The Malvern Hills An Archaeological Landscape:

The Malvern Hills Mark Bowden, 2013-04-15 Examines the landscape of the Malvern Hills a ridge of ancient volcanic rocks along the western edge of the Severn Valley The survey ranges from the early prehistoric period to the present day including the two large Iron Age hillforts on the ridge

Landscapes Through the Lens David C. Cowley, Robin A. Standing, Matthew J. Abicht, 2010-11-11 This volume presents the rich but under utilised and in parts inaccessible archival historic aerial imagery traditional photographs and those captured from satellites for the exploration and management of cultural heritage An unparalleled resource for archaeologists and all with an interest in landscapes images spanning the second half of the 20th century provide an unrivalled means of documenting and understanding change and informing the study of the past Case studies written by leading experts in their fields illustrate the applications of this imagery across a wide range of heritage issues from prehistoric cultivation and settlement patterns to the impact of recent landscape change Contemporary environmental and land use issues are also dealt with in a volume that will be of interest to archaeologists historians geographers and those in related disciplines

The Archaeological Journal, 2006 **Assessing Iron Age**

Marsh-Forts Shelagh Norton, 2021-10-07 This volume assesses marsh forts as a separate phenomenon within Iron Age society through an understanding of their landscape context and palaeoenvironmental development These substantial monuments appear to have been deliberately constructed to control areas of marginal wetland and may have played an important role in the ritual landscape

Beacons in the Landscape Ian Brown, 2009-07-20 Of all Britain's great archaeological monuments the Iron Age hillforts have arguably had the most profound impact on the landscape if only because there are so many yet we know very little about them Were they recognised as being something special by those who created them or is the hillfort purely an archaeologists construct How were they constructed who lived in them and to what uses were they put This book which is richly illustrated with photography of sites throughout England and Wales addresses these and many other questions After discussing the difficult issue of definition and the great excavations on which our knowledge is based Ian Brown investigates in turn hillforts origins their architecture and the role they played in Iron Age society He also discusses the latest theories about their location social significance and chronology The book provides a valuable synthesis of the rich vein of research carried out in Britain on hillforts over the last thirty years Hillforts great variability poses many problems and this book should help guide both the specialist and non specialist alike though the complex literature Furthermore it has an important conservation objective Land use in the modern era has not been kind to these monuments with a significant number either disfigured or lost Public consciousness of their importance needs raising if their management is to be improved and their future assured

Westward on the High-Hilled Plains Derek Hurst, 2017-03-31 The West Midlands has struggled archaeologically to project a distinct regional identity having largely been defined by reference to other areas with a stronger cultural identity and history such as Wessex the South West and the

North Only occasionally has the West Midlands come to prominence for instance in the middle Saxon period viz the kingdom of Mercia or much later with rural south Shropshire being the birthplace of the Industrial rRevolution Yet it is a region rich in natural mineral resources set amidst readily productive farmland and with major rivers such as the Severn facilitating transportation The scale of its later prehistoric monuments notably the hillforts proclaims the centralisation of some functions whether for security exchange or emulation while society supported the production and widespread distribution of specialised craft goods Finally towards the close of prehistory localised kingdoms can be seen to emerge into view In the course of reviewing the evidence for later prehistory from the Middle Bronze Age to Late Iron Age the papers presented here adopt a variety of approaches being either regional county wide or thematic eg by site type or artefactual typology and they also encompass the wider landscape as reconstructed from environmental evidence This is the second volume in a series The Making of the West Midlands that explores the archaeology of the English West Midlands region from the Lower Palaeolithic onwards These volumes based on a series of West Midlands Research Framework seminars aim to transform perceptions of the nature and significance of the archaeological evidence across a large part of central Britain **Of Mud and Flame**
