The Man Who Tasted Shapes:

The Man Who Tasted Shapes, revised edition Richard E. Cytowic, 2003-08-11 In this medical detective adventure Cytowic shows how synesthesia or joined sensation illuminates a wide swath of mental life and leads to a new view of what it means to be human Richard Cytowic's dinner host apologized There aren't enough points on the chicken He felt flavor also as a physical shape in his hands and the chicken had come out too round This offbeat comment in 1980 launched Cytowic's exploration into the oddity called synesthesia He is one of the few world authorities on the subject Sharing a root with anesthesia no sensation synesthesia means joined sensation whereby a voice for example is not only heard but also seen felt or tasted The trait is involuntary hereditary and fairly common It stayed a scientific mystery for two centuries until Cytowic's original experiments led to a neurological explanation and to a new concept of brain organization that accentuates emotion over reason That chicken dinner two decades ago led Cytowic to explore a deeper reality that he argues exists in everyone but is often just below the surface of awareness which is why finding meaning in our lives can be elusive In this medical detective adventure Cytowic shows how synesthesia far from being a mere curiosity illuminates a wide swath of mental life and leads to a new view of what it means to be human a view that turns upside down conventional ideas about reason emotional knowledge and self understanding This 2003 edition features a new afterword [The Man who Tasted Shapes](#) Richard E. Cytowic, 1993 Cytowic examines the world of synesthetes and the nature of memory the roots of creativity the feasibility of artificial intelligence and the importance of subjectivity in medical research [Man Who Tasted Shapes](#) R. Cytowic, 1994-02-24 *The Man who Tasted Shapes* Richard E. Cytowic, 1995 Cytowic examines the world of synesthetes and the nature of memory the roots of creativity the feasibility of artificial intelligence and the importance of subjectivity in medical research [Synesthesia](#) Richard E. Cytowic, 2002 A biologically oriented introduction to synesthesia by the leading authority on the subject *Synaesthesia* John E. Harrison, 2001 Synaesthesia is a confusion of the senses whereby stimulation of one sense triggers stimulation in a completely different sensory modality A synaesthete might claim to be able to hear colours taste shapes describe the colour shape and flavour of someone's voice or music the sound of which looks like shards of glass Throughout history many notable artists and writers have claimed to suffer from synaesthesia including Arthur Rimbaud Wassily Kandinsky Vladimir Nabokov and David Hockney The condition remains as controversial now as when first brought to the public eye many years ago one notable scientist dismissing it as mere romantic neurology In Synaesthesia the strangest thing a world authority on synaesthesia takes us on a fascinating tour of this mysterious condition looking at historical incidences of synaesthesia unraveling the theories for the condition and additionally examining the claims to synaesthesia of the likes of Rimbaud Baudelaire and others The result is an exciting yet scientific account of an incredible condition one that will tell us of a world rich with the most unbelievable sensory experiences From the foreword by Simon Baron Cohen University of Cambridge Aside from inspiring fellow researchers this book will do much to educate the

general public about the important but often overlooked point that we do not all experience this universe in the same way For the most part synaesthetes would not wish to be free of their synaesthesia and if anything feel somewhat sorry for the rest of us as we go about our unisensual existence My guess is that John Harrison's valuable book will ring a colourful bell for many people who until now did not realize that their experience had a name and who will now be able to identify themselves with like minded others For all these reasons this is quite a book **The Man who Tasted Shapes** Richard E.
