted on combining with Motive these can be ingeniously staged and steered to dramatic ends by means of musical dynamics and expressive devices such as accumulation. Analysis of the two Erda scenes demonstrates how this complex combination of resources acts as a powerful means of fusion of the musical and dramatic elements in the Ring and confirms its status as a Gesamtkunstwerk.

The Architectural Capriccio Dr Lucien Steil, 2014-01-17 Bringing together leading writers and practicing architects including Jean Dethier, David Mayernik, Massimo Scolari, Robert Adam, David Watkin and Leon Krier, this volume provides a kaleidoscopic, multilayered exploration of the Architectural Capriccio. It not only explains the phenomena within a historical context but moreover demonstrates its contemporary validity and appropriateness as a holistic design methodology, an inspiring pictorial strategy, an efficient rendering technique and an optimal didactic tool. The book shows and comments on a wide range of historic masterworks and highlights contemporary artists and architects excelling in a modern, updated, refreshed and original tradition of the Capriccio.

Persuasion and Propaganda Joan Coutu, 2006-08-23 Lavishly illustrated, *Persuasion and Propaganda* is the first study of these works of art within the framework of colonial politics and political culture. While examining the rise of the idea of the public in the modern world, Joan Coutu also explores how empire was constantly being redefined. From private funeral monuments in the West Indies to works erected by the East India Company and the British Parliament, Coutu shows how the youthful British Empire saw itself and validated its mission through sculpture.

The Routledge Companion to Gothic Catherine Spooner, Emma McEvoy, 2007-10-08 In a wide-ranging series of introductory essays written by some of the leading figures in the field, this book is one of the most comprehensive and up-to-date guides on the diverse and murky world of the gothic in literature, film and culture.

Rumour and Renown Philip R. Hardie, 2012-02-02 The Latin word fama means rumour, report, tradition as well as modern English fame or renown. This magisterial and groundbreaking study in the literary and cultural history of rumour and renown by one of the most influential living critics of Latin poetry examines the intricate dynamics of their representations from Homer to Alexander Pope, with a focus on the power struggles played out within attempts to control the word, both spoken and written. Central are the personifications of Fama in Virgil and Ovid and the rich progeny spawned by them, but the book focuses on a wide range of genres other than epic and on a variety of modes of narrating, dramatising, critiquing and illustrating fama. Authors given detailed readings include Livy, Tacitus, Petrarch, Chaucer, Spenser, Shakespeare, Ben Jonson and Milton.
