### **Visual Culture**

**Revisited** Ralf Adelman,Andreas Fahr,Ines Katenhusen,Nic Leonhardt,Dimitri Liebsch,2014-12-05 Is there one visual culture or are there multiple visual cultures On the one hand it is obvious that images do not exist and cannot be understood independently Rather they are embedded in institutions and cultural contexts This common ground suggests an understanding of visual culture as a singular phenomenon On the other hand the plurality of pictorial representations from Sitcoms to illustrations in childrens books from cartoons to satellite photos from high art to everyday life suggests the conception of visual culture as a singular phenomenon to be misleading The visual world is a field of conflict and tension between self and other mainstream and counterculture The articles in this book include both theoretical reflections on the dialectics of visual culture s as well as case studies The focus lies on examples from the U S American context from the focusing on Native Americans as the Vanishing Race in the 19th century Photography to the TV coverage of the Columbia Space Shuttle Disaster in February 2003 This book is therefore highly recommendable to both students and scholars of American Studies als well as those interested in the interdisciplinary debate on visual culture s

### **The Cultural Politics of**

**Post-9/11 American Sport** Michael Silk,2013-06-17 Much of the writing on the post 9 11 period in the United States has focused on the role of official Government rhetoric about 9 11 Those who have focused on the news media have suggested that they played a key role in re defining the nation allowing the citizenry to come to terms with 9 11 in providing official understandings and interpretations of the event and setting the terms for a geo political military response the war on terror However strikingly absent from post 9 11 writing has been discussion on the role of sport in this moment This text provides the first book length account of the ways in which the sport media in conjunction with a number of interested parties sporting state corporate philanthropic and military operated with a seeming collective affinity to conjure up nation to define

nation and its citizenry and to demonize others Through analysis of a variety of cultural products film children s baseball the Super Bowl the Olympics reality television the book reveals how in the post 9 11 moment the sporting popular operated as a powerful and highly visible pedagogic weapon in the armory of the Bush Administration operating to define ways of being American and thus occlude other ways of being Reconsidering knowledge production and inclusion/exclusion in dance communities Ann R. Echevarria II, 2014-05-28 Challenging several longstanding notions about the American way of war this book examines US strategic and operational practice from 1775 to 2014 It surveys all major US wars from the War of Independence to the campaigns in Iraq and Afghanistan as well as most smaller US conflicts to determine what patterns if any existed in American uses of force Contrary to many popular sentiments Echevarria finds that the American way of war is not astrategic apolitical or defined by the use of overwhelming force Instead the American way of war was driven more by political considerations than military ones and the amount of force employed was rarely overwhelming or decisive Echevarria discovers that most conceptions of American strategic culture fail to hold up to scrutiny and that US operational practice has been closer to military science than to military art This book should be of interest to military practitioners and policymakers students and scholars of military history and security studies and general readers interested in military history and the future of military power

Butler, 2019-07-23 This book seeks to interrogate how contemporary policy issues become securitized and furthermore what the implications of this process are A generation after the introduction of the concept of securitization to the security studies field this book engages with how securitization and desecuritization works within and across a wide range of security domains including terrorism and counter terrorism climate change sexual and gender based violence inter state and intra state conflict identity and memory in various geographic and social contexts Blending theory and application the contributors to this volume drawn from different disciplinary ontological and geographic spaces orient their investigations around three common analytical objectives revealing deficiencies in and through application s of securitization considering securitization through speech acts and discourse as well as other mechanisms and

exposing latent orthodoxies embedded in securitization research The volume demonstrates the dynamic and elastic quality of securitization and desecuritization as concepts that bear explanatory fruit when applied across a wide range of security issues actors and audiences It also reveals the deficiencies in restricting securitization research to an overly narrow set of issues actors and mechanisms This volume will be of great interest to scholars of critical security studies international security and International Relations Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

**The Cultural Imaginary of Terrorism in Public Discourse, Literature, and Film** Michael C. Frank, 2017-06-14 This study investigates the overlaps between political discourse and literary and cinematic fiction arguing that both are informed by and contribute to the cultural imaginary of terrorism Whenever mass mediated acts of terrorism occur they tend to trigger a proliferation of threat scenarios not only in the realm of literature and film but also in the statements of policymakers security experts and journalists In the process the discursive boundary between the factual and the speculative can become difficult to discern To elucidate this phenomenon this book proposes that terror is a halfway house between the real and the imaginary For what characterizes terrorism is less the single act of violence than it is the fact that this act is perceived to be the beginning or part of a potential series and that further acts are expected to occur As turn of the century writers such as Stevenson and Conrad were the first to point out this gives terror a fantastical dimension a fact reinforced by the clandestine nature of both terrorist and counter terrorist operations Supported by contextual readings of selected texts and films from *The Dynamiter* and *The Secret Agent* through late Victorian science fiction to post 9/11 novels and cinema this study explores the complex interplay between actual incidents of political violence the surrounding discourse and fictional engagement with the issue to show how terrorism becomes an object of fantasy Drawing on research from a variety of disciplines *The Cultural Imaginary of*

Sadovnichy,Askar Akaev,Ilya Ilyin,Sergey Malkov,Leonid Grinin,Andrey Korotayev,2023-09-25 Echoing the famous The Limits to Growth report from 1972 this edited volume analyses the changes that the World System has undergone to the present on the fiftieth anniversary of the original report During the past fifty years both the concept and understanding of these limits have significantly changed This book highlights that the evolution of the World System has approached a new critical milestone moving into a fundamentally new phase of historical development when the old economic and social technologies no longer work as efficiently as before or even begin to function counterproductively which leads the World System into a systemic crisis The book discusses the transition of human society to a new phase state the shape of which has not yet been determined New approaches are needed for both for the analysis of the global situation and for forecasts The book is based on an integrated approach including the world systems historical and evolutionary perspectives as well as a systematic view of society in which changes in one subsystem cause transformations in others Through mathematical modeling it defines the

main vectors of transformations of the World System makes a detailed forecast of the development of all the main subsystems of the society and the World System while presenting horizons of changes from short term to ultra long term and presents different development scenarios as well as recommendations on how to achieve a transition to the most favorable scenario The book will appeal to members and followers of the Club of Rome policy makers as well as to scholars from various disciplines interested in a better understanding of the World System evolution global futures development studies climate change and future societies The American Exceptionalism Revisited Marcello Fantoni, Leonardo

Morlino, 2016-02-26T00:00:00+01:00 When looking at the US from a European perspective a sort of paradox immediately emerges On the one hand the American way of life has been penetrating in depth our everyday life and even more our Western culture through the music the movies the literature and all possible consumerist habits But on the other hand all recurrent statements have been emphasizing the American exceptionalism of political institutions that is how different and distant the North American institutions are from the European ones with regards to the government leadership the relationships between existing powers the connections with the citizens and even the very notion of democracy This book will not analyze the reasons of such exceptionalism It addresses a more salient and up to date question how much exceptionalism is today still present if we compare US democratic institutions to the European ones In other words has there been a convergence or are the differences still very strong and accentuated And if there has been convergence in what directions Or if resilient divergences on what aspects Moreover how to explain the convergence if there has been one Risk and the War on Terror Louise Amoore, Marieke de Goede, 2008-06-11 Pt 1 Risk precaution governance pt 2 Crime deviance exception pt 3 Biopolitics biometrics borders pt 4 Risks tactics resistances
