Angelakis,Joan B. Rose,2014-09-14 Most of the technological developments relevant to water supply and wastewater date back to more than to five thousand years ago These developments were driven by the necessity to make efficient use of natural resources to make civilizations more resistant to destructive natural elements and to improve the standards of life both at public and private level Rapid technological progress in the 20th century created a disregard for past sanitation and wastewater and stormwater technologies that were considered to be far behind the present ones A great deal of unresolved problems in the developing world related to the wastewater management principles such as the decentralization of the processes the durability of the water projects the cost effectiveness and sustainability issues such as protection from floods and droughts were intensified to an unprecedented degree New problems have arisen such as the contamination of surface and groundwater Naturally intensification of unresolved problems has led to the reconsideration of successful past achievements This retrospective view based on archaeological historical and technical evidence has shown two things the similarity of physicochemical and biological principles with the present ones and the advanced level of wastewater engineering and management practices *Evolution of Sanitation and Wastewater Technologies through the Centuries* presents and discusses the major achievements

in the scientific fields of sanitation and hygienic water use systems throughout the millennia and compares the water technological developments in several civilizations. It provides valuable insights into ancient wastewater and stormwater management technologies with their apparent characteristics of durability, adaptability to the environment, and sustainability. These technologies are the underpinning of modern achievements in sanitary engineering and wastewater management practices. It is the best proof that the past is the key for the future. *Evolution of Sanitation and Wastewater Technologies through the Centuries* is a textbook for undergraduate and graduate courses of Water Resources, Civil Engineering, Hydraulics, Ancient History, Archaeology, Environmental Management, and is also a valuable resource for all researchers in these fields. Art and Risk in Ancient Yoruba Suzanne Preston Blier, 2017-11-02. In this book, Suzanne Preston Blier examines the intersection of art, risk, and creativity in early African arts from the Yoruba center of Ife and the striking ways that ancient Ife artworks inform society, politics, history, and religion. Yoruba art offers a unique lens into one of Africa's most important and least understood early civilizations, one whose historic arts have long been of interest to local residents and Westerners alike because of their tour de force visual power and technical complexity. Among the complementary subjects explored are questions of art making, art viewing, and aesthetics in the famed ancient Nigerian city-state, as well as the attendant risks and danger assumed by artists, patrons, and viewers alike in certain forms of subject matter and modes of portrayal, including unique genres of body marking, portraiture, animal symbolism, and regalia. This volume celebrates art history and the shared passion and skill with which the remarkable artists of early Ife sought to define their past for generations of viewers.

From Then to Now Christopher Moore, 2011-10-05. Just 50,000 years ago, our hunter-gatherer ancestors ventured off the African savannah and into the wider world. Now, our technology reaches far out into the cosmos. How did we get to where we are today? With lively text and colorful illustrations, *From Then to Now* explains how individual societies struggled to find their own paths despite war, disease, slavery, natural disasters, and the relentless growth of human knowledge. From Hammurabi to Henry Ford, from Incan couriers to the Internet, from the Taj Mahal to the Eiffel Tower, from Marco Polo to Martin Luther King, from Cleopatra to Catherine the Great, from boiled haggis to fried tarantulas, this is no less than the story of humanity. It's the story of how we grew apart over all those years of migration and division, and how, as we recognize our common heritage and our often mixed ancestry, we can come together. An index, maps, and notes make this a must-have reference as well as a delight to read and to

discuss From Then to Now is bound to create a generation of history buffs **The Archaeology of Art** Andrew Meirion Jones, Andrew Cochrane, 2018-05-20 How can archaeologists interpret ancient art and images if they do not treat them as symbols or signifiers of identity Traditional approaches to the archaeology of art have borrowed from the history of art and the anthropology of art by focusing on iconography meaning communication and identity This puts the archaeology of art at a disadvantage as an understanding of iconography and meaning requires a detailed knowledge of historical or ethnographic context unavailable to many archaeologists Rather than playing to archaeology s weaknesses the authors argue that an archaeology of art should instead play to archaeology s strength the material character of archaeological evidence Using case studies examining rock art figurines beadwork murals coffin decorations sculpture and architecture from Europe the Americas Asia Australia and north Africa the authors develop an understanding of the affective and effective nature of ancient art and imagery An analysis of a series of material based practices from gesture and improvisation to miniaturisation and gigantism assembly and disassembly and the use of distinctions in colour enable key concepts such as style and meaning to be re imagined as affective practices Recasting the archaeology of art as the study of affects offers a new prospectus for the study of ancient art and imagery
