Principles of Property Law Alison Clarke, 2020-06-11

Principles of Property Law offers a critical and contextual analysis of fundamental property law providing students with the tools to enable them to make sense of English land law rules in the context of real world applications. This new book adopts a contextual approach placing the core elements of a qualifying law degree property and land law course in the context of general principles and practices as they have developed in the UK and other jurisdictions in response to a changing societal relationship with a variety of factors. Also drawing on concepts of property developed by political theorists, economists and environmentalists, *Principles of Property Law* gives students a clear understanding of how property law works, why it matters, and how the theory connects with the real world. Suitable for undergraduates studying property and land law in England, Wales and Northern Ireland, as well as postgraduate students seeking an accessible analysis.

Recentering the World Ryan Martínez Mitchell, 2022-11-03. *Recentering the World* recovers a richly contextual, detailed history of Western imposed legal structures in China, as well as engagements with international law by Chinese officials, jurists, and citizens. Beginning in the Late Qing era, it shows how international law functioned as a channel for power relations, techniques of economic domination, as well as novel forms of resistance. The book also radically diversifies traditionally Eurocentric accounts of modern international law's origins, demonstrating how by the mid-twentieth century Chinese jurists had made major contributions to international organizations and the UN system, the international judiciary, the laws of armed conflict, and more. Drawing on extensive archival research, this book is a valuable guide to China's often conflicted role in international law, its reception and contention of concepts of sovereignty, property, obligation, and autonomy, and its gradual move from the periphery to a shared spot at the center of global legal order.

Properties of Law Kaarlo Tuori, 2021-09-16. *Properties of Law* is a legal theoretical analysis about modern state law, about sociality, normativity, and plurality, as its properties, and what will come after modern state law. The main objective of this study is to offer a legal theoretical recapitulation of modern state law that avoids the fallacies of Legal Positivism. This calls for a relationist approach where law's sociality is related to normativity and normativity to sociality. Avoiding Legal Positivism's fallacies also includes refraining from extrapolating from modern state law to law in general, replacing Legal Positivism's conceptual universalism with sensitivity to the varieties of law, and acknowledging that law existed before modern state law, that it will exist after modern state law, and that other law exists alongside modern state law. The book concludes with a discussion of the impact of digitalization on law.

Making Commercial Law Through Practice 1830-1970 Ross Cranston, 2021-05-27. *Making Commercial Law Through Practice 1830-1970* adds a new dimension to the history of Britain's commerce, trade, manufacturing, and financial services by showing how they have operated in law over the last one hundred and forty years. In the main, law and lawyers were not the driving force; regulation was largely absent, and judges tended to accommodate commercial needs so that market actors were able to shape the law through their practices. Using legal and historical scholarship, the author draws on archival sources previously

unexploited for the study of commercial practice and the law's role in it. This book will stimulate parallel research in other subject areas of law. Modern commercial lawyers will learn a great deal about the current law from the story of its evolution and economic and business historians will see how the world of commerce and trade operated in a legal context. **Kinship, Law and Politics** Joseph E. David, 2020-07-02 An introduction to how belonging and identity have been reflected, modified and rearticulated in crucial moments throughout history. **Regulating the Sea** Margherita Pieraccini, 2022-12-22 This book is the first ever written on English marine conservation regulation from a socio-legal perspective. The monograph presents an in-depth analysis of key aspects of Marine Protected Areas regulation in England, offering the reader access to an under-investigated field. Such regulatory mapping is complemented by an interdisciplinary treatment of the subject, exploring the relationship between people and marine parks through central themes in environmental social sciences and regulatory theory, namely space rationalisation, democracy and adaptation. Thus, the book is of interest to environmental lawyers and regulatory scholars but also to human geographers, environmental sociologists and political scientists. As the book provides critical reflections on current legal and regulatory structures, it contains valuable insights for policymakers and regulators. The book has a strong methodological basis, drawing on in-depth desk-based research complemented by primary qualitative research conducted over a number of years. **Legalized Identities** Lucas Lixinski, 2021-04-08 Cultural heritage is a feature of transitioning societies, from museums commemorating the end of a dictatorship to adding places like the Auschwitz Birkenau concentration camp to the World Heritage List. These processes are governed by specific laws, and yet transitional justice discourses tend to ignore law's role, assuming that memory in transition emerges organically. This book debunks this assumption, showing how cultural heritage law is integral to what memory and cultural identity is possible in transition. Lixinski attempts to reengage with the original promise of transitional justice to pragmatically advance societies towards a future where atrocities will no longer happen. The promise in the UNESCO Constitution of lasting peace through cultural understanding is possible through focusing on the intersection of cultural heritage law and transitional justice, as Lixinski shows in this ground-breaking book. **Law Books Published**, 2000 **Positive Law from the Muslim World** Baudouin Dupret, 2021-06-24 Dupret explores how the concept of positive law operated in the Muslim world. **Vanishing Contract Law** Catherine Mitchell, 2022-09-01 English contract law provides the invisible framework that underpins and enables much contracting activity in society, yet the role of the law in policing many of our contracts now approaches vanishing point. The methods by which contracts come into existence and notionally create binding obligations have transformed over the past forty years. Consumers now enter into contracts through remote and automated processes on standard terms over which they have little control. This book explores the substantive weakening of the institution of contract law in a society heavily dependent on contracts. It considers significant areas of contracting activity that affect many people but that escape serious and sustained legal scrutiny. An accessibly written and succinct account of contract law's past, present and future, it assesses

the implications of a diminished contract law and the possibilities if any for its revival
