**Text Retrieval and Document Databases** John H. Ashford, Peter Willett, 1988 Text Retrieval and Document Databases, 1989 **Text Retrieval and Filtering** Robert M. Losee, 2012-12-06 Text Retrieval and Filtering Analytical Models of Performance is the first book that addresses the problem of analytically computing the performance of retrieval and filtering systems The book describes means by which retrieval may be studied analytically allowing one to describe current performance predict future performance and to understand why systems perform as they do The focus is on retrieving and filtering natural language text with material addressing retrieval performance for the simple case of queries with a single term the more complex case with multiple terms both with term independence and term dependence and for the use of grammatical information to improve performance Unambiguous statements of the conditions under which one method or system will be more effective than another are developed Text Retrieval and Filtering Analytical Models of Performance focuses on the performance of systems that retrieve natural language text considering full sentences as well as phrases and individual words The last chapter explicitly addresses how grammatical constructs and methods may be studied in the context of retrieval or filtering system performance The book builds toward solving this problem although the material in earlier chapters is as useful to those addressing non linguistic statistical concerns as it is to linguists Those interested in grammatical information should be cautioned to carefully examine earlier chapters especially Chapters 7 and 8 which discuss purely statistical relationships between terms before moving on to Chapter 10 which explicitly addresses linguistic issues Text Retrieval and Filtering Analytical Models of Performance is suitable as a secondary text for a graduate level course on Information Retrieval or Linguistics and as a reference for researchers and practitioners in industry **Multimedia Database in Perspective** Peter M.G. Apers, Henk M. Blanken, Maurice A.W. Houtsma, 2012-12-06 During the last decade multimedia has emerged as a major research and development area Pushed by advanced technology like huge capacity storage devices fast networks and powerful work stations new applications have arisen Many definitions of multimedia systems exist one of them being computer systems that support interactive use of at least one of the following information sources graphics image voice sound and video These systems have caused a boom in the world of entertainment but also in other business areas great opportunities for novel products and services are available The size of multimedia data is often huge and the storage of huge amounts of data is a task normally allocated to database management systems Although some modern database management systems offer facilities to support development of multimedia applications many problems related to multimedia support are still not well understood This book reports on research efforts to solve some of these problems An introductory knowledge of databases and also of operating systems and network technology is assumed The book is very suitable as material for courses at senior or graduate level but also for upgrading the skills of computer scientists working on database management systems multimedia systems or applications The book consists of four parts Part

It is called Requirements for a Multimedia Database and comprises chapters one to three Chapter one presents an outline of the book Databases in Historical Research Charles Harvey, Jon Press, 1995-12-18 This textbook builds knowledge progressively and sympathetically from first principles to advanced topics The authors explain how to take a project from the specification stage to completion and offer guidance on choice of approach techniques hardware and software Key ideas are presented in a readily understandable form through the use of diagrams and summary boxes and the text is brought to life through the use of case studies An ideal handbook for the undergraduate postgraduate and professional historian embarking on a dissertation or historical research

**Database and Expert Systems Applications** Trevor Bench-Capon, Giovanni Soda, Min A Tjoa, 1999-08-20 The Database and Expert Systems Applications DEXA conferences bring together researchers and practitioners from all over the world to exchange ideas experiences and opinions in a friendly and stimulating environment The papers are at once a record of what has been achieved and the first steps towards shaping the future of information systems DEXA covers a broad field and all aspects of database knowledge base and related technologies and their applications are represented Once again there were a good number of submissions 241 papers were submitted and of these the programme committee selected 103 to be presented DEXA 99 took place in Florence and was the tenth conference in the series following events in Vienna Berlin Valencia Prague Athens London Zurich Toulouse and Vienna The decade has seen many developments in the areas covered by DEXA developments in which DEXA has played its part I would like to express thanks to all the institutions which have actively supported and made possible this conference namely University of Florence Italy IDG CNR Italy FAW University of Linz Austria Austrian Computer Society DEXA Association In addition we must thank all the people who have contributed their time and effort to make the conference possible Special thanks go to Maria Schweikert Technical University of Vienna M Neubauer and G Wagner FAW University of Linz We must also thank all the members of the programme committee whose careful reviews are important to the quality of the conference

Research And Practical Issues In Databases - Proceedings Of The 3rd Australian Database Conference B Srinivasan, John Zeleznikow, 1992-01-08 This volume of proceedings contains original papers of good technical quality which present recent developments in databases and knowledge based systems and their applications to practical problems Topics covered include databases and temporal databases object oriented modelling and object oriented databases deductive databases distributed database and information systems database design issues and intelligent databases The papers reflect the importance of databases and the work being done on them *XML Databases and the Semantic Web* Bhavani Thuraisingham, 2002-03-27 Efficient access to data sharing data extracting information from data and making use of the information have become urgent needs for today's corporations With so much data on the Web managing it with conventional tools is becoming almost impossible New tools and techniques are necessary to provide interoperability as well as warehousing betw

**Database Systems For Advanced Applications '97 - Proceedings Of The 5th International Conference On Database Systems For Advanced Applications** Rodney Topor, Katsumi Tanaka, 1997-03-15 This volume contains the proceedings of the Fifth International Conference on Database Systems for Advanced Applications DASFAA 97 DASFAA 97 focused on advanced database technologies and their applications The 55 papers in this volume cover a wide range of areas in the field of database systems and applications including the rapidly emerging areas of the Internet multimedia and document database systems and should be of great interest to all database system researchers and developers and practitioners Computer Fundamentals DP Nagpal, 2008 Today computer has become an integral part of our life Some experts think that eventually the person who does not know how to use a computer will be handicapped in performing his or her job To become computer literate you should not only know the use of computers but also how and where they can be used If you are taking a course to familiarize yourself with the world of computers Computer Fundamentals serves as an interesting and informative guide in your journey to computer literacy *Database and Expert Systems Applications* A Min Tjoa, Roland Wagner, 2012-12-06 Use and development of database and expert systems can be found in all fields of computer science The aim of this book is to present a large spectrum of already implemented or just being developed database and expert systems Contributions cover new requirements concepts for implementations e g languages models storage structures management of meta data system architectures and experiences gained by using traditional databases in as many areas of applications as possible at least in the fields listed The aim of the book is to inspire a fruitful dialogue between development in practice users of database and expert systems and scientists working in the field *Database and Expert Systems Applications* Gerald Quirchmayr, Erich Schweighofer, Trevor J.M. Bench-Capon, 1998-08-14 This book constitutes the refereed proceedings of the 9th International Conference on Database and Expert Systems Applications DEXA 98 held in Vienna Austria in August 1998 The 81 revised full papers presented were carefully selected from a total of more than 200 submissions The papers are organized in sections on active databases object oriented systems data engineering information retrieval workflow and cooperative systems spatial

and temporal aspects document management spatial databases adaptation and view updates genetic algorithms cooperative and distributed environments interaction and communication transaction advanced applications temporal aspects oriented systems partitioning and fragmentation database queries data data warehouses knowledge discovery and data mining knowledge extraction and knowledge base reduction for comprehension and reuse

Computational and Information Science Jun Zhang, Ji-Huan He, Yuxi Fu, 2005-01-18 The 2004 International Symposium on Computational and Information Sciences CIS 2004 aimed at bringing researchers in the area of computational and formation sciences together to exchange new ideas and to explore new ground The goal of the conference was to push the application of modern computing technologies to science engineering and information technologies to a new level of sophistication and understanding The initial idea to organize such a conference with a focus on computation and applications was originated by Dr Jun Zhang during his visit to China in August 2003 in consultation with a few friends including Dr Jing Liu at the Chinese Academy of Sciences Dr Jun Hai Yong at Tsinghua University Dr Geng Yang at Nanjing University of Posts and Communications and a few others After several discussions with Dr Ji Huan He it was decided that Donghua University would host CIS 2004 CIS 2004 attempted to distinguish itself from other conferences in its phasis on participation rather than publication A submitted paper was only reviewed with the explicit understanding that if accepted at least one of the authors would attend and present the paper at the conference It is our lief that attending conferences is an important part of one s academic career through which academic networks can be built that may bene t one s academic life in the long run We also made every e ort to support graduate students in attending CIS 2004 In addition to set reduced registration fees for full time graduate students we awarded up to three prizes for to the Best Student Papers at CIS 2004 Students whose papers were selected for awards were given cash prizes plus a waiver of registration fees

*Computational And Information Science* Ji-Huan He, 2004-12-03 This book constitutes the refereed proceedings of the First International Symposium on Computational and Information Science CIS 2004 held in Shanghai China in December 2004 The 190 revised papers presented were carefully reviewed and selected from 450 submissions The papers address virtually all computational and algorithmic aspects in various sciences mathematics and engineering as well as data and information engineering The papers are organized in four main parts on high performance computing and algorithms computational modeling and simulation bioinformatics and medical informatics and data engineering and information science

**Indexing Techniques for Advanced Database Systems** Elisa Bertino, Beng Chin Ooi, Ron Sacks-Davis, Kian-Lee Tan, Justin Zobel, Boris Shidlovsky, Daniele Andronico, 2012-12-06 Recent years have seen an explosive growth in the use of new database applications such as CAD CAM systems spatial information systems and multimedia information systems The needs of these applications are far more complex than traditional business applications They call for support of objects with complex data types such as images and spatial objects and for support of objects with wildy varying numbers of index terms such as documents Traditional indexing techniques such as the B tree and

its variants do not efficiently support these applications and so new indexing mechanisms have been developed As a result of the demand for database support for new applications there has been a proliferation of new indexing techniques The need for a book addressing indexing problems in advanced applications is evident For practitioners and database and application developers this book explains best practice guiding the selection of appropriate indexes for each application For researchers this book provides a foundation for the development of new and more robust indexes For newcomers this book is an overview of the wide range of advanced indexing techniques Indexing Techniques for Advanced Database Systems is suitable as a secondary text for a graduate level course on indexing techniques and as a reference for researchers and practitioners in industry

**Text Retrieval Conference, 4th** D. K. Harman, 1998-07 Need new summary *Introduction to Modern Information Retrieval* Gobinda G. Chowdhury, 2010 An information retrieval IR system is designed to analyse process and store sources of information and retrieve those that match a particular user's requirements A bewildering range of techniques is now available to the information professional attempting to successfully retrieve information It is recognized that today's information professionals need to concentrate their efforts on learning the techniques of computerized IR However it is this book's contention that it also benefits them to learn the theory techniques and tools that constitute the traditional approaches to the organization and processing of information In fact much of this knowledge may still be applicable in the storage and retrieval of electronic information in digital library environments The fully revised third edition of this highly regarded textbook has been thoroughly updated to incorporate major changes in this rapidly expanding field since the second edition in 2004 and a complete new chapter on citation indexing has been added Unique in its scope the book covers the whole spectrum of information storage and retrieval including users of IR and IR options database technology bibliographic formats cataloguing and metadata subject analysis and representation automatic indexing and file organization vocabulary control abstracts and indexing searching and retrieval user centred models of IR and user interfaces evaluation of IR systems and evaluation experiments online and CD ROM IR multimedia IR hypertext and mark up languages web IR intelligent IR natural language processing and its applications in IR citation analysis and IR IR in digital libraries and trends in IR research Illustrated with many examples and comprehensively referenced for an international audience this is an indispensable textbook for students of library and information studies It is also an invaluable aid for information practitioners wishing to brush up on their skills and keep up to date with the latest techniques

**Database Systems for Advanced Applications** Hiroyuki Kitagawa, Yoshiharu Ishikawa, Wenjie Li, Chiemi Watanabe, 2010-03-18 This two volume set LNCS 5981 and LNCS 5982 constitutes the refereed proceedings of the 15th International Conference on Database Systems for Advanced Applications DASFAA 2010 held in Tsukuba Japan in April 2010 The 39 revised full papers and 16 revised short papers presented together with 3 invited keynote papers 22 demonstration papers 6 industrial papers and 2 keynote talks were carefully reviewed and selected from 285 submissions The papers of the first volume are organized in topical sections

on P2P based technologies data mining technologies XML search and matching graphs spatialdatabases XML technologies time series and streams advanced data mining query processing Web sensor networks and communications information management as well as communities and Web graphs The second volume contains contributions related to trajectories and moving objects skyline queries privacy and security data streams similarity search and event processing storage and advanced topics industrial demo papers and tutorials and panels

*Information Computing and Applications, Part II* Rongbo Zhu,Yanchun Zhang,Baoxiang Liu,Chunfeng Liu,2010-09-27 This volume contains the proceedings of the International Conference on Information Computing and Applications ICICA 2010 which was held in Tangshan China October 15 18 2010 As future generation information technology information computing and applications become specialized information computing and applications cluding hardware software communications and networks are growing with ever increasing scale and heterogeneity and becoming overly complex The complexity is getting more critical along with the growing applications To cope with the growing and computing complexity information computing and applications focus on intelligent selfmanageable scalable computing systems and applications to the maximum extent possible without human intervention or guidance With the rapid development of information science and technology information computing has become the third approach of science research Information computing and applications is the field of study concerned with constructing intelligent computing mathematical models numerical solution techniques and using computers to analyze and solve natural scientific social scientific and engineering problems In practical use it is typically the application of computer simulation intelligent computing internet computing pervasive computing scalable computing trusted computing autonomy oriented computing evolutionary computing mobile computing computational statistics engineering computing multimedia networking and computing applications and other forms of computation problems in various scientific disciplines and engineering Information computing and applications is an important underpinning for techniques used in information and computational science and there are many unresolved problems that address worth studying
