The Many Faces Of Imitation In Language Learning:

The Many Faces of Imitation in Language Learning Gisela E. Speidel, Keith E. Nelson, 2012-12-06 In this book we take a fresh look at imitation With the knowledge of some 20 years of research after Chomsky's initial critique of the behavioristic approach to language learning it is time to explore imitation once again How imitation is viewed in this book has changed greatly since the 1950s and can only be understood by reading the various contributions This reading reveals many faces many forms many causes and many functions of imitation cognitive social information processing learning and biological Some views are far removed from the notion that an imitation must occur immediately or that it must be a perfect copy of an adult sentence But the essence of the concept of imitation is retained Some of the child's language behavior originates as an imitation of a prior model The range of phenomena covered is broad and stimulating Imitation's role is discussed from infancy on through all stages of language learning Individual differences among children are examined in how much they use imitation and in what forms and to what purposes they use it The forms and functions of parent imitation of their child are considered Second language learning is studied alongside first language learning The juxtaposition of so many views and facets of imitation in this book will help us to study the commonalities as well as differences of various forms and functions of imitative language and will help us to discern the further dimensions along which we must begin to differentiate imitation

Language Acquisition and Development Brian Tomlinson, 2007-04-01 Examines language acquisition and development across a wide range of languages and contexts

Reaching Into Thought Anne E. Russon, Kim A. Bard, Sue Taylor Parker, 1998-11-26 What special qualities of mind set the great apes apart from other nonhuman primates and indeed

from ourselves In this book field and laboratory researchers show that the great apes have high level abilities in both social and ecological domains including tool use pretense self awareness deception consolation teaching and culture itself Great apes are also shown to be capable of thinking at symbolic levels traditionally considered to be uniquely human Here the mechanisms involved in building these abilities especially the lengthy developmental and enculturation processes are emphasized showing how new discoveries are changing views on how primates and human intelligence evolved This book is for anyone interested in current research and theoretical views of great ape cognition **Second and Foreign Language**

Learning Through Classroom Interaction Joan Kelly Hall,Lorrie Stoops Verplaetse,2000-06 Brings together a set of papers that share the current theoretical interest in re conceptualizing second foreign language learning from a sociocultural perspective with practical concerns about second foreign language pedagogy **Lexical Diversity and Language**

Development D. Malvern,B. Richards,N. Chipere,P. Durán,2004-05-28 Vocabulary richness including lexical diversity and use of rare words has an important role in assessing proficiency diagnosing progress and testing theory in the study of language development This book reviews different methods for quantifying how vocabulary is deployed in spontaneous speech and writing before introducing an alternative approach which can assess overall lexical diversity measure morphology development and compare the development of different word classes The new approach is illustrated by its application to first and second language learners **Language in Use** Patrick Griffiths,Andrew John Merrison,Aileen Bloomer,2020-07-24

Designed for introductory students this collection of key readings in language and linguistics will take readers beyond their introductory textbook and introduce them to the thoughts and writings of many esteemed authorities The reader includes seminal papers new or controversial pieces to stimulate discussion and reports on applied work Language in Use is split into four parts Language and Interaction Language Systems Language and Society and Language and Mind covers all the topics of language study including conversation analysis pragmatics power and politeness semantics grammar phonetics multilingualism child language acquisition and psycholinguistics has readings from authorities including Pinker Fairclough Crystal Le Page and Tabouret Keller Hughes Trudgill and Watt Halliday Sacks Mills Obler and Gjerlow provides comprehensive editorial support for each reading with introductions activities or discussion points to follow and further reading Is supported by a companion website offering extra resources for students including additional activities useful weblinks and advice from the authors Designed for use as a companion to Introducing Language in Use Routledge 2005 but also highly usable as a stand alone text this Reader will introduce readers to the wide world of linguistics and applied linguistics **Piaget, Evolution, and Development** Jonas Langer,Melanie Killen,1998-06 This volume brings the current

interest in primate cognition to bear on studies of cognitive development in humans with chapters from leading researchers in both areas For cognitive developmentalists and primatologists and comparative psychologists **Language**

Development and Social Interaction in Blind Children Miguel Perez Pereira,Gina Conti-Ramsden,2019-12-09 The

Classic Edition of this foundational text includes a new preface from Miguel Perez Pereira examining how the field has developed since first publication. The volume provides an in depth account of blind children's developing communicative abilities with particular emphasis on social cognition and language acquisition from infancy to early school age. It provides insights into why the development of blind children may differ from that of sighted children and explores development of theory of mind and perspective taking in language learning. It also discusses the caregiver-child interaction research on early intervention and practical strategies for blind children that can assist parents and practitioners. The up to date preface discusses recent neurological research and the comparison between the psychological development of visually impaired and autistic children. Language Development and Social Interaction in Blind Children continues to facilitate dialogue between those interested in the study of typically developing children and those interested in the development of children who are blind and challenges some widely held beliefs about the development of communication in blind children. Biological and Behavioral Determinants of Language Development Norman A. Krasnegor, Duane M. Rumbaugh, Richard L. Schiefelbusch, Michael Studdert-Kennedy, Esther Thelen, 2014-02-25. This book presents a current interdisciplinary perspective on language requisites from both a biological comparative perspective and from a developmental learning perspective. Perspectives regarding language and language acquisition are advanced by scientists of various backgrounds: speech hearing, developmental psychology, comparative psychology, and language intervention. This unique volume searches for a rational interface between findings and perspectives generated by language studies with humans and with chimpanzees. Intended to render a reconsideration as to the essence of language and the requisites to its acquisition, it also provides readers with perspectives defined by various revisionists who hold that language might be other than the consequence of a mutation unique to humans and might fundamentally not be limited to speech.
