Territorial Imperative:

The territorial imperative Robert Ardrey, 1963 *The Territorial Imperative* Robert Ardrey, 1978 *The Territorial Imperative*, 1966 Statehood Bill D. Howell, Bill Redd, 2005 Statehood The Territorial Imperative is a meticulous inquiry into the origins of the American states the federal territorial land system and the relationship between the two The text relies upon commentary of the Framers other contemporaneous commentary and Supreme Court decisions and decisional dicta to derive its conclusions The conclusions arrived at pose a forceful and provocative challenge to conventional thinking about the federal trust respecting public lands as it is understood and applied in the 21st century This text will be of value to students of constitutional federalism constitutional originalism and American history *Body Language* Julius Fast, 2014-04-01 A revised and updated edition of the New York Times bestselling classic on understanding body language from the author of Subtext Body Language helps you to understand the unconscious body movements and postures that provide intimate keys to what a person is really thinking and the secrets of their true inner selves You will learn how to read the angle of shoulders the tilt of a head or the tap of a foot in order to discern whether an individual is angry frightened or cheerful You will be able to use Body Language to discover the most and least important person in any group by the way others position themselves The body is not able to lie for it sends subtle signals to those who know how to read them Body Language will even show you how to do it without others knowing you are observing them Body Language was a huge best seller when first published and has remained in print ever since It has been thoroughly updated and revised especially for this ebook edition **Killer Instinct** Nadine Weidman, 2021-10-19 A historian of science examines key public debates about the fundamental nature of humans to ask why a polarized discourse about nature versus nurture became so entrenched in the popular sciences of animal and human behavior Are humans innately aggressive or innately cooperative In the 1960s bestselling books enthralled American readers with the startling claim that humans possessed an instinct for violence inherited from primate ancestors Critics responded that humans were inherently loving and altruistic The resulting debate fiercely contested and highly public left a lasting impression on the popular science discourse surrounding what it means to be human Killer Instinct traces how Konrad Lorenz Robert Ardrey and their followers drew on the sciences of animal behavior and paleoanthropology to argue that the aggression instinct drove human evolutionary progress Their message spread throughout popular media brought pointed ripostes Led by the anthropologist Ashley Montagu opponents presented a rival vision of human nature equally based in biological evidence that humans possessed inborn drives toward love and cooperation Over the course of the debate however each side accused the other of holding an extremist position that behavior was either determined entirely by genes or shaped solely by environment Nadine Weidman shows that what started as a dispute over the innate tendencies of animals and humans transformed into an opposition between nature and nurture This polarized formulation proved powerful When E O Wilson introduced his sociobiology in 1975 he tried to rise above the oppositional terms of the aggression debate But the

controversy over Wilson's work led by critics like the feminist biologist Ruth Hubbard was ultimately absorbed back into the nature versus nurture formulation. *Killer Instinct* explores what happens and what gets lost when polemics dominate discussions of the science of human nature. *Creatures of Cain* Erika Lorraine Milam, 2018-12-11 How Cold War America came to attribute human evolutionary success to our species' unique capacity for murder. After World War II the question of how to define a universal human nature took on new urgency. *Creatures of Cain* charts the rise and precipitous fall in Cold War America of a theory that attributed man's evolutionary success to his unique capacity for murder. Drawing on a wealth of archival materials and in-depth interviews, Erika Lorraine Milam reveals how the scientists who advanced this killer ape theory capitalized on an expanding postwar market in intellectual paperbacks and widespread faith in the power of science to solve humanity's problems even to answer the most fundamental questions of human identity. The killer ape theory spread quickly from colloquial science publications to late night television classrooms, political debates, and Hollywood films. Behind the scenes, however, scientists were sharply divided, their disagreements centering squarely on questions of race and gender. Then in the 1970s the theory unraveled altogether when primatologists discovered that chimpanzees also kill members of their own species. While the discovery brought an end to definitions of human exceptionalism delineated by violence, Milam shows how some evolutionists began to argue for a shared chimpanzee-human history of aggression even as other scientists discredited such theories as sloppy popularizations. A wide-ranging account of a compelling episode in American science, *Creatures of Cain* argues that the legacy of the killer ape persists today in the conviction that science can resolve the essential dilemmas of human nature. **Neoliberalism on the Ground** Kenny Cupers, Helena Mattsson, Catharina Gabrielsson, 2020-02-25 Architecture and urbanism have contributed to one of the most sweeping transformations of our times. Over the past four decades, neoliberalism has been not only a dominant paradigm in politics but a process of bricks and mortar in everyday life. Rather than to ask what a neoliberal architecture looks like or how architecture represents neoliberalism, this volume examines the multivalent role of architecture and urbanism in geographically variable yet interconnected processes of neoliberal transformation across scales from China, Turkey, South Africa, Argentina, Mexico, the United States, Britain, Sweden, and Czechoslovakia. Analyzing how buildings and urban projects in different regions since the 1960s have served in the implementation of concrete policies such as privatization, fiscal reform, deregulation, state restructuring, and the expansion of free trade, contributors reveal neoliberalism as a process marked by historical contingency. *Neoliberalism on the Ground* fundamentally reframes accepted narratives of both neoliberalism and postmodernism by demonstrating how architecture has articulated changing relationships between state, society, and economy since the 1960s. **The Army Communicator**, 1984 *Law, Force and Diplomacy at Sea (Routledge Revivals)* Ken Booth, 2014-06-27 *Law*

Force and Diplomacy at Sea first published in 1985 is one of the few comprehensive treatments on the subject from a strategic perspective. It offers a detailed strategic analysis of the background and outcome of the Third UN Conference on the

Law of the Sea and its naval implications The interplay between the interest of the naval powers in freedom of navigation and the interest of coastal states in control provides the setting for the strategic problems The sea is taking on more properties of the land it is becoming territorialised and this is presenting fresh challenges and opportunities to which navies and their national governments have to respond This study is designed for students of naval strategy for international lawyers and for students of international affairs who wish to think about the important security questions in the maritime environment

The Nature of War Jim Stempel, 2014-11-26 For over 12 000 years human beings have warred slaughtering each other with persistence and brutality From spear point to thermonuclear ordnance human ingenuity has had a serious downside In the 20th century alone wars claimed more than 90 million lives Yet war's origins meaning and evolution over the millennium remain to this day a mystery Why is warfare almost as old as man himself How is it that a creature capable of producing great art architecture literature medicine and wondrous acts of compassion is simultaneously capable of such cruel and wanton slaughter To answer these and other questions this thoughtful study journeys across time and disciplines to examine and sensibly explain human warfare clarify its source and driving energy and thoughtfully develop the prospect of a true and lasting peace

The Global African Omari H. Kokole, 1998 Anticipating the auspicious convergence of his 60th birthday and the 30th anniversary of his professorial debut Ali A Mazrui's students friends and colleagues seized the opportunity to critically assess the significance of the prodigious body of scholarship affectionately dubbed Mazruiana In November 1992 in Seattle Washington four panels devoted exclusively to Mazruiana were convened at the annual meetings of the African Studies Association with the added attraction of Mazrui's attendance at the convocation and his immediate personal response to the original papers presented there While no single volume could do justice to Mazrui's colossal literary output here at least is gathered the collective investigative insight of a team of well informed critics into select salient facets of this provocative but stimulating literary and intellectual phenomenon The long list of contributors to this Festschrift includes John W Harbeson Dunstan M Wai Darryl C Thomas Negussay Ayele Parviz Morewedge Hussein M Adam Alamin M Mazrui Claude E Welch Peter N Thuynsma Richard L Sklar Betty J Craig Molar Ogundipe Leslie Chaly Sawere Bujor Avari Diana Frank Omari H Kokole and Ali A Mazrui himself
