of custody disputes The author questions whether this minority comprises a unique population that requires separate uniquely developed intervention protocols He asks If the people who request forensic child custody evaluation comprise a unique population how useful are our assessment tools when they have not been validated on this distinctive group Proposing new assessment models that are in fact based on studies with this population Gould emphasizes that this is one of the fastest growing areas of professional involvement for practicing psychologists counselors and social workers Divided into three parts the book covers a conceptual framework the evaluation process and suggestions for the evaluator in preparing for court This book targets psychologists social workers and students in the fields of family social work family psychology family counseling forensic psychology family studies and family law **Mastering Expert Testimony** William T. Tsushima, Robert M.

Anderson, Jr., Robert M. Anderson, 1996-09 The past two decades have seen a rapidly growing involvement of psychologists and psychiatrists in legal proceedings for criminal cases divorces and traffic and industrial accidents Mental health professionals are traditionally not trained to cope with the legal responsibilities that arise from their routine clinical work and are eager to learn the professional skills that are needed in forensic settings There is presently no book which focuses entirely on the strategies and verbal tactics employed by attorneys who critically examine and challenge the testimony of mental health professionals If psychologists and psychiatrists can familiarize themselves with the kind of questions and verbal exchanges that take place in the courtroom they would be better prepared to provide their expertise in an effective manner This book fills that need Designed as a practical handbook to assist practitioners from all mental health disciplines it focuses on typical courtroom dialogue between attorneys and mental health professionals who testify regarding their psychotherapy clients and also those who are hired by attorneys specifically to provide expert opinions The authors who have extensive experience in the courtroom offer well thought out effective responses as contrasted with impulsive and weak answers to attorneys queries Actual cases are employed to illustrate typical challenges in various legal areas including criminal law child custody hearings and personal injury cases Certain forensic issues such as the scientific bases of expert opinions the accuracy of psychological vs medical tests and malingering are emphasized throughout the chapters The book is based on the belief that exposure to courtroom dialogue enhances the awareness of appropriate professional responses to an attorney s cross examination and greatly alleviates fear toward a situation well known to provoke intense levels of anxiety Although it is written alluding to the forensic psychologist or psychiatrist the strategies for the witness are readily applicable in most instances to all mental health professionals Issues such as therapist bias unconfirmed observations and cultural and ethnic factors are clearly relevant to all who provide mental health services *Clinical Neuropsychology and Cost Outcome Research* George Prigatano, Neil Pliskin, 2020-03-27 Neuropsychologists are being increasingly called upon to demonstrate the value of their services This edited book introduces clinical neuropsychologists to the concepts and challenges involved in conducting cost outcome research It provides examples of how such research can be conducted within clinical

neuropsychology and therefore is a beginning step in what must become an interdisciplinary effort. The text suggests that more than cost effectiveness studies should be considered when demonstrating the clinical utility of neuropsychological services. The concept of objective and subjective markers of value is emphasized particularly as it relates to measuring the impact of a neuropsychological examination. Chapters review the economic burdens associated with different neurological conditions commonly seen by neuropsychologists. They also provide examples of how clinical neuropsychological services to different patient populations may reduce costs and increase benefits and suggest directions for beginning cost outcome research. Furthermore, the book summarizes the utility of various neuropsychological services that may be helpful to readers concerned with healthcare economies. The book is intended as a resource for clinical neuropsychologists who wish to explain to healthcare providers the value of their work. It is the first book of the National Academy of Neuropsychology book series entitled *Neuropsychology: Scientific Bases and Clinical Application*. *Ethics in Psychology and the Mental Health Professions* Gerald P. Koocher, Patricia Keith-Spiegel, 2016. The completely updated fourth edition of *Ethics in Psychology and the Mental Health Professions* considers many of the ethical questions and dilemmas that mental health professionals encounter in their everyday practice, research, and teaching. **The Witness Stand and Lawrence S. Wrightsman, Jr.** Cynthia Willis-Esqueda, Brian H. Bornstein, 2015-11-25. This unique volume salutes the work of pioneering forensic psychologist Lawrence S. Wrightsman Jr. by presenting current theorizing and research findings on issues that define the field of psychology and law. Ongoing topics in witness behaviors, suspect identification, and juror decision making illustrate how psychology and law complement and also conflict at various stages in legal processes. The book also sheds light on evolving areas such as DNA exonerations, professional trial consulting, and jury selection strategies and the distinct challenges and opportunities these issues present. Noted contributors to the book include Wrightsman himself, who offers salient observations on the field that he continues to inspire. Featured among the topics: The credibility of witnesses; Psychological science on eyewitness identification and the U.S. Supreme Court; False confessions from colonial Salem to today; Identifying juror bias toward a new generation of jury selection research; Law and social science: how interdisciplinary is interdisciplinary enough?
