Ophthalmology Mark Batterbury, 2009 *A Text Book of Ophthalmology (Classic Reprint)* John W. Wright, 2016-09-16
Excerpt from *A Text Book of Ophthalmology*. No apology can be necessary for the issuance of a work of this kind when it is known that there is not a treatise that is particularly designed for the student in his class work in college, most works being intended for the skilled oculist. The arrangement of the subjects has been made in keeping with the needs of the student: first the anatomy and physiology of the eye, then the diseases and their treatment in such natural order that the subject treated is designed to prepare him as well as possible at each recitation for that which follows. While this treatise is especially intended for the student in his class work at college, it is no less adaptable for him as a general practitioner for what is necessary for the student to know and understand thoroughly in reference to a knowledge of the anatomy, diagnosis and treatment of an affection of the eye. In the most concise and practical form, it is equally suited to the general practitioner. About the Publisher: Forgotten Books publishes hundreds of thousands of rare and classic books.
