Abstract

The accuracy and standardization of TCM terminology translation have drawn significant scholarly attention during Traditional Chinese Medicine (TCM) context's internationalization. The advent of Deepseek, an advanced large language model, offers promising supports in addressing these critical linguistic and conceptual challenges, including interdisciplinary collaborative competence enhancement, rigorous translation quality control, comprehensive evaluation framework establishment, and standardized translation system development. From the perspective of large language model, Deepseek adopts a multi-strategy collaborative approach in the translation of TCM terminology to mitigate cultural barriers and domain-specific misinterpretations, thereby facilitating the global dissemination of TCM knowledge and culture.

Keywords

1. Introduction

Traditional Chinese Medicine (TCM), a gem of traditional Chinese culture, is progressively gaining global prominence, bolstered by the dual forces of globalization and the Healthy China initiative. Deepseek, a large language model, leverages its advanced natural language processing (NLP) capabilities to offer unprecedented opportunities for the standardized translation of TCM terminology. However, significant challenges persist in translating TCM terminology with high domain-specific complexity and cultural-loaded connotations. Effectively leveraging Deepseek to achieve precise TCM terminology translation remains a critical issue requiring scholarly attention. Continued exploration of innovative methodologies and practical approaches is imperative to advance the accuracy and standardization of TCM terminology, ensuring both terminological accuracy and profound

Terminology Of Chinese Medicine 4 Langua:

Glossary of Chinese Medicine - E-Book Li Tian,Anton Lachner,2016-07-02 Anyone who learns the skills of acupuncture or who extends his knowledge of TCM is inevitably confronted with terms which hitherto had always meant something different to him or her Take the use of the word wind for example to refer to a pathogenic factor contributing to illnesses rather than its sense as a climatic factor This difficulty is compounded by the fact that in most books these terms are not used in a clear and uniform way One of the many examples is the Chinese term xu which is translated as insufficiency but also as deficiency or severity and is often not even used consistently within one and the same publication This glossary presents all the Chinese terms in Chinese characters and in Pinyin script that are relevant to TCM and provides their English translations It also provides an explanation of how for example the location or the function of an acupuncture point can be concluded from its name Teaches the reader to correctly pronounce important terms from TCM which are increasingly used in pinyin transcription The significance of TCM concepts provide explanations for the function of points and medications Written by leading experts in the field Attractive design throughout

Living Translation Sonya Pritzker,2014-06-01 Integrating theoretical perspectives with carefully grounded ethnographic analyses of everyday interaction and experience Living Translation examines the worlds of international translators as well as U S teachers and students of Chinese medicine focusing on the transformations that occur as participants engage in a search for resonance with foreign terms and concepts Based on a close examination of heated international debates as well as specific texts classroom discussions and interviews with publishers authors teachers and students Sonya Pritzker demonstrates the living translation of Chinese medicine as a process unfolding through interaction inscription embodied experience and clinical practice By documenting the stream of conversations that together constitute this process the book thus traces the translation of Chinese medicine from text to practice with an eye towards the social political historical moral and even personal dimensions involved in the transnational production of knowledge about health illness and the body Evidence-based Clinical Chinese Medicine - Volume 14: Unipolar Depression Yuan Ming Di,Lingling Yang,2020-05-28 This book is the fourteenth volume in the Evidence based Clinical Chinese Medicine series and is essential

for Chinese medicine practitioners interested in treating unipolar depression using Chinese medicine. It uses a whole evidence approach and provides an in depth analysis of Chinese medicine treatments for depression including a summary of Chinese medicine treatments used in classical Chinese medicine literature as well as treatments that have been tested in clinical trials. High quality and rigorous scientific methodology is used to evaluate the clinical trial literature of Chinese medicine treatments for unipolar depression. Treatment modalities including Chinese herbal medicine, acupuncture and other Chinese medicine therapies. The findings are analyzed and potential implications for clinical practice and research are explored. Chinese medicine practitioners and students who want to keep up to date with the latest research to support and incorporate into their clinical practice, this book is ideal. The different modalities of treatment for unipolar depression covered in this book includes herbal medicine, acupuncture and combination of these therapies. Treatment effects for depression are described in change in depression severity, change in quality of life and relapse rate. Further, herbal formulae, herb ingredients and acupuncture points are analyzed and discussed in relation to treatment. Findings from this book can provide guidance for Chinese medicine practitioners when treating depression.

Semantically Based Clinical TCM Telemedicine Systems
Allan K. Y. Wong,Jackei H.K. Wong,Wilfred W. K. Lin,Tharam S. Dillon,Elizabeth J. Chang,2015-01-23 Recent years have seen the development of two significant trends namely the adoption of some Traditional Chinese Medicine Practices into mainstream Allopathic Western Medicine and the advent of the internet and broad band networks leading to an increased interest in the use of Telemedicine to deliver medical services In this book we see the convergence of these two trends leading to a semantically based TCM Telemedicine system that utilizes an ontology to provide sharable knowledge in the TCM realm to achieve this The underpinning research required the development of a three layer architecture and an Ontology of the TCM knowledge As TCM knowledge like all medical knowledge is not frozen in time it was important to develop an approach that would allow evolution of the Ontology when new evidence became available In order for the system to be practically grounded it was important to work with an industry partner PuraPharm Group HerbMiners Informatics Limited This partnership was initiated through Professor Allan Wong and the Chairman of PuraPharm Group Mr Abraham Chan This led to the system being utilized in more than 20 Mobile Clinics in Hong Kong and 300 Hospitals in China In order for these different deployments of the system to be coherent with the main core Ontology it was necessary for us to develop an Ontology Driven Software System Generation approach
