The Magic Of The Past:

Magic: A History Chris Gosden, 2020-11-10 An Oxford professor of archaeology explores the unique history of magic the oldest and most neglected strand of human behavior and its resurgence today Three great strands of belief run through human history Religion is the relationship with one god or many gods masters of our lives and destinies Science distances us from the world turning us into observers and collectors of knowledge And magic is direct human participation in the universe we have influence on the world around us and the world has influence on us Over the last few centuries magic has developed a bad reputation thanks to the unsavory tactics of shady practitioners and to a successful propaganda campaign on the part of religion and science which denigrated magic as backward irrational and primitive In Magic however the Oxford professor of archaeology Chris Gosden restores magic to its essential place in the history of the world revealing it to be an enduring element of human behavior that plays an important role for individuals and cultures From the curses and charms of ancient Greek Roman and Jewish magic to the shamanistic traditions of Eurasia indigenous America and Africa from the alchemy of the Renaissance to the condemnation of magic in the colonial period and the mysteries of modern quantum physics Gosden's startling fun and colorful history supplies a missing chapter of the story of our civilization Drawing on decades of research around the world touching on the first known horoscope a statue ordered into exile and the mystical power of tattoos Gosden shows what magic can offer us today and how we might use it to rethink our relationship with the world Magic is an original singular and sweeping work of scholarship and its revelations will leave a spell on the reader

The Magic of Yggdrasill Yves Kodratoff, 2020 This book took its start with the author's realization that what Old Norse calls magic can be understood as unconscious as stated by C G Jung we find magical means everything where unconscious influences are at work This book reveals the existence of several Norse words specifically dedicated to magic as are sk p for instance and it details the magic they carry with them In our modern

civilization these skop still exist but their magical nature is no longer obvious though this point can be disputed Once this magic is discovered and acknowledged it becomes possible to infer from Norse poetry the existence and handling of unconscious archetypes within its associated myths A few of them have been analyzed in detail and this enabled us to better understand some surprising traits of this mythology up to detecting magical spells imbedded within Norse poetry they are usually dubbed as Galdralag The book ends by sending to the readers a positive of such spells by which Odinn self increased his thoughts and deeds as given in Havamal The book aims at four logically connected targets 1 spotting Poetic Edda stanzas using a vocabulary calling upon magic for improving our knowledge of ancient Norse magic 2 checking that no convincing proof of Christian influences on Poetic Edda had been provided by the academic community 3 spotting a few images of Old Norse unconscious archetypes and 4 finding a few typical instances of the Eddaic meter called Galdralag incantation meter

The Secret History of Magic Peter Lamont,Jim Steinmeyer,2018-07-17 Pull back the curtain on the real history of magic and discover why magic really matters If you read a standard history of magic you learn that it begins in ancient Egypt with the resurrection of a goose in front of the Pharaoh You discover how magicians were tortured and killed during the age of witchcraft You are told how conjuring tricks were used to quell rebellious colonial natives The history of magic is full of such stories which turn out not to be true Behind the smoke and mirrors however lies the real story of magic It is a history of people from humble roots who made and lost fortunes and who deceived kings and queens In order to survive they concealed many secrets yet they revealed some and they stole others They engaged in deception exposure and betrayal in a quest to make the impossible happen They managed to survive in a world in which a series of technological wonders appeared which previous generations would have considered magical Even today when we now take the most sophisticated technology for granted we can still be astonished by tricks that were performed hundreds of years ago The Secret History of Magic reveals how this was done It is

about why magic matters in a world that no longer seems to have a place for it but which desperately needs a sense of wonder

Prayer, Magic, and the Stars in the Ancient and Late Antique World Scott Noegel, Joel Walker Walker, 2010-11-01 In the religious systems of ancient Mesopotamia Egypt and the Mediterranean gods and demigods were neither abstract nor distant but communicated with mankind through signs and active intervention Men and women were thus eager to interpret appeal to and even control the gods and their agents In Prayer Magic and the Stars in the Ancient and Late Antique World a distinguished array of scholars explores the many ways in which people in the ancient world sought to gain access to or in some cases to bind or escape from the divine powers of heaven and earth Grounded in a variety of disciplines including

Assyriology Classics and early Islamic history the fifteen essays in this volume cover a broad geographic area Greece Egypt Syria Palestine Mesopotamia and Persia Topics include celestial divination in early Mesopotamia the civic festivals of classical Athens and Christian magical papyri from Coptic Egypt Moving forward to Late Antiquity we see how Judaism Christianity and Islam each incorporated many aspects of ancient Near Eastern and Graeco Roman religion into their own prayers rituals and conceptions Even if they no longer conceived of the sun moon and the stars as eternal or divine Christians Jews and Muslims often continued to study the movements of the heavens as a map on which divine power could be read The reader already familiar with studies of ancient religion will find in Prayer Magic and the Stars both old friends and new faces Contributors include Gideon Bohak Nicola Denzey Jacco Dieleman Radcliffe Edmonds Marvin Meyer Michael G Morony Ian Moyer Francesca Rochberg Jonathan Z Smith Mark S Smith Peter Struck Michael Swartz and Kasia Szpakowska Published as part of Penn State s Magic in History series Prayer Magic and the Stars appears at a time of renewed interest in divination and occult practices in the ancient world It will interest a wide audience in the field of comparative religion as well as students of the ancient world and late antiquity
