The Making Of Frenchmen Current Directions In The History Of Education In France 16791979:

The Making of Frenchmen Donald N. Baker, Patrick Joseph Harrigan, 1980 **Toward a Social History of Knowledge** Fritz Ringer, 2001-01-01 One of the foremost historians of intellectual life and education in Germany Fritz Ringer has brought together in this volume several of his articles most of which are not easily available are published here in English for the first time They focus on a whole range of contemporary and historical debates about the relationship between ideas and their context the role of education and middle class consciousness the social role of academics and intellectuals and competing ideals of learning science and history **A Social History of France 1780-1914** Peter McPhee, 2017-03-03 This volume provides a lively and authoritative synthesis of recent work on the social history of France and is now thoroughly updated to cover the long nineteenth century from 1789 1914 Peter McPhee offers both a readable narrative and a distinctive coherent argument about this remarkable century and explores key themes such as Peasant interaction with the environment The changing experience of work and leisure The nature of crime and protest Changing demographic patterns and family structures The religious practices of workers and peasants The ideology and internal repercussions of colonisation At the core of this social history is the exercise and experience of social relations of power not only because in these years there were four periods of protracted upheaval but also because the history of the workplace of relations between women and men adults and children is all about human interaction Stimulating and enjoyable to read this indispensable introduction to nineteenth century France will help readers to make sense of the often bewildering story of these years while giving them a better understanding of what it meant to be an inhabitant of France during that turbulent time **The Rise of Professional Women in France** Linda L. Clark, 2000-12-21 This history of professional women in positions of administrative responsibility illuminates women s changing relationship to the public sphere in France since the Revolution of 1789 Linda L. Clark traces several generations of French women in public administration examining public policy and politics attitudes towards gender and women s work and education Women s own perceptions and assessments of their positions illustrate changes in gender roles and women s relationship to the state With seniority based promotion maternity leaves and the absence of the marriage bar the situation of French women administrators invites comparison with their counterparts in other countries Why has the profile of women s employment in France differed from that in the USA and the UK This study gives unique insights into French social political and cultural history and the history of women during the nineteenth and twentieth centuries It will interest scholars of European history and also specialists in women s studies *A Revolution in Language* Sophia A. Rosenfeld, Sophia Rosenfeld, 2003-08-01 What is the relationship between the ideas of the Enlightenment and the culture and ideology of the French Revolution This book takes up that classic question by concentrating on changing conceptions of language and especially signs during the second half of the eighteenth century The author traces first the emergence of a new interest in the possibility of gestural communication within the philosophy theater and pedagogy of the

last decades of the Old Regime She then explores the varied uses and significance of a variety of semiotic experiments including the development of a sign language for the deaf within the language politics of the Revolution A Revolution in Language shows not only that many key revolutionary thinkers were unusually preoccupied by questions of language but also that prevailing assumptions about words and other signs profoundly shaped revolutionaries efforts to imagine and to institute an ideal polity between 1789 and the start of the new century This book reveals the links between Enlightenment epistemology and the development of modern French political culture **Madame le Professeur** Jo Burr

Margadant,2019-01-15 A collective biography of France s first generation of female secondary schoolteachers this book examines the conflict between their public and private lives and places their new professional standing wtihin the political culture of the Third Republic Jo Burr Margadant charts the responses of women who attended the normnal school of Sevres during the 1880s to their roles as teachers and subordinates in the public school system their plight as outsiders in the social community and their gains toward educational reforms These women emerge as pioneers struggling to forge careers in an elite profession which was separate and inferior to its male equivalent and also controlled by men Margadant explains that the first women teacher in girls colleges and lycees were expected to project an intellectually assertive presence in the classroom while maintaining a maternal solicitude toward students and a modest self effacing style with superiors Many who succeeded progressed to administrative jobs and in some cases filled official posts left vacant by men during the First World War The author shows how these achievements led to the transformations of girls secondary schools into replicas of those for boys and to equal treatment for women and men in the teaching profession Jo Burr Margadant is Lecturer in History at Santa Clara University Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Culture, Identity and**

Nationalism Timothy Baycroft,2004 This study examines the evolution of national and regional cultural and political identities in that northern region of France which borders Belgium over the two centuries which followed the French Revolution During that time the region was transformed by the development of the industrial economy population shifts war and occupation and numerous changes of political regime Through an analysis of a wide range of issues including language regional and national political movements educational policy attitudes towards immigrants and the border the press trade unions and the church as well as the attitude of the French State the author questions traditional interpretations of the process of national assimilation in France At the same time he illustrates how the Franco Belgian border originally an arbitrary line through a culturally homogeneous region became not only a significant marker for the identity of the French

Flemish but a real cultural division TIMOTHY BAYCROFT is lecturer in French history University of Sheffield Europe
Peter Rietbergen,2020-12-30 Fully revised updated and extended to include the momentous developments of 2020 this fourth
edition of Peter Rietbergen s highly acclaimed Europe A Cultural History is a major and original contribution to the study of
Europe The book examines the structures of culture in this part of Eurasia from the beginnings of human settlement on to the
genesis of agricultural society of greater polities of urban systems and the slow transitions that resulted in a post industrial
society and the individualistic mass culture of the present Using both economic and socio political analytical concepts the
volume outlines cultural continuity and change in Europe through the lenses of literature the arts science technology and
music to show the continent s ever changing identities In a highly readable style it expertly contextualizes such diverse and
wide ranging topics as Celtic society the Roman legal system the oppositions between elite and popular culture in pre
industrial Europe Michelangelo s world view the interaction between the Enlightenment and Romanticism the growth of a
society of time and money the appeal of fascism and other totalitarian ideologies and the ways the songs of Sting express late
twentieth century thinking Structured both chronologically and thematically the text is distinctive in the attention
consistently paid to the many ways Europe has been formed through its contacts with non European cultures especially those
of Asia and the Americas This edition concludes with an epilogue that discusses the ways Europe s recent past including the
long term efforts at further unification and the various forms of opposition against it has been both interpreted and
misinterpreted the importance of globalization and the major challenges facing Europe in the present amongst which are the
consequences of the pandemic of 2020 With a wide selection of illustrations maps excerpts from primary sources and even
lyrics from contemporary songs to support its arguments the text remains the definitive cultural history of Europe for both
the general reader and students of European history and culture *History of Education: Studies of education systems* Roy
Lowe,2000 *In pursuit of politics* Adrian O'Connor,2017-11-07 This study offers a new interpretation of the debates over
education and politics in the early years of the French Revolution Following these debates from the 1760s to the Terror 1793
94 and putting well known works in dialogue with previously neglected sources it situates education at the centre of
revolutionary contests over citizenship participatory politics and representative government The book takes up education s
role in a dramatic period of uncertainty and upheaval anxiety and ambition It traces the convergence of philosophical
political ideological and practical concerns in Ancien R gime debates and revolutionary attempts to reform education and
remake society In doing so it provides new insight into the relationship between the Enlightenment and the French
Revolution and sheds light on how revolutionary legislators and ordinary citizens worked to make a new sort of politics
possible in eighteenth century France
