The Terracotta Army Charles River Editors, 2017-01-11 Includes pictures Includes ancient accounts of the emperor's reign and description of his tomb Describes how the Terracotta Army was designed and created Includes a bibliography for further reading The terracotta army was a one off creation original in both concept and execution unmentioned in any source no sooner buried than destroyed and forgotten Why so realistic Why this many Why full size Why clay The initial inspiration was the need to duplicate a new force of which the main element was infantry conscripted from the emperor's newly acquired masses of peasants and protected not with custom made armor but with scales of leather and simple standardized weapons It was the combination of archers infantry and charioteers this particular balance between officers and men that had enabled the First Emperor to unify the nation John Man The Terracotta Army China's First Emperor and the Birth of a Nation China has always fascinated outsiders much in the same way that distant light fascinates someone looking down a dark road It is both familiar and mysterious ancient and new and fully understanding it seems to always remain just out of reach From the Great Wall to the ancient teachings of Confucius China's natural and man made wonders have been topics of interest among Westerners since the Middle Ages and the pursuit of trade routes both by land and sea amazing Marco Polo and 19th century British expeditions in similar ways despite the passage of several centuries between them For these reasons it comes as little surprise that people across the world were excited when it was revealed in 1974 that archaeologists had uncovered a new and amazing find an underground army consisting of thousands of clay soldiers still standing at their posts despite being over 2 000 years old In addition to the remarkable feats of craftsmanship and the almost unimaginable size and scale of the Terracotta Army the sculpted statues seemed to bear testimony of something that modern people could not quite wrap their minds around representing a time when China was born almost 200 years before Christ The hope for many was that this remarkable army could reveal the secrets of China's first emperor Qin Shi Huang a man who united seven warring tribes into one of the most powerful nations on earth Even as research continues 40 years after the initial find some of the facts about the Terracotta Army are staggering It's estimated that the army consists of 8 000 soldiers 130 chariots and hundreds of horses and cavalry all of which were sculpted on a mass scale by various factories but were subsequently molded to feature their own unique appearances separate of one another As if that wasn't enough there are also terracotta sculptures of acrobats servants and musicians and the sculptures were painted though most of the paint has faded away over time This impressive horde of funerary art was buried with Qin Shi Huang to serve him in the afterlife much the same way Egyptian pyramids were constructed for pharaohs While the sculptures comprising the Terracotta Army are impressive as a work of art they have indeed proven to be an invaluable historical source as well Thanks to collections of weapons buried with the sculptures as well as the shapes and sizes of the various military equipment historians can get a sense of what Qin Shi Huang had at his disposal when he fought battles and the Terracotta Army itself is even organized based on military rank

**Terra Cotta Warriors** Jane Portal, 2008

The terra cotta army of Qin Shihuangdi, the First Emperor of China (221-210 BC), is one of the most spectacular finds in world archaeology. It was discovered by chance in 1974, a garrison in battle-ready formation spread across a number of pits. Here were life-sized warriors made over two thousand years ago from fired clay: cavalry archers and infantry, lowly foot soldiers and high-ranking officers, figures of varying ages with different hairstyles and facial expressions and seemingly representing every racial group in China. More than 6,000 in all. But who was this powerful Emperor of the Qin Dynasty who needed such an army to guard him in the afterlife? How were the figures made? How could they have been manufactured on such a vast scale?

Beautifully illustrated and based on the latest research, this little book provides a perfect introduction to what has often been described as the eighth Wonder of the World.

**The Terra Cotta Warriors**, The Terracotta Warriors Edward Burman, 2018-08-07

Exciting investigations in northwest China are about to reveal more of the mysteries of the huge mausoleum of the Qin Emperor, a portion of which was accidentally discovered in 1974 by farmers who were digging a well. The second phase of an international research project began in 2011, and more recently promising new excavations began in Pit 2, with exciting fresh discoveries already announced.

**The Terracotta Warriors** seeks to examine one of China's most famous archaeological discoveries in light of these new findings. The book begins with the discovery of the terracotta warriors and then tells the history of the Qin Dynasty and as much as is known about the construction of the third-century BCE mausoleum based on the work of the historian Sima Qian (145-90 BCE). He wrote that the First Emperor was buried with palaces, towers, officials, valuable artifacts, and wondrous objects. The new findings and the historical description of the mausoleum suggest that the next discoveries may surpass the size and conception of the original discovery of the terracotta warriors.

In the second part, Edward Burman questions who built the warriors, how, and what purpose they served. Finally, he anticipates the ongoing discoveries and describes the new methods of excavation and preservation.
