The Psychology of Terrorism Fears Samuel Justin Sinclair, Daniel Antonius, 2012-06-13 The psychology of terrorism in its most basic form is about fear Although academics continue to debate the meaning of terrorism the end result for victims of terrorism is very often fear and terror Many studying the effects of terrorism have focused more exclusively on discrete psychopathological constructs most of which are clinically based Ironically these paradigms fail to acknowledge the primacy of basic fear in the context of terrorism as well as how fear affects people in both positive and negative ways above and beyond whether one meets criteria for a clinical disorder The

purposes of this book are to unpack the complexity of terrorism fears and to present a new paradigm for understanding the psychology of terrorism. As such, this book presents empirical and theoretical frameworks for understanding fear as a dynamic process that motivates and affects people on a myriad of levels from the individual to society at large. The book also highlights the paradox of how fear can negatively impact people and societies but also be a central force underlying resilience and post-traumatic growth. Finally, *The Psychology of Terrorism Fears* discusses how society has changed as a result of terrorism and specifically how our own systems for managing terrorism may in fact contribute to fear. **Drones**

and Unmanned Aerial Systems Aleš Završnik, 2015-12-23 This book tackles the regulatory issues of Unmanned Aerial Systems (UAS) or Remotely Piloted Aerial Systems (RPAS) which have profound consequences for privacy, security, and other fundamental liberties. Collectively known as drones, they were initially deployed for military purposes: reconnaissance, surveillance, and extrajudicial executions. Today, we are witnessing a growth of their use into the civilian and humanitarian domain. They are increasingly used for goals as diverse as news gathering, aerial inspection of oil refinery flare stacks, mapping of the Amazonian rain forest, crop spraying, and search and rescue operations. The civil use of drones is becoming a reality in the European Union and in the US. The drone revolution may be a new technological revolution. Proliferation of the next generation of recreational drones shows how drones will be sold as any other consumer item. The cultural perception of the technology is shifting as drones are increasingly being used for humanitarian activities on one hand, but they can also firmly be situated in the prevailing modes of postmodern governance on the other hand. This work will be of interest to researchers in Criminology and Criminal Justice interested in issues related to surveillance, security, privacy, and technology. It will also provide a criminological background for related legal issues such as privacy law, aviation law, international criminal law, and comparative law. **Terror in Global Narrative** George Fragopoulos, Liliana M. Naydan, 2016-12-08 This is a collection of interdisciplinary essays that examines the historical, political, and social significance of 9/11. This collection considers 9/11 as an event situated within the much larger historical context of late capitalism, a paradoxical time in which American and capitalist hegemony exist as pervasive and yet under precarious circumstances. Contributors to this collection examine the ways in which 9/11 changed both everything and at the same time nothing at all. They likewise examine the implications of 9/11 through a variety of different media and art forms, including literature, film, television, and street art. **The Threat Of Terrorism** Juliet Lodge, 2019-07-11 This book is concerned with terrorism in West European liberal democratic states and with the way in which they react as a group in the European Community to international terrorism. It interprets terrorism as a means of attempting to effect political change by the indiscriminate use of violence.

Non-Western responses to terrorism Michael J. Boyle, 2019-01-11 This edited collection surveys how non-Western states have responded to the threats of domestic and international terrorism in ways consistent with and reflective of their broad historical, political, cultural, and religious traditions. It presents a series of eighteen case studies of counterterrorism.
