The General and the Frogs Mirghani Hassan,2014-02-14 In a Sub Saharan African country vulnerable to the whims of its dyslexic and tyrannical ruler a young man named Abdulkoneim Ghoriresh enrolls in the countrys famed university laden with the scars of a recent family tragedy On his first night on campus as he falls asleep on the lawn Abdul has barely nodded off before he is jolted awake by hundreds of frogs croaking in eerie unison And so begins Abduls satirical campus journey with five other desperately poor yet immensely motivated students collectively known as Les Misrables As the nation chokes under the haze of dictatorship campus residents must endure the theocratic chauvinism of a students union controlled by radical Islamists Trapped in the labyrinths of political repression religious dogmatism and the horrors of final exams the skeptical and talented Les Misrables cultivate an extraordinary capacity for transforming despair into dark and hilarious tall tales Amid the turbulent chaos of their existence the six survive an uprising against the dyslexic tyrant while achieving academic distinction Even so a gruesome murder of a friend casts insufferable sorrow at the end of a remarkable odyssey The General and the Frogs is a tale of the incredible power of humour and of the triumph of the human spirit at a time lived most dangerously

Popular Music Roman Iwaschkin,2016-04-14 This is a comprehensive guide to popular music literature first published in 1986 Its main focus is on American and British works but it includes significant works from other countries making it truly international in scope *Human Factors of a Global Society* Tadeusz Marek,Waldemar Karwowski,Marek Frankowicz,Jussi Kantola,Pavel Zgaga,2014-06-02 During the last 60 years the discipline of human factors HF has evolved alongside progress in engineering technology and business Contemporary HF is clearly shifting towards addressing the human centered design paradigm for much larger and complex societal systems the effectiveness of which is affected by recent advances in engineering scien

Personality Assessment Robert P.

Archer, Steven R. Smith, 2011-05-20 Personality Assessment provides an overview of the most popular self report and performance based personality assessment instruments. Designed with graduate level clinical and counseling psychology programs in mind the book serves as an instructional text for courses in objective or projective personality assessment. It provides coverage of eight of the most popular assessment instruments used in the United States from authors key in creating or developing the research base for these test instruments. The uniquely informed perspective of these leading researchers as well as chapters on clinical interviewing test feedback and integrating test results into a comprehensive report will offer students and clinicians a level of depth and complexity not available in other texts.

Peptide Growth Factors and Their Receptors I Michael B. Sporn, Anita B. Roberts, 2012-12-06 This two volume treatise the collected effort of more than 50 authors represents the first comprehensive survey of the chemistry and biology of the set of molecules known as peptide growth factors. Although there have been many symposia on this topic and numerous publications of reviews dealing with selected subsets of growth factors the entire field has never been covered in a single treatise. It is essential to do this at the present time as the number of journal articles on peptide growth factors now makes it almost impossible for anyone person to stay informed on this subject by reading the primary literature. At the same time it is becoming increasingly apparent that these substances are of universal importance in biology and medicine and that the original classification of these molecules based on the laboratory setting of their discovery as growth factors lymphokines cytokines or colony stimulating factors was quite artifactual they are in fact the basis of a common language for intercellular communication. As a set they affect essentially every cell in the body and in this regard they provide the basis to develop a unified science of cell biology germane to all of biomedical research. This treatise is divided into four main sections. After three introductory chapters its principal focus is the detailed description of each of the major peptide growth factors in 26 individual chapters.

The Causes of High and Low Reading Achievement Ronald P. Carver, 2000-02-01 This book describes all of the important factors that cause some students to have low reading achievement and others to have high reading achievement. It concentrates on the main factors that influence how much a student gains in reading achievement during a year of school or a calendar year. An attempt is made to answer the following questions what can educators do to increase reading achievement and what is beyond their influence. The author is directly concerned with achievement associated with normal or typical reading. The focus of the book is on things teachers can do during an entire school year that are likely to improve the reading level and reading rate of students which in turn will increase their reading achievement. This effort to specify the most important causes of high and low reading achievement represents an integration of two disciplines of scientific psychology experimental psychology and psychometrics. A glossary at the end of the book contains definitions of terms and concepts. Helpful appendices explain reading theory the three laws of reading theory and the equations that can be used to predict the accuracy of reading comprehension provide conversions among units of reading rate and list the numbered
