Kicking the Sacred Cow James P. Hogan, 2004 Galileo may have been forced to deny that the Earth moves around the Sun but in the end science triumphed Nowadays science fearlessly pursues truth shining the pure light of reason on the mysteries of the

universe Or does it As bestselling author James P Hogan demonstrates in this fact filled and thoroughly documented study science has its own roster of hidebound pronouncements which are Not to be Questioned And those who question them may face a modern day Inquisition As the author puts it This book is not concerned with cranks or simple die hards who are entitled to their foibles and come as part of life s pattern Rather it looks at instances of present day orthodoxies tenaciously defending beliefs in the face of what would appear to be verified fact and plain logic or doggedly closing eyes and minds to ideas whose time has surely come In short where scientific authority seems to be functioning more in the role of religion protecting doctrine and putting down heresy than championing the spirit of the free inquiry that science should be Among the dogma laden topics he examines are Darwinism global warming the big bang problems with relativity radon and radiation holes in the ozone layer the cause of AIDS and the controversy over Velikovsky Hogan explains the basics of each controversy with his clear informative style in a book that will be fascinating for anyone with an interest in the frontiers of modern science Book jacket

Rational Readings on Environmental Concerns Jay H. Lehr, 1992-08-04 the proof of man s destruction of the environment isconsistently flawed the scientific method is being abused and ignored The errors are not random however but are systematically biased toward attempting to prove the guilt of man in the alleged destruction of the planet Objective science is disappearing and is being replaced by the pursuit of a philosophical agenda Richard F Sanford in Environmentalism and the Assault on Reason Chapter 1 The public has numerous misconceptions about the relationship between environmental pollution and human cancer Underlying these misconceptions is an erroneous belief that nature is benign Bruce N Ames Ph D and Lois Swirsky Gold Ph D in Environmental Pollution and Cancer Some Misconceptions Chapter 7 Greenhouse gases have been increasing in the atmosphere largely as a result of human activities However the climate record does not show the temperature increase and other telltale signs of the expected greenhouse effect The mathematical models used for predicting such effects are evidently not complete enough to encompass all of the relevant physical processes in the atmosphere thus throwing grave doubt on the drastic warming hypothesized for the next century S Fred Singer in Global Climate Change Facts and Fiction Chapter 13 There is now no prima facie case for any expensive policy of safeguarding species without more extensive analysis than has so far been done Julian L Simon in Disappearing Species Deforestation and Data Chapter 26
