scientists brought those visions to reality This is a fresh analysis of Bomber Command its tactics and technology It discusses exactly how well organised Bomber Command was to exploit the rapidly evolving new science and technology of new type of warfare How much did the concept of Allied and German morale influenced the Commands operational plans What was the influence of the Research and Experiments Dept of the Ministry of Home Security and of university scientists such as Tizard and Cherwell This book delves into the research into high explosives and firebombing techniques newly designed bombs and their devastating effect on the enemy Why in the early war days was the RAF bombers armament so ineffective the navigation so imprecise and the bombing accuracy so poor This book also discusses the many varying moral issues that even to this day still rage between those who feel guilt for the destruction of so many German cities and those who see moral justification in the eventual Allied victory
