International Journal of Inclusive Education. This book offers practitioners a new way of thinking about and pursuing concerns about children's learning. It sets aside the limiting language of learning difficulties and special needs and suggests an approach which starts from a different perspective. This approach assumes that any learning situation always has the potential to yield new ideas for enhancing children's learning if we do the kinds of thinking that open up new possibilities. The author offers an account of this innovative thinking, suggesting a framework of questions that teachers can use, drawing on their existing knowledge and expertise to generate new insight and possibilities for practice. She also provides a basis for deciding which possibilities to pursue in the case of a particular child. The approach is explained in a practical and usable way for classroom teachers, drawing on detailed accounts of children's learning and the outcomes of a research study from which the ideas were derived **Teacher's Guide to Anger**
